The Future of Insurance: From Disruption to Evolution Bryan Falchuk, 2020-06-23 The best-selling 1st book in the series from industry veteran, Bryan Falchuk. For over 100 years, Insurers have stood by customers at some of the toughest moments in their lives, and helped allow people to go about their lives and pursue their business ideas without having to worry about the risks involved. Today, those customers have different expectations for how they want to do business and be served. And those expectations are changing faster than ever before. The industry has faced many headwinds, making it difficult to keep up with change – regulation, bureaucracy, system constraints, past technology project pain, etc., and disruptive threats from a new generation of startups that are free from many of these legacy constraints. And yet, several carriers have innovated and evolved. Understanding their paths to success can help shed light on how we as an industry can continue to evolve to meet our customers' needs despite the disruption and headwinds we all face. *The Future of Insurance: From Disruption to Evolution* shares the first-hand accounts of insurers across functions and lines of business to not just give inspiration, but leave readers with a tangible blueprint for evolving through a new set of modern, flexible and responsive approaches and tools.

Castles and Moats Brian Carden, 2022-03-08 In *Castles and Moats*, Brian Carden simply explains insurance and investing, unpacks all the different options, and helps us chart a course to the financial future we've always dreamed of and worked so hard to obtain. Americans are confused about managing their finances, insurance needs, and overall life planning. In the past, money wasn't the do-it-yourself project it has become today. Instead, consumers had insurance and financial professionals to help them make prudent decisions. The point-and-click, self-serve nature of the Information Age has robbed us of the personalized face-to-face relationships that once led us into good financial decisions. Today, we're drowning in information . . . but we're starving for unbiased education without a sales pitch attached. We need a "professional explainer" to come alongside us, unpack all the different options, and help us chart a course to the financial future we've always dreamed of and worked so hard to obtain. In *Castles and Moats*, Brian Carden is that "explainer." He helps you understand, prioritize, organize, strategize, and stress-test each financial product or strategy to help you create a more favorable outcome. You'll learn how to avoid buying products or strategies that might seem good when you buy them, only to find out about the pitfalls later in your life. By recapturing those lost dollars and redeploying them towards other, more tailored solutions, you'll increase your chance of financial independence with more predictable outcomes. Unpacking all the ins and outs of insurance, planning, and investment strategies, Brian provides an unbiased, practical, and easy-to-understand guide for you to make better, more informed decisions. In *Castles and Moats*, he equips you to build your glimmering castle of wealth and surround it with a moat of protection.

New Mexico's Centralized Risk Management Tom Bryan, Dick Howard, 1979

The Moral Hazard of Insuring the Insurers James G. Bohn, Brian J. Hall, 1997 State guaranty funds are quasi-governmental agencies that provide insurance to policyholders against the risk of insurance company failure. But insurance provided by guaranty funds, like all insurance, creates moral hazard problems, especially for companies that are insolvent or near-insolvent. The key insight of this paper is that because of the time lag between premium payments and losses (which is especially lengthy in long-tail lines), writing policies is one way for insurance companies to borrow money (i.e., from policyholders). Moreover, the existence of guaranty fund insurance enables insurance companies, even very risky ones, to borrow from policyholders at rates that do not reflect the insurer's default risk. Thus, one way for insurance companies to game the guaranty fund system is to engage in excessive premium writing. Consistent with this idea, we find that insolvent P&C insurance companies tended to have very high premium growth before they failed. More than one-third of the failed insurance companies had premium growth of more than 50 percent in the two years before failure. Moreover, this excessive premium growth was more pronounced in long-tail lines than in short-tail lines. We also find evidence that greater regulatory resources are associated with less gaming of the system.
