Bringing Climate Change Into Natural Resource Management Linda Joyce,2008 This workshop furthers the dialogue among scientists, land managers, landowners, interested stakeholders & the public about how individuals are addressing climate change in natural resource management. Discussions illustrated the complexity of global climate change & the need for managers to consider how the impacts of climate change will unfold across regional & local landscapes. The workshop offered examples of how managers are already responding to those aspects of the global climate change that they can see or perceive. While no comprehensive solutions emerged, there was an appreciation that policy complexity may exceed the science complexity but that eventually the accumulation of local actions will shape the future.
