Reading in the mobile era West, Mark,Chew Han Ei,2014-04-28 Millions of people do not read for one reason: they do not have access to text. But mobile phones and cellular networks are transforming a scarce resource into an abundant one. Drawing on the analysis of over 4,000 surveys collected in seven developing countries and corresponding qualitative interviews, this report paints a detailed picture of who reads books and stories on mobile devices and why. The findings illuminate, for the first time, the habits, beliefs and profiles of mobile readers in developing countries. This information points to strategies to expand mobile reading and, by extension, the educational and socio-economic benefits associated with increased reading. Mobile technology can advance literacy and learning in underserved communities around the world. This report shows how.

Mobile App Trends In 2015 Vindimear Heart,2015-03-04 Mobile App Trends in 2015: For Mobile App Marketing As we move into 2015 with lots of wishes and expectations, one thing that also follows us is: people are increasingly moving from the disconnected world to the continuously connected one. People all around the globe are buying and adopting smart devices with a great pace, trying to change their ways of approach to life - changing the way we entertain, interact, educate and shop. According to a survey it is expected to continue with around 50 billion connected devices expected by 2020. For the past 15 years, enterprises and consumers have been using mobile devices primarily to communicate and collaborate. Today's mobile devices are pocket-able supercomputers, and when they're combined with broadband networks and public cloud services, they become extremely powerful business tools. Next year will be the first year that companies mobilize revenue-generating processes. Retail and Banking led this charge, moving large processes, like shopping and check deposits, to Smartphone and tablets. This move will continue to expand into other industries as the Smartphone and tablet replace the PC as a person's primary compute device.

The Bottom Button of my Mobile Archit Banwari,2020-11-28 Mobile can help covering journeys even when you are on a couch..... A mobile phone that was considered a basic need is a revolution now. Everything is on your palm. Mobile phones started with basic button mobile and are now computers in your pocket. This write up is at the time which was a transformation stage where ‘Button mobiles’ have started fading and ‘Smart phones’ were spreading their jaws (that are now eventually eating us, but that is a different topic). Narrator is a person who was happy with his button mobile even though his acquaintances had ‘Smart phones’. Author was unaware of the use of smart phones and was perplexed over the hold of Smart phones over people. However, forgetting all that, one night he was just pressing buttons of his ‘Not so smart phone’ and from the Message Inbox covered a nostalgic journey of a previous few years of his life - From the fear of Loans to the bond of Friendship; From the struggle of a Journey to a relation with a Credit card executive; From Complains to few Memories - Some truths.. Some fiction.. Few messages.. And ‘The Bottom Button’
