Minicars, Maglevs, and Mopeds Selima Sultana,Joe Weber,2016-04-18 This book provides a fascinating look at the amazing diversity of forms of travel and transport around the world today in the context of cultures, politics, economics, and environment of a place. Across the timeline of human history, transportation has played a role in the migration of people and information, nation-building, economic development, environmental alteration, access to and the use of resources, and even the fall of civilizations. This single-volume reference presents more than 150 entries that describe the most up-to-date surface transport technologies and routes in use on every continent, including a broad range of road vehicles, railroads, person-powered vehicles, and even animals used for transportation. The book melds transportation geography with culture, politics, economics, and environment of place in its coverage of vehicles, transportation technologies, and some of the most famous streets, rail systems, and highways from around the world. The entries are written by transport geography scholars to be accessible to general readers without technical backgrounds. Each entry incorporates cross references that allow readers to easily find related entries, making the book ideal for conducting specific research or completing school projects.

Urban Air Pollution in Asian Cities Dieter Schwela,Gary Haq,Cornie Huizenga,Wha-Jin Han,Herbert Fabian,May Ajero.,2012-05-16 Air pollution has become part of the daily existence of many people who work, live and use the streets in Asian cities. Each day millions of city dwellers breathe air polluted with concentrations of chemicals, smoke and particles that dramatically exceed World Health Organization guideline values. Deteriorating air quality has resulted in significant impacts on human health and environment in Asia. This book provides a comprehensive and comparative assessment of the current status and challenges in urban air pollution management in 20 cities in the Asian region. It examines the effects on human health and the environment and future implications for planning, transport and energy sectors. National and local governments have begun to develop air quality management strategies to address the deterioration in urban air quality; however, the scope and effectiveness of such strategies vary widely. This book benchmarks these air quality management strategies, examines successes and failures in these cities and presents strategies for improving air quality management in cities across Asia and the rest of our rapidly urbanizing world. Information on air quality in Asia is clearly presented with easy-to-read city profiles, tables and graphs. This is an essential resource for all those concerned with urban air quality management, not just in Asia but in cities across our rapidly urbanizing world. Cities covered Bangkok, Beijing, Busan, Colombo, Dhaka, Hanoi, Ho Chi Minh City, Hong Kong, Jakarta, Kathmandu, Kolkata, Metro Manila, Mumbai, New Delhi, Seoul, Shanghai, Singapore, Surabaya, Taipei and Tokyo

Tourism and Regional Science Soushi Suzuki,Karima Kourtit,Peter Nijkamp,2021-07-27 This book provides new roads, perspectives, and a synthesis for tourism and regional science research. Tourism has become one of the most dynamic sectors in the economy and has exhibited a structurally growing importance over the past decades. In many countries the economic significance of tourism now exceeds that of traditionally strong sectors like agriculture or transportation. It is noteworthy that in recent times, tourism research has gained great momentum from the perspective of: the leisure society; the psychological tension between hard work and a more relaxed lifestyle; and the productivity-enhancing or productivity-diminishing effects of leisure, recreation, and tourism. An abundance of new literature in the field of tourism management can also be found, for instance, in the areas of hospitality management, cultural events management, destination competitiveness policy and marketing, and transportation and logistics strategies, while much attention is also being paid to the opportunities provided by digital technology for the tourism sector. In addition, in the light of the many negative externalities of a rapidly growing tourism sector, there is also an abundant literature on the environmental and sustainability effects of tourism. This book has the following objectives: to explore the interwoven connection between regional science and tourism research; to suggest promising pathways for innovative regional science research at the interface of tourism and space; and to demonstrate the need for a new perspective on the tourism and regional science nexus by means of empirical studies.

Biological Effects by Organotins Toshihiro Horiguchi,2016-12-07 This book provides an overview of the induction mechanism of imposex caused by organotin compounds in gastropods, as well as fundamental information on the physiology and biochemistry of reproduction in mollusks. Are the sex hormones of gastropod mollusks vertebrate-type steroids, or neuropeptides? What about lipid disturbance and membrane toxicity due to organotin

