A British Rifleman – the Journals and Correspondence of Major George Simmons, Rifle Brigade, during the Peninsular war and the campaign of Waterloo Major George Simmons, 2011-02-08 The journals and correspondence of George Simmons add a further lustre to the excellent memoirs and books that men of the 95th Rifles left of the adventures, hard fought actions and grim experiences of the Peninsular War and the Waterloo Campaign. Simmons was commissioned into the 1st Battalion 95th Rifles, a fellow officer of Sir John Kincaid and Sir Harry Smith both of whom left valuable memoirs of the period. A religious and upright man, although not priggish, he kept a journal of the actions movement and events of his life and sent numerous letters home to his family in Hull. These form the narrative which has been ordered by Lt. Col. Verner to flow in sequence through his time fighting Napoleon's forces. Simmons, and his brothers who often crop up in the volume, was at the forefront of the fighting engaged in by the Light Brigade and later Light Division. He was wounded a number of times, once so seriously at Waterloo as a result of a musket wound to the chest, that his attendants thought he might die. He took part in the battles of Fuentes D'Oñoro, Salamanca, Vittoria, the Nivelles, Orthez and finally Waterloo. The storming of Badajoz, Ciudad Rodrigo are also described in vivid detail missing nothing of the fear, death and mayhem of the attacking troops; to give just one excerpt of the action:- I saw my poor friend Major O'Hare lying dead upon the breach. Two or three musket balls had passed through his breast. A gallant fellow, Sergeant Flemming, was also dead by his side, a man who had always been with him. I called to remembrance poor O'Hare's last words just before he marched off to lead the advance. He shook me by the hand saying, A Lieutenant-Colonel or cold meat in a few hours. I was now gazing upon his body lying stretched and naked amongst thousands more. An excellent read, contemporaneously written and abounding with interesting details. Author – Major George Simmons [1785-1858] Editor – Lt.-Col Willoughby Cole Verner [1852-1922]

Insuring the Industrial Revolution Robin Pearson, 2017-07-05 Fire had always been one of the greatest threats to an early modern British society that relied on the naked flame as the prime source of heating, lighting and cooking. Yet whilst the danger of fire had always been taken seriously, it was not until the start of the eighteenth century that a sophisticated system of insurance became widely available. Whilst a number of high profile fires during the seventeenth century had drawn attention to the economic havoc a major conflagration could wreak, it was not until the effects of sustained industrialization began to alter the economic and social balance of the nation, that fire insurance really took off as a concept. The culmination of ten years of research, this book is the definitive work on early British fire insurance. It also provides a foundation for future comparative international studies of this important financial service, and for a greater level of theorising by historians about the relationship between insurance, perceptions of risk, economic development and social change. Through a detailed study of the archives of nearly 50 English and Scottish insurance companies founded between 1696 and 1850 – virtually all the records currently available – together with the construction of many new datasets on output, performance and markets, this book presents one of the most comprehensive histories ever written of a financial service. As well as measuring the size, market structure and growth rate of insurance, and the extent to which the first industrial revolution was insured, it also demonstrates ways in which insurance can be linked into wider issues of economic and social change in Britain. These range from an examination of the joint-stock company form of organization – to an analysis of changing attitudes towards fire hazard during the course of the eighteenth century. The book concludes by emphasising the ambivalent character of fire insurance in eighteenth and early nineteenth century Britain, contrasting the industry's dynamic long-run rate of growth with its more conservative attitude to product design and diversification.

Millennials in America 2022 Robert Scardamalia, 2022-04-30 This completely updated fourth edition of Millennials in America provides a wide range of characteristics profiling the demographic, social, and economic status of the millennial generation. While the baby boom generation occupies much of our social and political dialogue, the millennial generation is actually a larger generation. As the boomers age, their numbers will decrease while the millennials will be the driving social and political force in the coming decades. Millennials in America focuses on the those born between 1982-2001. Millennials in America is an invaluable source for helping people understand what the census data tells us about who we are, what we do, and where we live. Benefits of this publication include: It will fill an information gap due to the difficulty in extracting comparative data from the Census Bureau's American FactFinder dissemination system. Users will have comparative data in a single reference volume. It will eliminate the need for the data user to understand and manipulate detailed census data files and consolidate disparate tables in AFF. This publication utilizes the PUMS data which is the ONLY source of data that can be used to define precise age ranges for the millennial generation. The age detail available for census summary data simply aren't adequate for defining the millennials and therefore prohibit compilation of characteristics specific to this important generation.

Aging in America Robert L. Scardamalia, 2016-08-30 Today, concerns about the financial stability of Social Security, trends in disability, health care costs, and the supply of caregivers are all driven by the coming explosion in the population of those over the age of 65. Aging in America focuses on the economic and demographic portrait of the senior population and can provide a context for analysis of broader population issues. It provides a range of characteristics of the older population including: age composition, race and Hispanic origin, educational attainment, living arrangements, veteran status, employment and income, health insurance, disability, and housing characteristics. Some of the benefits of Aging in America include: It provides a cross-section of socio-economic characteristics focused on the aging population for commonly researched geographic areas: states, counties, cities, metropolitan and micropolitan areas, and congressional districts. The tables are structured to allow easy comparisons across geographic areas and easy profiling of characteristics for any area of reader interest. This publication fills an information gap because of the difficulty in extracting comparative data from the Census Bureau's American FactFinder dissemination system. Users will have comparative data in a single reference volume.
