The Business Idea Soren Hougaard,2006-03-20 Successful business ideas are not so much about talent as about a systematic approach. The Business Idea encourages new ways of thinking when it comes to entrepreneurship and innovation. Too many ventures originate in the solutions the entrepreneur has to offer and not in the problem the customer needs solved. Business plans done this way can often lead to disappointment. The Business Idea leaves behind this product orientated logic. The book presents new, applicable entrepreneurship methods for developing creative market insight, for identifying windows of opportunity, creating business concepts and entrepreneurial strategies for successful market entry. Entrepreneurship is a complex and risky process compared to almost everything else in business life, so it richly deserves to have its own theoretical and methodological toolbox. The Business Idea provides the tools making it of interest to anyone who works with getting an enterprise off the ground or studies entrepreneurship.

Business & Start-Up Ideas Alex Genadinik, 2014-01-19 This is the most comprehensive guide on going from business ideas to starting a business because the book is based on research of 300,000 entrepreneurs just like you! Prior to writing the book, I observed the experiences of 300,000 entrepreneurs who used my Problemio business apps to start a business. I personally talked to and helped over 1,000 entrepreneurs right on the apps or in my business coaching practice. This gave me a great understanding of what entrepreneurs go through. This book will help you by giving you step by step advice on almost every step you must take as you go from business ideas to eventually start your business. In my research, I noted every question entrepreneurs ever asked (my apps allow entrepreneurs to ask me questions) as they were going from business ideas and starting their businesses. I grouped those questions into general topics and subtopics. Those topics and subtopics became the chapters and subchapters of this book. The book starts by covering business idea fundamentals such as: - How to get business ideas - How to protect business ideas, and whether you should protect business ideas - How to determine if a business idea is good - What to do if you have too many business ideas and can't decide which one is best - What next steps to take after you gave a great startup idea The book also teaches you about options to help you protect your business ideas and your intellectual property with: - Trademarks - Patents - Copyrights - Non-disclosure agreements (NDA) - Non-compete agreements After that the book teaches you about business planning and strategy topics such as: - How to write a business plan for your idea - How to incorporate great business strategy into your overall business model - Different revenue streams for your business to help you understand where your business might make the most money After that the book helps you understand how to start the business and covers: - Business registration and when to register a nonprofit and a for profit - How to start your business with solid fundamentals by learning from the methodologies business leaders like Eric Ries (Learn Start-up) and Steve Blank (Customer Development Methodology) - How to choose a good business name - How to cheaply create a website and start operating online The book also teaches you ways to raise money with: - Donations via crowdfunding - Loans - Grants - Investments - Other creative strategies Once you have solid business idea fundamentals, the book guides you through how to write a business plan for your business idea, and eventually the book covers the necessary steps, theories and methodologies to start your business. How to Validate Your Startup Business Idea Ravi Kikan,2018-10-22 Many startups and entrepreneurs fail because they do not validate their startup business idea. I run some of the largest startup communities on LinkedIn. One of the largest communities that I moderate and engage on LinkedIn has around 300,000 global members including startups, venture capitalists, entrepreneurs, mentors and global experts. With my own experience of working with many startups, entrepreneurs, corporates and my regular interactions with successful business ventures I have understood the importance of validating your startup business idea before launching your product or services in the market. In this book not only have I collected my thoughts and experiences for validating a business idea but I have reached out to many experts globally to understand how to validate a business idea before going all out and launching your own business. Who Is This Book For ? It is extremely important that you validate your startup business idea in the market if you are a wannabe entrepreneur, a student, homemaker, professional, expert or anyone who is trying to launch a startup business This is extremely important for you to understand this right from the ideation stage itself. Sometimes in the enlightenment of the business idea or in the haste of getting things done faster with shortcuts (Howsoever the idea might be great), we end up doing the following: 1. We forget the simple basics 2. We tend to overlook similar experiences 3. We do not take stable advises 4. We rush into getting things done faster 5. We often get misguided 6. We overlook readily available data 7. We sometimes ONLY look at money and not the business process 8. We don't validate things before going all out Why This Book? Time and again I have seen my friends, colleagues, students, awesome entrepreneurs, startups (including myself) getting into a new business without validating their startup business idea. This often has led to extremely disastrous and sometimes fatal outcomes. Lot of things get on stake when you risk getting into a new business e.g. you risk your time, money, resources, relationships, career etc Never hurry into things. Always validate things from a rational and practical perspective. This will give you depth, more understanding and a far clear picture of how, when, where and what to do while going ahead into a new venture This book is a step to overcome all those hassles and validate your awesome business idea. A huge thanks to all these awesome global experts, entrepreneurs who have also contributed their ideas with me on the topic: Tina Zurbi, Sandeep Balaji, Neeraj Saini, Praval Kant, Dr Aniruddha Malpani, Joseph Roos, Avigail Berg, Diana Palchik, Dr Rajeev Tewari, Patrick Osman, Tishana Simon, Dr Pranab Sen, Nitin Jain, Ed Zimmer, Andrea Sica, Zile Soilihi, Jeffrey Hilton, Guy Cleveland, Richard Coleness, Tabitha Jean Taylor, Andrew MacWhirter, Matt Kurlito, Daniel Leping I would also love to hear from you once you have read this book on your experiences and how you have dealt with validating your own startup business idea. Business Idea Fundamentals James David Rockefeller,2017-11-04 Most people today are walking around mindlessly, asking other people for good business ideas. Successful business ideas are often formulated on the back of due diligence and serve many people who are looking for solutions to similar problems. Too many individuals are following the crowd into densely populated niches where they will find only fierce competition, because many businesses have already successfully established their credibility there. Frequently, this can make the situation difficult for a new start-up business, because they may have to adjust their prices to compete with other businesses within their niche. If you are looking for business ideas, the best recommendation is for you to look around for a problem. This means looking for groups of people who share the same problem or have a specific need. Your opportunity, then, is to find a solution to the problem and turn it into a product or service that will be effective in serving these people. Your business ideas must aim to give your customers as much value as possible and keep them happy. Your role is to create anticipation, which will bring them in and keep them coming back for more. Once you have them in the front door, keep them inside by giving them as much value as possible. Be sure to keep a database of contact details, so that you can provide them with any updates you need to release to your customers. E-mail is preferred because there are no costs associated with sending out emails, and it is a simple way to get the message out to many of your customers from the push of a button. Remember, the best business ideas are founded on a solution that solves people's specific needs. If you are looking to start a business in an already populated niche, make sure you think of ways to differentiate your business from the crowd. Give your clients more value for their time and dollars. A very important tip that I would highly suggest you take into consideration is giving away as much free value as possible. Find a way to give as much free and valuable content to your customers as you can. This will help you in becoming an authority and in building greater credibility/trust with your customers. The rise of the internet bears witness to the quote made famous by Bill Gates - Content is King. Content is now cash and any ability your business has to give away free content will benefit your business financially.