compounds? The book also discusses the latest findings on the role of nuclear receptors, such as retinoid X receptor (RXR), retinoic acid receptor (RAR) and peroxisome proliferator-activated receptor (PPAR), in the development of imposex in gastropods. Further, it describes the current state of contamination by organotins in the marine environment and gastropod imposex, with a special focus on Europe and Asia, introduces readers to analytical techniques for organotin compounds, and assesses the contamination and adverse effects of alternatives to organotin-based antifouling paints. Imposex, a superimposition of male genital tracts, such as penis and vas deferens, on female gastropod mollusks, is known as a typical phenomenon or consequence of endocrine disruption in wildlife. Imposex is typically induced by very low concentrations of organotin compounds, such as tributyltin (TBT) and triphenyltin (TPhT) from antifouling paints on ships and fishing nets. Reproductive failure may be brought about in severely affected stages of imposex, resulting in population decline and/or mass extinction. Thus, gastropod imposex has been recognized as a critical environmental pollution issue. Although gastropod imposex is also highly interesting for the biological sciences because of its acquired pseudohermaphroditism and/or sex change by certain chemicals, such as TBT and TPhT, the mechanism that induces the development of imposex remains unclear, possibly due to our limited understanding of the endocrinology of gastropod mollusks. This book offers a useful guide for professionals and students interested in the fields of aquatic biology, invertebrate physiology, ecotoxicology and environmental science.

Collaborative Regional Development in Northeast Asia Won Bae Kim,Yue-man Yeung,Sang-Chuel Choe,2011-07-18 Against the background of accelerating globalization and growing economic interdependence in Northeast Asia over the past two decades, including the recent global economic crisis, this book sets out to examine the status and prospect of cross-border cooperation. It has synthesized diverse strands of discussion and different country perspectives to highlight the challenges and opportunities of collaborative regional development in Northeast Asia. Distinct from previous studies, this book attempts to capture international, national, and local viewpoints in regional development. Practical experience across countries has been analyzed and consolidated to form the basis of a policy agenda for cross-border cooperation. Combining an intimate knowledge of the region and different disciplinary perspectives, this book offers a wealth of information, statistical and illustrative materials, and analyses across topics and countries of the region. Editors include Won Bae Kim, Research Advisor of the Gyeonggi Research Institute and former Senior Fellow at the Korean Research Institute for Human Settlements, Yue-man Yeung, Emeritus Professor of Geography and Honorary Fellow of The Chinese University of Hong Kong, and Sang- Chuel Choe, former Chairman of the Presidential Committee on Regional Development in South Korea and Professor Emeritus of Seoul National University.

Sport in Korea Dae Hee Kwak,Yong Jae Ko,Inkyu Kang,Mark Rosentraub,2017-07-28 Korea has become a powerful force in global sport, with South Korea finishing fifth in the medals table at London 2012 and hosting the Winter Olympics in 2018. This book brings together scholars from disciplines including sport history, sociology, journalism, economics, sport development, and sport management to explore the significance of sport in contemporary Korea. Presenting a variety of international perspectives, it plots the dynamic evolution of sport in Korea and envisions the possibilities for its future. Each chapter focuses on a key topic of current relevance, such as sport in the context of shifting relations between North and South Korea, or the role of sport in the expression of Korean nationalism. Arguing that individuals, institutions, businesses, and governments have actively leveraged or exploited sport to influence developments in various social, economic, cultural, and political arenas, this book sheds new light on the importance of sport as a catalyst for change in Korea. This is indispensable reading for any student or scholar with an interest in sport, history, and culture in Korea.

City, State Ran Hirschl,2020-06-12 More than half of the world's population lives in cities; by 2050, it will be more than three quarters. Projections suggest that megacities of 50 million or even 100 million inhabitants will emerge by the end of the century, mostly in the Global South. This shift marks a major and unprecedented transformation of the organization of society, both spatially and geopolitically. Our constitutional institutions and imagination, however, have failed to keep pace with this new reality. Cities have remained virtually absent from constitutional law and constitutional thought, not to mention from comparative constitutional studies more generally. As the world is urbanizing at an extraordinary rate, this book argues, new thinking about constitutionalism and urbanization is desperately needed. In six chapters, the book considers the reasons for the constitutional blind spot concerning the metropolis, probes the constitutional relationship between states and (mega)cities worldwide, examines patterns of constitutional change and stalemate in city status, and aims to carve a new place for the city in constitutional thought, constitutional law and constitutional practice.

OECD Urban Studies Improving Transport Planning for Accessible Cities OECD,2020-12-11 Cities are places of opportunity. They provide not just jobs but a whole range of public, cultural, social and consumption amenities. Transport is what connects people to these opportunities and cities provide access with varying degrees of success – especially when it comes to modes of transport that favour a green transition. This report argues that building sustainable transport networks for accessible cities requires a holistic planning approach, a sound institutional framework, reliable sources of funding, strong governmental capacity, and should build on community engagement.
