Budgeting for Public Managers Swain, 2015-05-18 Benefiting from the authors' many years of teaching undergraduate and graduate students and practitioners, here is a clear, comprehensive, practice-oriented text for public budgeting courses. Rather than presenting each budgeting concern in mind-numbing detail, the book offers a commonsensical view of public budgeting and its importance to current and future public managers. The text is designed to show readers how managers relate to budgeting and how their actions make a difference in the operation and performance of public organizations. The book covers the historical development of public budgeting, sources of public revenues, revenue management, budgeting processes and formats, operating techniques, politics within public budgeting, and more. Budgeting for Public Managers is concise, clearly written, well illustrated, and grounded in the real-world concerns of public managers. Each chapter concludes with a helpful list of additional reading and resources for readers who want to dig deeper into budgeting practice and application.

Public Budgeting in America Robert W. Smith, Thomas Dexter Lynch, 2004 The most comprehensive and accurate treatment of the public budgeting process on the market, this book offers a thorough treatment of the entire subject, with an emphasis on state budgets. Public Budgeting in America, 5/E is user-friendly, with a no-nonsense approach that offers readers a solid theoretical treatment of key constructs that underlie public budgeting in America. It includes case scenarios, practical examples, and instructional exhibits of working budget documents and analysis, as well as supporting data to demonstrate key concepts. Topics include: budget formats and preparation; modern budgeting; budget behavior; applied analysis; processing; operating budgets and accounting; capital budgeting and debt administration; revenue systems; and internal service functions. For individuals employed in the fields of public budgeting, financial management, and public finance.

Public Budgeting and Management Alan Walter Steiss, 1972

Performance Budgeting for State and Local Government Janet M. Kelly, 2015-05-18 Provides a comprehensive theoretical and practical framework for informing budget decisions based on the efficiency and effectiveness of service delivery. The authors enliven the text with references to their original research and personal experiences with performance measurement, citizen satisfaction surveys, and financial management practices. This edition includes increased coverage of cost accounting procedures and of citizen participation in performance management.

Performance-Based Budgeting in the Public Sector Michiel S. de Vries, Juraj Nemec, David Špaček, 2019-01-30 This book provides a comparative analysis of performance budgeting and financing implementation, and examines failures and successes across both developed and developing countries. Beginning with a review of theoretical research on performance budgeting and financing, the book synthesizes the numerous studies on the subject. The book describes the situation in the US, Australia, New Zealand, Germany, Austria and Switzerland, Netherlands and Italy, as well as in seven developing countries - Bulgaria, Czech Republic, Slovakia, Slovenia, Ukraine, Russia and South Africa, at the national, and at the local level. Each chapter provides historical and descriptive details of successful or failed experiments in performance budgeting and performance financing.

Public Budgeting Systems Robert D. Lee, Ronald Wayne Johnson, Philip G. Joyce, 2004 A complete and balanced reference, this timely resource surveys the current state of budgeting throughout all levels of the United States government. The text emphasizes methods by which financial decisions are reached within a system as well as ways in which different types of information are used in budgetary decision-making. It also stresses the use of program information, since, for decades, budget reforms have sought to introduce greater program considerations into financial decisions. Public Budgeting Systems, Seventh Edition retains the structure of the sixth edition yet gives increased attention to topics such as program information and government's role in the economy and has been updated with all new tables and exhibits. Using this text, students will gain a first-rate understanding of methods by which financial decisions are reached within a system, and how different types of information are used in budgetary decision-making.

Capital Management and Budgeting in the Public Sector Srithongrun, Arwiphawee, Ermasova, Natalia B., Yusuf, Juita-Elena (Wie), 2019-01-11 To create an enhanced quality of life, attract business relocation, and enhance equity in access to public infrastructure, governmental bodies must take certain precautions with their money. Budgeting at such a high level requires careful evaluation and research that addresses every aspect of financial management. Capital Management and Budgeting in the Public Sector provides emerging research exploring the theoretical and practical aspects of long-term capital planning, annual capital budgeting, capital budget execution, and public spending evaluation. Featuring coverage on a broad range of topics such as fiscal federalism, political regime, and project execution management, this book is ideally designed for managers, accountants, professionals, practitioners, and researchers working in the areas of public finance and/or international development.

Performance Management and Budgeting F Stevens Redburn, Robert J. Shea, Terry F. Buss, David M. Walker, 2015-01-28 This book provides a fresh look at the process by which governments hold themselves accountable to their citizens for performance. Unlike the plethora of other books in the field, it examines all aspects of the Performance Management and Budgeting issue, not only from the federal, state, and local perspectives, but also internationally in both developing and developed countries. Covering both conceptual and theoretical frameworks in performance management and budget, the book analyzes the effectiveness of different approaches. Featuring insights from a group of distinguished contributors, it ties current performance management approaches into the century-old literature on public sector reform and management, and presents arguments for and against performance management as well as recommendations on how to improve the enterprise.

Public Performance Budgeting Elaine Yi Lu, Katherine Willoughby, 2018-10-26 Performance budgeting involves costs, from the drafting and passage of legal foundations, and the political capital and will to implement it, to training personnel to create a performance-oriented culture, and information technology requirements to track performance. Through comprehensive examination of performance budgeting laws, in-depth interviews of those practicing in government agencies, and quantitative survey analysis, *Public Performance Budgeting* examines the influence of performance measurement and evaluation on all phases of the budgeting process. Lu and Willoughby present original research and case studies to explore how performance is linked to public budgets and government results, its impacts on budgeting systems, and possible unintended consequences. A summary assessment of how performance measurement could and should play a role in furthering performance budgeting is explored in a concluding chapter. The first of its kind to spotlight budget practice through the lens of juvenile justice, this book is required reading for all those studying public budgeting, management, and policy.

