SELF-HEALING by The B.S.M. Method Lewandowski Piotr,2016-11-12 Second English edition, extended version 2016 Author: Piotr Lewandowski In presenting this description of a new, unique method of self-healing concerning many illnesses may I say I do so in the conviction that its effectiveness has been displayed for at least a decade. The method effectively saved my own health at a specific moment, as it also did for many others to whom I explained it. The method of application was taught to me by its discoverer- Eugeniusz Uchnast. I went on to present it to suffering patients in various Polish towns and at many public meetings. This method does not follow standard medical and pharmacological practice where the biological system is the object of treatment; this method influences the organism's electromagnetic field which is something of a force responsible for the proper functioning of the various systems of which the human body is composed. Obviously, the body must also receive the requisite building materials parallel to this: albumin, vitamins, mineral salts and others without which an organism will fail to function. This method differs from conventional therapy where biological systems are interfered with to reinstate the previous equilibrium of the electromagnetic field (called the L or life field). Here the B.S.M. method first treats that field, the result being that the biological system reattains a normal condition.

eWork and eBusiness in Architecture, Engineering and Construction: ECPPM 2016 Symeon Christodoulou,Raimar Scherer,2017-03-27 eWork and eBusiness in Architecture, Engineering and Construction 2016 collects the papers presented at the 11th European Conference on Product & Process Modelling (ECPPM 2016, Cyprus, 7-9 September 2016), The contributions cover complementary thematic areas that hold great promise for the advancement of research and technological development in the modelling of complex engineering systems, encompassing a substantial number of high quality contributions on a large spectrum of topics pertaining to ICT deployment instances in AEC/FM, including: • Information and Knowledge Management • Construction Management • Description Logics and Ontology Application in AEC • Risk Management • 5D/nD Modelling, Simulation and Augmented Reality • Infrastructure Condition Assessment • Standardization of Data Structures • Regulatory and Legal Aspects • Multi-Model and distributed Data Management • System Identification • Industrialized Production, Smart Products and Services • Interoperability • Smart Cities • Sustainable Buildings and Urban Environments • Collaboration and Teamwork • BIM Implementation and Deployment • Building Performance Simulation • Intelligent Catalogues and Services

Innovative Business Development—A Global Perspective Ramona Orăștean,Claudia Ogrean,Silvia Cristina Mărginean,2018-11-13 This proceedings volume presents the latest trends in innovative business development theory and practice from a global, interdisciplinary perspective. Aqueous Lubrication Nicholas D Spencer,2014-03-12 Man lubricates mostly with oil. Nature lubricates exclusively with water. Pure water is a poor lubricant, but the addition of proteins, especially glycoproteins, can modify surfaces to make them far more lubricating at slow speeds. Understanding how nature does this, and the physical structures involved, is not only important for the understanding of diseases such as osteoarthritis, but also essential for the successful application of articulating implants, such as hips and knees, as well as the development of medical devices such as catheters and contact lenses. A host of important applications of water-based lubrication are already in place in the personal care and food industries, and further industrial applications of water-based lubrication could have a significant positive impact on the environment. This book is the first of its kind. It brings together the latest research in biological and biomimetic, water-based lubrication and is authored by the world's experts in the field. Contents:Tribology of Natural Articular Joints (Rowena Crockett)Sticky and Slippery: Interfacial Forces of Mucin and Mucus Gels (Seunghwan Lee)Aqueous Lubrication and Food Emulsions (Jason R Stokes)Aqueous Lubrication in Cosmetics (Gustavo S Luengo, Anthony Galliano and Claude Dubief)Hydrogel Friction and Lubrication (Jian Liu and Jian Ping Gong)Aqueous Lubrication with Polymer Brushes (Suzanne Giasson and Nicholas D Spencer)Water-Like Lubrication of Hard Contacts by Polyhydric Alcohols (Jean Michel Martin and Maria Isabel De Barros-Bouchet)Aqueous Lubrication of Ceramics (Mitjan Kalin) Readership: Academic and industrial tribologists, materials scientists, biomechanics professionals, and physicists and chemists with an interest in tribology. India and Nuclear Asia Yogesh Joshi,Frank O'Donnell,2018-11-01 India's nuclear profile, doctrine, and practices have evolved rapidly since the country's nuclear breakout in 1998. However, the outside world's understanding of India's doctrinal debates, forward-looking strategy, and technical developments are still two decades behind the present. India and Nuclear Asia will fill that gap in our knowledge by focusing on the post-1998 evolution of Indian nuclear thought, its arsenal, the triangular rivalry with Pakistan and China, and New Delhi's nonproliferation policy approaches. Yogesh Joshi and Frank O'Donnell show how India's nuclear trajectory has evolved in response to domestic, regional, and global drivers. The authors argue that emerging trends in all three states are elevating risks of regional inadvertent and accidental escalation. These include the forthcoming launch of naval nuclear forces within an environment of contested maritime boundaries; the growing employment of dual-use delivery vehicles; and the emerging preferences of all three states to employ missiles early in a conflict. These dangers are amplified by the near-absence of substantive nuclear dialogue between these states, and the growing ambiguity of regional strategic intentions. Based on primary-source research and interviews, this book will be important reading for scholars and students of nuclear deterrence and India's international relations, as well as for military, defense contractor, and policy audiences both within and outside South Asia.

