**Understanding Broadcast Journalism** Stephen Jukes,Katy McDonald,Guy Starkey,2017-11-21 Understanding Broadcast Journalism presents an insightful exploration of broadcast journalism today; its characteristics, motivations, methods and paradigms. The authors balance discussions of industry practice with critical examinations of content, across television, radio and associated multiplatform journalism. They highlight key issues including ownership and shifting regulatory environments, the revolutionary role of user-generated-content and digital convergence, and coverage of global issues by rolling news services. Chapters include: • a brief history of broadcasting; • an overview of recent commercial challenges in the news industry and the impact on television news; • current trends in the running of local radio stations, with particular focus on the rise of 'hubbing'; • the ethics of broadcast journalism; • the significance of international broadcasters including the BBC, CNN and Al-Jazeera. The book identifies how the dissemination of broadcast

journalism is evolving, whilst also arguing for the continued resilience of this industry now and in the future, making the case that journalistic storytelling remains at its most effective in broadcast environments. Professional journalists and students of media studies and journalism will find this a timely and thought-provoking intervention, which will help to inform their professional practice and research.

**The Beginning of Broadcast Regulation in the Twentieth Century** Marvin R. Bensman, 2015-11-03 The Radio Act of August 13, 1912, provided for the licensing of radio operators and transmitting stations for nearly 15 years until Congress passed the Radio Act of 1927. From 1921 to 1927, there were continual revisions and developments and these still serve as the basis for current broadcast regulation. This book chronicles that crucial six-year period using primary documents. The administrative structure of the Department of Commerce and the personnel involved in the regulation of broadcasting are detailed. The book is arranged chronologically in three sections: Broadcast Regulation and Policy from 1921 to 1925; Congestion and the Beginning of Regulatory Breakdown in 1924 and 1925; and Regulatory Breakdown and the Passage of the Act of 1927. There is also discussion of the Department of Commerce divisions and their involvement until they were absorbed by the Federal Communication Commission. A bibliography and an index conclude the work.

The Television Code Deborah L. Jaramillo, 2018-09-26 The broadcasting industry's trade association, the National Association of Broadcasters (NAB), sought to sanitize television content via its self-regulatory document, the Television Code. The Code covered everything from the stories, images, and sounds of TV programs (no profanity, illicit sex and drinking, negative portrayals of family life and law enforcement officials, or irreverence for God and religion) to the allowable number of commercial minutes per hour of programming. It mandated that broadcasters make time for religious programming and discouraged them from charging for it. And it called for tasteful and accurate coverage of news, public events, and controversial issues. Using archival documents from the Federal Communications Commission, NBC, the NAB, and a television reformer, Senator William Benton, this book explores the run-up to the adoption of the 1952 Television Code from the perspectives of the government, TV viewers, local broadcasters, national networks, and the industry's trade association. Deborah L. Jaramillo analyzes the competing motives and agendas of each of these groups as she builds a convincing case that the NAB actually developed the Television Code to protect commercial television from reformers who wanted more educational programming, as well as from advocates of subscription television, an alternative distribution model. By agreeing to self-censor content that viewers, local stations, and politicians found objectionable, Jaramillo concludes, the NAB helped to ensure that commercial broadcast television would remain the dominant model for decades to come.