Planning, Programming, Budgeting Fremont J. Lyden, Ernest G. Miller, 1972

From Program to Performance Budgeting Mr. Jack Diamond, 2003-09-16 Many emerging market economies are trying to improve their budget processes and move to performance-based budgeting. This paper first reviews the evolution of the new performance budgeting model, increasingly being applied in industrial countries. By identifying its main components, the tasks faced by emerging market economies when converting their present budget systems to this model are determined. It is recognized that this conversion will not be easy and will require four major reform elements. First, any existing program structure must be set in the wider context of strategic budget planning and medium-term budget frameworks. Second, this typically involves redesigning and refining existing program structures. Third, existing budget-costing systems and associated skills will probably need to be improved. Fourth, and perhaps most difficult, a new system of accountability and budget incentives needs to be introduced. For emerging market economies, these should be viewed as the prerequisites for a successful introduction of the new performance-budgeting model.

Local Budgeting Anwar Shah, 2007 Local budgeting serves important functions that include setting priorities, planning, financial control over inputs, management of operations and accountability to citizens. These objectives give rise to technical and policy issues that require open discussion and debate. The format of the budget document can facilitate this debate. This book provides a comprehensive treatment of all aspects of local budgeting needed to develop sound fiscal administration at the local level. Topics covered include fiscal administration, forecasting, fiscal discipline, fiscal transparency, integrity of revenue administration, budget formats, and processes including performance budgeting, and capital budgeting.

Budgeting Practice and Organisational Structure David Dugdale, Stephen Lyne, 2010-01-18 Budgeting is at the heart of the performance management process for most companies. However, some argue that many companies today are dissatisfied with budgeting. It is seen to be costly and time-consuming; it inhibits action and causes organisational problems. The influence of the Beyond Budgeting model has caused many major companies, including Toyota, to abandon traditional budgeting altogether. Should other companies follow suit? *Budgeting Practice and Organisational Structure* explores the changes in budgeting through a survey of financial and non-financial managers. Concerns include: The attitudes of managers towards budgeting models How budgetary practices have changed What problems budgeting can cause The effects of budgets on overall company performance. This report reveals that there's little evidence to suggest widespread dissatisfaction with traditional budgeting. However, to enable a company to perform at its best, understanding budgeting in context is essential and it is imperative that budgeting works in tandem with other control systems and organisational structure. Original research funded by the Chartered Institute of Management Accounting Reveals the realities of budgeting models in practice Includes interviews and surveys of actual businesses

Comparative Public Budgeting Charles Menifield, 2011 *Comparative Public Budgeting and Finance* is a collection of original chapters examining public budgeting issues, methods, and techniques in countries around the world. Each chapter explores the history of the budget system and how it fits within the political system in the country, as well as the legal foundation and any reforms that affect the budget system. A discussion of revenue and expenditure allocations is included in each section. Each chapter also examines topics such as: budget behavior and decision making, capital budgeting, analytical processes, budget processes, intergovernmental relations, budget reform, performance budgeting, and financial management. Each chapter concludes with a list of thought provoking questions, an appendix, end notes and a glossary which provides a point of departure for classroom discussion as well as individual student research on each country.

Public Budgeting in Search for an Identity Maria Francesca Sicilia, Ileana Steccolini, 2020-12-18 *Public Budgeting in Search for an Identity: State of the Art and Future Challenges* provides a state-of-the-art reflection on current trends in international public budgeting, representing an important pillar in the accumulation of knowledge on public sector budgeting processes, contents, evolutions and critical issues. Budgeting is central in public sector organizations. It performs a complex variety of functions, being the arena where multiple actors, cultures and professional identities interact, making it an extremely fascinating field and topic of investigation. There is a significant need and scope for exploring budgeting processes in the public sector today, as a consequence of the managerial waves of reforms that have taken place over the last few decades and the implementation of austerity programmes – as well as in light of current trends, including emerging challenges related to community care and wellbeing, rising inequality, people flows, climate change, pandemics, and the persistence of democratic deficits. The chapters in this volume address critical issues on this broad topic, offering new perspectives on current evolutions in public budgeting, including, among others, participatory budgeting, performance budgeting, the budgetary slack resources and the need to ensure balance between budget control and flexibility. These contributions show that public budgeting can, and must remain, the subject of

enduring interest in our studies. The chapters in this book were originally published as a special issue of Public Management Review.

Toward Next-Generation Performance Budgeting Donald Moynihan,Ivor Beazley,2016-11-14 Toward Next-Generation Performance Budgeting: Lessons from the Experiences of Seven Reforming Countries analyzes the difficulties that national governments have had in linking measurement of performance and results to the annual budget process. The book is based on intensive reviews of four advanced countries that were early reformers and three pioneers in Central and Eastern Europe. In addition to looking at their current systems, Toward Next-Generation Performance Budgeting looks at how their approaches have evolved over time. This book attempts to fill a gap between survey-based self-assessments and best-practice guides. It was compiled in response to the concerns of budget departments in countries in Eastern Europe and Central Asia, many of which are committed to adopting some form of performance-based budgeting and are seeking to learn from the experiences of previous reformers what the practical challenges are and how they can adapt best-practice approaches to a messy reality. The case studies demonstrate a general pattern of disappointment with the results of performance budgeting, balanced by a strong belief in the underlying logic, which has resulted in repeated efforts to modify approaches to tighten the links between budgeting and performance. These efforts have resulted in significant variation in how countries have implemented performance budgeting and in the benefits they have derived. These variations offer guidance for models of next-generation performance budgeting, avoiding classic pitfalls, and incorporating modifications introduced by those who have used it longest and found it useful.
