Money and Banking in the UK (RLE: Banking & Finance) Michael Collins,2012-09-11 This book is concerned with developments in three main areas of monetary history: domestic commercial banking; monetary policy; and the UK's international financial position. For ease of analysis the 160 years under study are arranged into three clear chronological divisions. Part 1 covers the years 1826-1913, a period in which the UK emerged as the world's leading economic power. It was in these years that an extensive and fully-operative domestic banking system was established. Part 2 covers 1914 to 1939 – the years which marked a break in the traditional monetary arrangements of the Victorian and Edwardian eras. Part 3 covers 1939-1986 when the dominance of state influence within the domestic money markets was re-established by the Second World War and the acceptance by the

authorities of the obligation to 'manage' the economy which meant that successive postwar governments took direct responsibility for the conduct of monetary and credit policy.

Budget Greater London Council, 1974

London's Mayor at 20 Jack Brown, Richard Brown, Tony Travers, 2020-11-24 This year, London's elected mayor and assembly turn twenty. But has London's mayoralty lived up to the expectations that were set for it? Have its three mayors been able to get to grips with the city's challenges? How have they responded to crises in the past – and what does the future hold? This important new book marks the twentieth anniversary of London's mayor and assembly and investigates the relative successes and challenges of the mayoralty to date, before asking what comes next for London. It combines analysis by experts with reflections from those closely involved in setting up, running and working with the Greater London Authority, alongside those who have held the position of Mayor of London themselves.

The Way the Money Goes Christopher Hood, Maia King, Iain McLean, Barbara Maria Piotrowska, 2023-09-28 The Way the Money Goes traces out what happened to the UK's fiscal constitution - the framework for planning and controlling public spending - under three different governments (Conservative, Labour, Conservative/Liberal Democrat) from the early 1990s to the mid-2010s. The book tells the story of what happened under each government and combines narrative with vignettes that range from the funding of a new Treasury building to efforts to 'crowdsource' ideas for spending cuts. It also includes chapters devoted to different domains of spending control, namely capital spending, spending by subnational governments, running cost expenditure, fiscal forecasting, and the development of new accounting metrics. This book is based on over 120 in-depth interviews of civil servants and ministers who were involved in public spending over the period, as well as documents from the same timeframe. It explores how and why, despite much talk of change and reform in everything from parliamentary procedure to bureaucratic processes, many of the underlying features of the UK's fiscal constitution persisted, including arrangements for formula-funding of the different countries within the union designed as a temporary stopgap in the transition to devolution. To put UK developments into perspective, the book includes a discussion of how the UK system was rated in reports from international bodies over the period, which

suggests that in such exercises the more 'political' parts of the fiscal constitution were rated differently from the more 'technocratic' parts. Given several volcanic-type political eruptions in the UK over recent years, the book concludes by exploring some different possible scenarios for the future of its fiscal constitution in the light of those and other possible eruptions to come.
