T. D. Jakes

Soar! T. D. Jakes, 2017-10-10 Take your career to the next level, realize your greatest dreams, and embrace your God-given talents with this practical game plan for your professional and personal life. Too often we remain in jobs that stifle our souls and leave us on the runway of opportunity with the engine of our deepest passion stalled, watching others make their personal vision a reality and build a legacy for their children. But it's never too late to get your dreams off the ground -- God sees great things in your future! If you long to amplify your unique abilities, if you strive to balance personal fulfillment and professional satisfaction, if you dream of fulfilling God's destiny for you, then you are ready to Soar! In *Soar!* T.D. Jakes reveals how to transform your own unique vision into a powerful contribution to the world. Blending a CEO's practical business acumen with a life coach's dynamic inspiration, *Soar!* will stir your imagination into action, challenge you to embrace your God-given purpose, and align your character and creativity with your career. Bridging both the corporate and nonprofit worlds, *Soar!* is a practical and easy-to-follow flight plan for launching the entrepreneurial drive inside of you. You'll learn how to adopt the mindset of people who don't wait to see what will happen but strategically build the wings that will take them to new heights. So buckle your seat belt and prepare for liftoff -- you have been cleared to fly beyond your fears, to absolutely soar!

Building Up and Tearing Down Paul Goldberger, 2009-10-13 PAUL GOLDBERGER ON THE AGE OF ARCHITECTURE The Guggenheim Museum Bilbao by Frank Gehry, the CCTV Headquarters by Rem Koolhaas, the Getty Center by Richard Meier, the Times Building by Renzo Piano: Pulitzer Prize-winning critic Paul Goldberger's tenure at *The New Yorker* has documented a captivating era in the world of architecture, one in which larger-than-life buildings, urban schemes, historic preservation battles, and personalities have commanded an international stage. Goldberger's keen observations and sharp wit make him one of the most insightful and passionate architectural voices of our time. In this collection of fifty-seven essays, the critic Tracy Kidder called "America's foremost interpreter of public architecture" ranges from Havana to Beijing, from Chicago to Las Vegas, dissecting everything from skyscrapers by Norman Foster and museums by Tadao Ando to airports, monuments, suburban shopping malls, and white-brick apartment houses. This is a comprehensive account of the best—and the worst—of the "age of architecture." On Norman Foster: Norman Foster is the Mozart of modernism. He is nimble and prolific, and his buildings are marked by lightness and grace. He works very hard, but his designs don't show the effort. He brings an air of unnerving aplomb to everything he creates—from skyscrapers to airports, research laboratories to art galleries, chairs to doorknobs. His ability to produce surprising work that doesn't feel labored must drive his competitors crazy. On the Westin Hotel: The forty-five-story Westin is the most garish tall building that has gone up in New York in as long as I can remember. It is fascinating, if only because it makes Times Square vulgar in a whole new way, extending up into the sky. It is not easy, these days, to go beyond the bounds of taste. If the architects, the Miami-based firm Arquitectonica, had been trying to allude to bad taste, one could perhaps respect what they came up with. But they simply wanted, like most architects today, to entertain us. On Mies van der Rohe: Mies's buildings look like the simplest things you could imagine, yet they are among the richest works of architecture ever created. Modern architecture was supposed to remake the world, and Mies was at the center of the revolution, but he was also a counterrevolutionary who designed beautiful things. His spare, minimalist objects are exquisite. He is the only modernist who created a language that ranks with the architectural languages of the past, and while this has sometimes been troubling for his reputation . . . his architectural forms become more astonishing as time goes on.

