*How to Build a Car* Adrian Newey, 2017-11 'Adrian has a unique gift for understanding drivers and racing cars. He is ultra competitive but never forgets to have fun. An immensely likeable man.' Damon Hill The world's foremost designer in Formula One, Adrian Newey OBE is arguably one of Britain's greatest engineers and this is his fascinating, powerful memoir. How to Build a Car explores the story of Adrian's unrivalled 35-year career in Formula One through the prism of the cars he has designed, the drivers he has worked alongside and the races in which he's been involved. A true engineering genius, even in adolescence Adrian's thoughts naturally emerged in shape and form - he began sketching his own car designs at the age of 12 and took a welding course in his school summer holidays. From his early career in IndyCar racing and on to his unparalleled success in Formula One, we learn in comprehensive, engaging and highly entertaining detail how a car actually works. Adrian has designed for the likes of Mario Andretti, Nigel Mansell, Alain Prost, Damon Hill, David Coulthard, Mika Hakkinen, Mark Webber and Sebastian Vettel, always with a shark-like purity of purpose: to make the car go faster. And while his career has been marked by unbelievable triumphs, there have also been deep tragedies; most notably Ayrton Senna's death during his time at Williams in 1994. Beautifully illustrated with never-before-seen drawings, How to Build a Car encapsulates, through Adrian's remarkable life story, precisely what makes Formula One so thrilling - its potential for the total synchronicity of man and machine, the perfect combination of style, efficiency and speed.

Originally a term coined for GM cars, the term Pro Touring has come to mean a style of all cars, and many eras. You can do this in many ways and choose from many suppliers. Detroit Speed is at the forefront of the Pro Touring movement. Both a parts manufacturer and car builder, the company is in a unique position not only to design and manufacture parts, but to build cars and test the parts for their effectiveness on the street and track. Kyle and Stacy Tucker have put their considerable skill in engineering and market savvy to create a unique company to lead the Pro Touring movement. Not only do you learn about the history of the company and how they design their performance parts, install sections cover front sub-frame

assemblies, rear suspension assemblies, wheel tubs, fuel system upgrades, brake upgrades, driveline upgrades including an LS swap, cooling system upgrades, and more. The featured cars are customer builds as well as DSE test cars, which include a host of different Chevrolet products, a 1966 Mustang and a 1969 Charger. *Total Competition* Ross Brawn,Adam Parr,2017-10-17 From Ross Brawn—one of the most successful figures in Formula One auto racing—comes a compelling insider’s account of what it takes to win, featuring practical advice for overcoming obstacles and becoming a champion both on and off the racetrack. Formula One racing is a wildly popular global sport with millions of fans and billions more engineering dollars at stake. For four decades, Ross Brawn has been one of the most innovative technical directors and team principals in the high-stakes world of Formula One. He is considered the most successful competitor in the history of Formula One to date, and “the closest thing there is to a certifiable genius” (The Wall Street Journal). Leading Benetton, Ferrari, Honda, and Mercedes, he has worked with legendary drivers such as Michael Schumacher, Jenson Button, and Lewis Hamilton to make them Grand Prix champions. Now, in this fascinating book, presented as a frank conversation between Brawn and fellow Formula One competitor Adam Parr, Brawn reflects upon his career, shares the philosophies and methods that led to his success, and offers lessons that every leader working with teams—at work, play, or home—can use to achieve their own goals, too. Brawn and Parr share details about the unique pressures of Formula One racing and the intense, cutthroat world they inhabited, where coming in second place is never good enough. Just as Phil Knight recounted his accomplishments and devastating setbacks in the building of the Nike brand in the New York Times bestseller *Shoe Dog*, this book also provides a blueprint for leading teams, imparting lessons such as “Embrace Humility,” “Invest in People and Culture,” “Strive for Simplicity, Manage Complexity,” and much more.

Build the Perfect Beast Mark Christensen,2016-06-07 Mark Christensen grew up with a simple dream-to build a 600 horsepower suicide machine able to accelerate from zero to sixty in less time than it takes to read this sentence. When a friend offers him \$100,000 to realize that dream, Christensen enlists Nick Pugh, the best young auto designer in the country. An idealistic, charismatic, twenty-two year old star student from the celebrated Art Center for Design in Pasadena, Pugh shows Christensen his sketches of the Xeno I-drawings that are stunningly original and strangely familiar-as if they were the best ideas I never had. Thus inspired, the author sets out to assemble a best of the best group of engineers, mechanics and fabricators. But the dream becomes grander and the designs of the Xeno evolve spectacularly after the endlessly hard working utopian Pugh develops an ingenious method for automobiles to triple their driving range. And as new and wilder Xenos fly from Pugh's monster imagination, nothing seems impossible. That is until the author discovers that \$100,000 may not even pay for the hubcaps that Pugh has envisioned. Build the Perfect Beast is a window into 21st century technology and cutting edge design at its most relevant and bizarre-an epic odyssey about craft, cars, opportunity and ambition that sizzles like American Graffiti on acid. This is a classic tale of chasing down the American dream.
