International Tax Glossary Susan M. Lyons, International Bureau of Fiscal Documentation, 1996 The IBFD International Tax Glossary is currently in its third, revised edition. Since the first edition was published on the occasion of the IBFD's 50th anniversary in 1988, this definitive & authoritative desk reference has been continuously expanded & updated to reflect the changes taking place in international tax & investment. The International Tax Glossary provides the broadest possible coverage of the language of taxation. The first part of this book gives clear, concise definitions in English of more than 2,000 tax terms. The second part gives an alphabetical listing of 400 English terms from the first part of the book with their French, German & Spanish equivalents. Naturally, the International Tax Glossary provides accurate descriptions of all those traditional terms that confuse those new to or unfamiliar with tax. However, it also looks at the more exotic terms that leave even those with many years of experience in the profession guessing about their exact meaning, such as: * Bed & Breakfasting, the practice of selling shares late in the day & repurchasing them the next day in order to establish a loss or to offset a capital gain * Wash Sale, a tax avoidance device whereby a person claims a loss on the sale of securities but has in fact acquired (or contracted to do so) substantially similar or identical securities * Olim, an Israeli term for new immigrants who are given various tax benefits * Rort, an Australian term denoting the deliberate & blatant exploitation of an opportunity in an improper, if not technically illegal, manner * Alcabala, an old Spanish turnover tax levied on the sales price or exchange value of tangible property The listing of terms with their subscriptions is extensively cross-referenced indicating similar or related terms as well as contrasting terms.

Behavioral Finance: The Second Generation Meir Statman, 2019-12-02 Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants—restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational"—succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second

generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.

The Encyclopaedia Britannica Hugh Chisholm, 1911

Introductory Grammar of Amharic Wolf Leslau, 2000 This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's *Traite de langue amharique* (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language. The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

Makers and Takers Rana Foroohar, 2017-09-12 Is Wall Street bad for Main Street America? A well-told exploration of why our current economy is leaving too many behind. —The New York Times In looking at the forces that shaped the 2016 presidential election, one thing is clear: much of the population believes that our economic system is rigged to enrich the privileged elites at the expense of hard-working Americans. This is a belief held equally on both sides of political spectrum, and it seems only to be gaining momentum. A key reason, says Financial Times columnist Rana Foroohar, is the fact that Wall Street is no longer supporting Main Street businesses that create the jobs for the middle and working class. She draws on in-depth reporting and interviews at the highest rungs of business and government to show how the “financialization of America”—the phenomenon by which finance and its way of thinking have come to dominate every corner of business—is threatening the American Dream. Now updated with new material explaining how our corrupted financial system propelled Donald Trump to power, *Makers and Takers* explores the confluence of forces that has led American

businesses to favor balance-sheet engineering over the actual kind, greed over growth, and short-term profits over putting people to work. From the cozy relationship between Wall Street and Washington, to a tax code designed to benefit wealthy individuals and corporations, to forty years of bad policy decisions, she shows why so many Americans have lost trust in the system, and why it matters urgently to us all. Through colorful stories of both “Takers,” those stifling job creation while lining their own pockets, and “Makers,” businesses serving the real economy, Foroohar shows how we can reverse these trends for a better path forward.