Pattern Recognition and Image Analysis Jordi Vitria,João Miguel Sanches,Mario Hernández,2011-06-01 This volume constitutes the refereed proceedings of the 5th Iberian Conference on Pattern Recognition and Image Analysis, IbPRIA 2011, held in Las Palmas de Gran Canaria, Spain, in June 2011. The 34 revised full papers and 58 revised poster papers presented were carefully reviewed and selected from 158 submissions. The papers are organized in topical sections on computer vision; image processing and analysis; medical applications; and pattern recognition.

Market Risk Analysis, Boxset Carol Alexander,2009-02-24 Market Risk Analysis is the most comprehensive, rigorous and detailed resource available on market risk analysis. Written as a series of four interlinked volumes each title is self-contained, although numerous cross-references to other volumes enable readers to obtain further background knowledge and information about financial applications. Volume I: Quantitative Methods in Finance covers the essential mathematical and financial background for subsequent volumes. Although many readers will already be familiar with this material, few competing texts contain such a complete and pedagogical exposition of all the basic quantitative concepts required for market risk analysis. There are six comprehensive chapters covering all the calculus, linear algebra, probability and statistics, numerical methods and portfolio mathematics that are necessary for market risk analysis. This is an ideal background text for a Masters course in finance. Volume II: Practical Financial Econometrics provides a detailed understanding of financial econometrics, with applications to asset pricing and fund management as well as to market risk analysis. It covers equity factor models, including a detailed analysis of the Barra model and tracking error, principal component analysis, volatility and correlation, GARCH, cointegration, copulas, Markov switching, quantile regression, discrete choice models, non-linear regression, forecasting and model evaluation. Volume III: Pricing, Hedging and Trading Financial Instruments has five very long chapters on the pricing, hedging and trading of bonds and swaps, futures and forwards, options and volatility as well detailed descriptions of mapping portfolios of these financial instruments to their risk factors. There are numerous examples, all coded in interactive Excel spreadsheets, including many pricing formulae for exotic options but excluding the calibration of stochastic volatility models, for which Matlab code is provided. The chapters on options and volatility together constitute 50% of the book, the slightly longer chapter on volatility concentrating on the dynamic properties the two volatility surfaces the implied and the local volatility surfaces that accompany an option pricing model, with particular reference to hedging. Volume IV: Value at Risk

Models builds on the three previous volumes to provide by far the most comprehensive and detailed treatment of market VaR models that is currently available in any textbook. The exposition starts at an elementary level but, as in all the other volumes, the pedagogical approach accompanied by numerous interactive Excel spreadsheets allows readers to experience the application of parametric linear, historical simulation and Monte Carlo VaR models to increasingly complex portfolios. Starting with simple positions, after a few chapters we apply value-at-risk models to interest rate sensitive portfolios, large international securities portfolios, commodity futures, path dependent options and much else. This rigorous treatment includes many new results and applications to regulatory and economic capital allocation, measurement of VaR model risk and stress testing.

