Galactic Pot-healer Philip K. Dick, 1994 What could an omnipresent and seemingly omnipotent entity want with a humble pot-healer? Or with the dozens of other odd creatures it has lured to Plowman's Planet? And if the Glimmung is a god, are its ends positive or malign? Combining quixotic adventure, spine-chilling horror, and deliriously paranoid theology, *Galactic Pot-Healer* is a uniquely Dickian voyage to alternate worlds of the imagination.

Harry Partch Bob Gilmore,1998-01-01 Visionary composer, theorist, and creator of musical instruments, Harry Partch (1901-1974) was a leading figure in the development of an indigenously American contemporary music. A pioneer in his explorations of new instruments and new tunings, Partch created multimedia theater works that combine sight and sound in a compelling synthesis. He is acknowledged as a major inspiration to postwar experimental composers as diverse as György Ligeti, Lou Harrison, Philip Glass, and Laurie Anderson, and his book *Genesis of a Music*, first published in 1949, is now considered a classic. This book is the first to tell the complete story of Partch's life and work. Drawing on interviews with many of Partch's associates and on the complete archives of the Harry Partch Estate, Bob Gilmore provides a full and sympathetic portrait of this extraordinary creative artist. He describes Partch's complicated relationships with friends, patrons, the musical establishment, and the world at large. He traces Partch's upbringing in the remote desert towns of the Southwest, his explosive encounter with formal music education in Los Angeles, and his revolutionary course as a composer that began with an interest in the musicality of speech patterns. After immersing himself in hobo subculture during the Depression, Partch came to occupy a lonely and uncompromising position as a cultural outsider. Richly fascinating in themselves, Partch's compositions, writings, and life also have much to reveal about American society and the creative impulses of the artistic avant-garde.

Affective Health and Masculinities in South Africa Hans Reihling,2020-04-03 Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act

between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

Moon-face and Other Stories Jack London, 1906 JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. The son of the Wolf (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, The Call of the Wild (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including The Sea-Wolf (1904), White Fang (1906), South Sea Tales (1911), and Jerry of the South Seas (1917). One of London's most interesting novels is the semi-autobiographical Martin Eden (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.
