Final Environmental Statement United States. Bureau of Land Management,1978 The proposed lease would help protect the historic buildings from historically inaccurate alterations. Impacts to the archaeological resource would be lessened on the 5.5 acres by controlling or reducing both artifact and bottle collecting and excavation in connection with occupancy and removal of ruins. There would be no impact to mining nor any change in grazing activities. Compliance with the lease would require a

short-term increase in maintenance and construction activities. Localized soil, vegetation, and wildlife disturbance would occur. Long-term impacts to grazing, vegetation, soils, and wildlife and fishery would be negligible--Page iii.

XOXO Axie Oh, 2021-07-13 Jenny's never had much time for boys, K-pop, or really anything besides her dream of being a professional cellist. But when she finds herself falling for a K-pop idol, she has to decide whether their love is worth the risk. A modern forbidden romance wrapped in the glamorous and exclusive world of K-pop, XOXO is perfect for fans of Jenny Han and Maurene Goo. Jenny didn't get to be an award-winning, classically trained cellist without choosing practice over fun. That is, until the night she meets Jaewoo. Mysterious, handsome, and just a little bit tormented, Jaewoo is exactly the kind of distraction Jenny would normally avoid. And yet, she finds herself pulled into spending an unforgettable evening wandering Los Angeles with him on the night before his flight home to South Korea. With Jaewoo an ocean away, there's no use in dreaming of what could have been. But when Jenny and her mother move to Seoul to take care of her ailing grandmother, who

does she meet at the elite arts academy she's just been accepted to? Jaewoo. Finding the dreamy stranger who swept you off your feet in your homeroom is one thing, but Jaewoo isn't just any student. Turns out, Jaewoo is a member of one of the biggest K-pop bands in the world. And like most K-pop idols, Jaewoo is strictly forbidden from dating anyone. When a relationship means not only jeopardizing her place at her dream music school but also endangering everything Jaewoo's worked for, Jenny has to decide once and for all just how much she's willing to risk for love. XOXO is a new romance that proves chasing your dreams doesn't have to mean sacrificing your heart, from acclaimed author Axie Oh. Indigo Best Teen Books of 2021

In the Bubble John Thackara, 2006-02-17 How to design a world in which we rely less on stuff, and more on people. We're filling up the world with technology and devices, but we've lost sight of an important question: What is this stuff for? What value does it add to our lives? So asks author John Thackara in his new book, *In the Bubble: Designing for a Complex World*. These are tough questions

for the pushers of technology to answer. Our economic system is centered on technology, so it would be no small matter if tech ceased to be an end-in-itself in our daily lives. Technology is not going to go away, but the time to discuss the end it will serve is before we deploy it, not after. We need to ask what purpose will be served by the broadband communications, smart materials, wearable computing, and connected appliances that we're unleashing upon the world. We need to ask what impact all this stuff will have on our daily lives. Who will look after it, and how? In the Bubble is about a world based less on stuff and more on people. Thackara describes a transformation that is taking place now—not in a remote science fiction future; it's not about, as he puts it, the schlock of the new but about radical innovation already emerging in daily life. We are regaining respect for what people can do that technology can't. In the Bubble describes services designed to help people carry out daily activities in new ways. Many of these services involve technology—ranging from body implants to wide-bodied jets. But objects and systems play a supporting role in a people-centered world. The design focus is on services, not things. And new principles—above all, lightness—inform the way these services are

designed and used. At the heart of In the Bubble is a belief, informed by a wealth of real-world examples, that ethics and responsibility can inform design decisions without impeding social and technical innovation.

Confessions of a Recovering Environmentalist and Other Essays Paul Kingsnorth, 2017-08-01 A provocative and urgent essay collection that asks how we can live with hope in “an age of ecocide” Paul Kingsnorth was once an activist—an ardent environmentalist. He fought against rampant development and the depredations of a corporate world that seemed hell-bent on ignoring a looming climate crisis in its relentless pursuit of profit. But as the environmental movement began to focus on “sustainability” rather than the defense of wild places for their own sake and as global conditions worsened, he grew disenchanted with the movement that he once embraced. He gave up what he saw as the false hope that residents of the First World would ever make the kind of sacrifices that might avert the severe consequences of climate change. Full of grief and fury as well as passionate, lyrical evocations of nature and the wild, *Confessions of a Recovering Environmentalist* gathers the wave-

making essays that have charted the change in Kingsnorth's thinking. In them he articulates a new vision that he calls "dark ecology," which stands firmly in opposition to the belief that technology can save us, and he argues for a renewed balance between the human and nonhuman worlds. This iconoclastic, fearless, and ultimately hopeful book, which includes the much-discussed "Uncivilization" manifesto, asks hard questions about how we've lived and how we should live.