Information Technology Carl Urie,2001-12 The Defense Logistics Agency (DLA) plays a critical role in supporting America's military forces worldwide. IN FY2000, DLA reported that its operations resulted in sales to the military services of about \$13 billion. This report determines: (1) whether DLA is using an enterprise architecture to guide & constrain its investment in Business Systems Modernization (BSM); & (2) whether DLA is investing in BSM in an incremental manner. Using enterprise architectures -- institutional blueprints for business & technological change -- & investing incrementally in large modernization programs are legislative & federal requirements & best industry practices. Market Risk Analysis, Pricing, Hedging and Trading Financial Instruments Carol Alexander,2008-06-09 Written by leading market risk academic, Professor Carol Alexander, Pricing, Hedging and Trading Financial Instruments forms part three of the Market Risk Analysis four volume set. This book is an in-depth, practical and accessible guide to the models that are used for pricing and the strategies that are used for hedging financial instruments, and to the markets in which they trade. It provides a comprehensive, rigorous and accessible introduction to bonds, swaps, futures and forwards and options, including variance swaps, volatility indices and their futures and options, to stochastic volatility models and to modelling the implied and local volatility surfaces. All together, the Market Risk Analysis four volume set illustrates virtually every concept or formula with a practical, numerical example or a longer, empirical case study. Across all four volumes there are approximately 300 numerical and empirical examples, 400 graphs and figures and 30 case studies many of which are contained in interactive Excel spreadsheets available from the the accompanying CD-ROM . Empirical examples and case studies specific to this volume include: Duration-Convexity approximation to bond portfolios, and portfolio immunization; Pricing floaters and vanilla, basis and variance swaps; Coupon stripping and yield curve fitting; Proxy hedging, and hedging international securities and energy futures portfolios; Pricing models for European exotics, including barriers, Asians, look-backs, choosers, capped, contingent, power, quanto, compo, exchange, 'best-of' and spread options; Libor model calibration; Dynamic models for implied volatility based on principal component analysis; Calibration of stochastic volatility models (Matlab code); Simulations from stochastic volatility and jump models; Duration, PV01 and volatility invariant cash flow mappings; Delta-gamma-theta-vega mappings for options portfolios; Volatility beta mapping to volatility indices.

An Asian Direct and Indirect Real Estate Investment Analysis Kim Hin David HO,2021-05-04 This book is dedicated to real estate scholastic work, in advancing the greater understanding of real estate investment analysis. This is because there has been limited research in bringing out clearly the uncertainty or risk, which is quantifiable uncertainty in real estate market analysis. Even real estate market research, which is carried out as an industry practice among private real estate researches, is no exception. Another reason is that it has been widely accepted that while the financial revolution has substantially changed many sectors of the financial industry, it has made little impact on real estate development and investment practice as ill as scholastic work. Furthermore, while it is readily acknowledged that despite its huge share in the world health, real estate investment discipline and research is on the whole still a poorly researched subject area. As a result, the industry tends to be dominated by traditional real estate analysts with little understanding of real estate market uncertainty and capital markets. These commentators are widely regarded to spend too much time worrying about local space supply and demand conditions, while totally losing sight of the everchanging real estate market and capital market conditions. The theme of this book is real estate investment analysis of direct and indirect real, which in turn can be appropriately managed under economic theory and the theoretical conceptions of real estate finance, provided the uncertainty is quantifiable. The book deploys case studies involving Singapore and Asia. This Black over White background viii framework enables real estate market analysis to attempt what defines the Asian direct and indirect real estate sectors; what is being measured; how it behaves (in terms of price and non-price factors); how it is structured and how it effectively achieves the objectives of sustainable total returns and manageable real estate market uncertainty. Managing real estate market uncertainty optimally is achieved at the portfolio level through real estate asset allocation. This is important because the real estate portfolio is able to virtually eliminate the unique (i.e. specific) uncertainties among the various Asian real estate sectors; thus retaining within the portfolio only the systemic (i.e. market-wide) uncertainty. Apart from real estate asset allocation, the alternative and modern approach to risk management at the portfolio level, is the value-at-risk (VaR) approach. Another modern and important alternative to coping with uncertainty is real option analysis and pricing that help to better define real estate market uncertainty in extent and time. Real option analysis and pricing also represent uncertainty via a decision tree and the risk-neutral probability conception, in order to comprehend how uncertainty impacts on the value of real estate investment decisions. The pricing of uncertainty is based on the risk-free hedge security conception. These are best examined at the micro level of the investment in a real estate development opportunity on vacant land. Nevertheless, the real estate sectors in Singapore and Asia offer promising prospects since the Asian currency crisis of 1997. It is now timely to take stock and make an assessment of how the sectors would pan out for the future, ill into at least rest the next century. I are very pleased to present our thinking and research in international real estate with particular emphasis on Asia. The region's vast potential for real estate is itself a large incentive for international real estate research and education that has inspired me to document the significant work I have done over the years. Black over White background ix I wish all readers a pleasurable reading of this book, and I thank you sincerely for your support without which the publication of this book would be made all the more difficult. Dr HO, Kim Hin / David Honorary Professor (University of Hertfordshire, UK) (International Real Estate & Public Policy) March 2021.