Metal Transfer and Build-up in Friction and Cutting V. D. Kuznetsov, 2013-10-22 Metal Transfer and Build-up in Friction and Cutting aims to systematize our knowledge of the metal build-up, to describe some of the investigations past and present carried out in SFTI (Tomsk), and to make an effort to explain a number of the phenomena in cutting, scratching, and sliding from the point of view of metal transfer theory. The book opens with a chapter on the temperature of the rubbing interface of two solids. This temperature is needed in order to elucidate the nature of the formation of a build-up in scratching, cutting, and sliding. Separate chapters follow on the seizure phenomena, the role played by a built-up edge in scratching, the built-up edge in metal cutting, metal transfer in friction; the occurrence and nature of the build-up at various speeds, temperatures, and pressures; and the problem of friction between cast iron and steel.

Building Material Estimates and Rates Build Up Moremi Mareka, 2009-05-29 The script is entitled Building Estimates and Rates Build Up .and aims at empowering Technical educators, Technical, Brigades and Community colleges students, Apprentices and individuals in the building profession with the necessary skill and knowledge. As an experienced professional in the building industry, quantity surveyor(building material estimator) and a former lecturer for technical colleges, I have realized that there is need to come up with a book that will help students, apprentices and individual builders to easily understand the subject of estimating and rates build up to enable them to apply the skill whenever they have projects. Currently, individual builders, apprentices, and students find it difficult to correctly and accurately estimate the quantities of materials required for proposed projects .Pricing is also a difficult task for most of them as they do not have an idea of how to build up rates. Presently our brigades and technical colleges do not have a relevant book to deal with Estimates. Building Estimates and Rates build up provides a solution to such a problem. The book provides a solution in that it brings together pure mathematics and practical estimation, to avoid a situation whereby students end up failing to realize that the same formulas that are used in Mathematics (math) are applicable in the estimates. I strongly believe that the book will be able to even penetrate the international market.

Build Up to Blast Off Dr Prahlada Ramarao, 2016-06-22 The Indian journey to become a missile power was enabled by a team of dare devils at the Defence Research and Development Laboratory (DRDL). The book traces the origin and development of India's missile related infrastructure and missiles till 1982 until Dr. Abdul Kalam arrived at the scene. The fascinating story has been narrated by the pioneers themselves and edited by Dr. Prahlada. The chapters contain descriptions of key infrastructure, key people, key programs like India's first Anti-Tank Missile, the Devil program, the Valiant Program and genesis of the Integrated Guided Missile Development Programme – IGMDP. The pioneers also describe the management practices developed and implemented to manage the complex programmes at shoe string budgets. Dr Prahlada is popularly known for his role as the Project Director for Akash SAM missile system. He has also been Program Director for India's SLBM K15, supersonic cruise missile Brahmos and has led the Integrated Guided Missile Development Program (IGMDP) as the Chairman of the Program Board. As the Director of DRDL he has initiated many new projects like Astra air to air missile system, Long Range Surface to air missile system for naval application, JV Project Brahmos Supersonic cruise missile system and hypersonic technology demonstrator. Since 1971 he has served in various ISRO and DRDO Establishments covering VSSC Trivandrum, ADE Bangalore and DRDL Hyderabad. His areas of interest cover aerodynamics, flight controls, guidance, propulsion, system design and system engineering, Project

Management, Research Management and Technology Management. He has been the President and Chairman of many organisations, Fellow of many professional bodies and has won a number of awards including Padma Shri.

Dangerous Flashpoints in East Asia: The Military Build-up Saghir Iqbal,2018-01-16 Major changes in East Asia have placed the region near the top of the World's strategic agenda. East Asia has until recently experienced the fastest regional economic growth rate in the world for many years. Economic co-operation has been flourishing and economic interests have become the major reason in reshaping East Asian international relations. However, there have also been changes in the security environment, due to many factors, such as the reduction of US forces in East Asia, the disintegration of the Soviet Union (the decline of the Soviet Union's presence in the region had led to renewed attention to traditional and potential rivalries among the major East Asian powers), and the concern of China's hegemonistic ambitions.