Managing Today's News Media Samir Husni,Debra Halpern Wenger,Hank Price,2015-07-29 The business of journalism is in the midst of massive change. Managing Today's News Media: Audience First offers practical solutions on how to cope with and adapt to the evolving media landscape. News media experts Samir Husni, Debra Halpern Wenger, and Hank Price introduce a forward-looking framework for understanding why change is occurring and what it means to the business of journalism. Central to this new paradigm is a focus on the audience. The authors introduce "The 4Cs Strategy" to describe how customers, control, choice, and change are all part of a strategy for successful media organizations. Real-world case studies, important theoretical grounding, and a focus on understanding rather than resisting the customer's desire for choice and

control make this an unbeatable resource for students and managers alike who want to succeed in this changed media business landscape.

Statistical Analysis of Microbiome Data with R Yinglin Xia,Jun Sun,Ding-Geng Chen,2018-10-06 This unique book addresses the statistical modelling and analysis of microbiome data using cutting-edge R software. It includes real-world data from the authors’ research and from the public domain, and discusses the implementation of R for data analysis step by step. The data and R computer programs are publicly available, allowing readers to replicate the model development and data analysis presented in each chapter, so that these new methods can be readily applied in their own research. The book also discusses recent developments in statistical modelling and data analysis in microbiome research, as well as the latest advances in next-generation sequencing and big data in methodological development and applications. This timely book will greatly benefit all readers involved in microbiome, ecology and microarray data analyses, as well as other fields of research.

A Pragmatic Guide to Real Options T. Arnold,2014-12-29 Aimed at practitioners with no prior expertise in the subject, this book helps readers build basic real options models to aid in decision-making. Providing a pragmatic and informative approach, the authors introduce basic probability theories, before putting these theories into a real-world context.

The Routledge Handbook of Critical Finance Studies Christian Borch,Robert Wosnitzer,2020-09-15 There has been an increasing interest in financial markets across sociology, history, anthropology, cultural studies, and related disciplines over the past decades, with particular intensity since the 2007–2008 crisis which prompted new analyses of the workings of financial markets and how “scandals of Wall Street” might have huge societal ramifications. The sociologically inclined landscape of finance studies is characterized by different more or less well- established homogeneous camps, with more micro-empirical, social studies of finance approaches on the one end of the spectrum and more theoretical, often neo-Marxist approaches, on the other. Yet alternative approaches are also gaining traction, including work that emphasizes the cultural homologies and interconnections with finance as well as work that, more broadly, is both empirically rigorous and theoretically ambitious. Importantly, across these various approaches to finance, a growing body of literature is taking shape which engages finance in a critical manner. The term “critical finance studies” nonetheless remains largely unfocused and undefined. Against this backdrop, the key rationales of The Routledge Handbook of Critical Finance Studies are firstly to provide a coherent notion of this emergent field and secondly to demonstrate its analytical usefulness across a wide range of central aspects of contemporary finance. As such, the volume will offer a comprehensive guide to students and academics on the field of Finance and Critical Finance Studies, Heterodox Economics, Accounting, and related Management disciplines. Chapter 14 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.