Debt Build-up in Frontier Low-Income Developing Countries (LIDCs) since 2012: Global or Country-specific Factors and Way Forward? Constance de Soyres,Anna Rogantini Picco,MissRanda Sab,2019-02-22 This paper focuses on the debt build-up that frontier low-income developing countries (LIDCs) have faced since 2012. First, it documents a 20-percentage point increase in the external and government debt-to-GDP ratios, a composition shift toward higher non-concessional debt, and a rise in interest rate payments. Second, using panel regressions, it shows that while both global and country-specific factors are correlated with debt-to-GDP ratios over 1998–2016, global factors dominate for the period 2012–16. Third, through a small open-economy model, it shows that the projected tightening in global financial conditions would reduce debt-to-GDP ratios by less than the increase associated with the expected rise in investment.

Why Humans Build Up Gregor Craigie,2022-09-13 ★“This great STEAM offering has multiple applications and will be useful for report writers and aspiring architects alike.”—Booklist, starred review ★“Finely detailed inside and outside...Broad in scope, perceptively organized, and enriched with fascinating entries.”—Kirkus Reviews, starred review Why did they build it so high? People have been constructing tall buildings for thousands of years, for many different reasons. Castle walls kept people safe. Utility towers transmit TV and cell-phone signals. Observatories give people a bird's-eye view of the world. Beautiful buildings stand out in the crowd. Skyscrapers provide housing for a lot of people. There are some good reasons for building up, and a few bad ones as well. With a growing global population, we will need more and more space to live, learn and work in. But what does that mean for the health of the planet? Can we do it sustainably? Tall buildings may be part of the answer. From the Great Pyramids of Giza and the Leaning Tower of Pisa to the Burj Khalifa and the Shanghai Tower, *Why Humans Build Up* asks why and how we build higher and higher, and what that means for the planet.

The Build-up William Carlos Williams,1968 *The Build-up*, Volume 3 of the Stecher Trilogy, picks up the thread of *White Mule* and *In the Money*. Although all of the novels deal with the triumphant rise of an immigrant family in the early 1900s, *The Build-up* is more concerned with the overwhelming drive and ambition of Joe Stecher's wife, Gurlie. After years of hard work, careful planning (and his wife's badgering) Joe's printing business is providing his family with a comfortable income. As soon as her financial goal is realized, Gurlie focuses her attention on another area. Her phenomenal energy is soon

earning her all unassailable position as a social leader in a small New Jersey suburb. Her achievement is not without its heartache, however. This story is told with all the gentle humor and exacting detail that mark Williams's prose works.

It's Your Ship Captain D. Michael Abrashoff, 2007-10-15 The legendary New York Times bestselling tale of top-down change for anyone trying to navigate today's uncertain business seas. When Captain Abrashoff took over as commander of USS Benfold, it was like a business that had all the latest technology but only some of the productivity. Knowing that responsibility for improving performance rested with him, he realized he had to improve his own leadership skills before he could improve his ship. Within months, he created a crew of confident and inspired problem-solvers eager to take the initiative and responsibility for their actions. The slogan on board became *It's your ship*, and Benfold was soon recognized far and wide as a model of naval efficiency. How did Abrashoff do it? Against the backdrop of today's United States Navy, Abrashoff shares his secrets of successful management including: See the ship through the eyes of the crew: By soliciting a sailor's suggestions, Abrashoff drastically reduced tedious chores that provided little additional value. Communicate, communicate, communicate: The more Abrashoff communicated the plan, the better the crew's performance. His crew eventually started calling him Megaphone Mike, since they heard from him so often. Create discipline by focusing on purpose: Discipline skyrocketed when Abrashoff's crew believed that what they were doing was important. Listen aggressively: After learning that many sailors wanted to use the GI Bill, Abrashoff brought a test official aboard the ship-and held the SATs forty miles off the Iraqi coast. From achieving amazing cost savings to winning the highest gunnery score in the Pacific Fleet, Captain Abrashoff's extraordinary campaign sent shock waves through the U.S. Navy. It can help you change the course of your ship, no matter where your business battles are fought.
