Contemporary Logistics in China Bing-lian Liu, Shao-ju Lee, Ling Wang, Ya Xu, Xiang Li, 2014-06-20 This book gives a systematic exposition of China's logistics development to the English-reading community. The ultimate goal of the book is to present a timely portrayal of China's logistics market growth and the evolution status of China's logistics industry. Being the fourth volume of the "Contemporary Logistics in China", the book strives to offer in-depth analysis on some hot issues and dilemmas amid the on going dynamic and multi-faceted development and also a source of reference for interested readers in academic and professional fields.

Integrated Vehicle Health Management Ian K Jennions, 2012-11-12 Following the best seller, Integrated Vehicle Health Management: Perspectives on an Emerging Field, the new title Integrated Vehicle Health Management: The Business Case Theory and Practice takes the subject to the next level. This time it addresses the commercial justification for the adoption of a new modus operandi in asset health management, and its impact on business strategy and servitization of technology. Edited by Dr. Ian Jennions, Director of the IVHM Center at Cranfield University in the U.K., the book tackles the most important questions on the transformation of business from selling a product, and deriving future income from spare part sales, to selling a service in which income is received in return for effective maintenance of the asset. The resulting service business requires a much

deeper understanding of how the product is used and should be maintained, thus providing the rationale for Integrated Vehicle Health Management- IVHM. Chapter highlights include: -How to calculate the return on investment of an IVHM system -How real options can be used for decision making -How the availability of prognostic information affects maintenance -The business potential of structural health monitoring in aeronautics Integrated Vehicle Health Management: The Business Case Theory and Practice includes interviews with manufacturers and suppliers on how they are marketing one-of-a-kind services, and opening up new and sustainable revenue streams. Case studies are also introduced to demonstrate the real value of condition-based maintenance, the advantage of cost avoidance and risk mitigation for high-value assets. The objective is to provide the tools and techniques for constructing a business case while also providing some of the context in which these variables are framed. Directed at industry professionals as well as researchers and students, Integrated Vehicle Health Management: The Business Case Theory and Practice fills an important gap in this emerging body of knowledge which unites the technical and the business aspects of a paradigm shift.

Integrated Product and Process Design and Development Edward B. Magrab, 1997-07-23 The Integrated Product and Process Design and Development (IP2D2) method is quickly becoming the new standard for the rapid creation of competitively priced, high-quality products. IP2D2 indicates, in the broadest sense, the overlapping, interacting, and iterative nature of all of the aspects of the product realization process. The method is a continuous process whereby a product's cost, performance and features, value, and time-to-market lead to a company's increased profitability and market share. This new text/reference reflects the sweeping changes this approach has brought to

traditional engineering design courses and to industry. Carefully organized, with sections on each major stage of the approach, Integrated Product and Process Design and Development: The Product Realization Process is the first complete treatment of this new direction in engineering. The book is designed to help you cultivate an attitude toward design that encourages creativity and innovation, while considering the equally important considerations of customer requirements and satisfaction, quality, reliability, manufacturing methods and material selection, assembly, cost, the environment, and scheduling. Extensively class tested in senior- and graduate-level engineering design courses at the University of Maryland, the book gives equal time to conceptual and practical aspects. As each concept is introduced and explained, two book-long examples provide you with a realistic sense of how a product's creation progresses through its various stages. Numerous checklists and other practical guidelines help you learn to apply the IP2D2 method to your own work. Students and newly graduated engineers will appreciate the modern perspective that more nearly reflects what they will encounter in practice than what is obtainable in traditional texts. For more experienced practicing engineers, this is the new information they need to keep up with recent rapid changes and stay marketable today and in the future.

**Organizational Integration of Enterprise Systems and Resources:
Advancements and Applications** Varajão, João Eduardo Quintela Alves de

Sousa,2012-06-30 The topic of Enterprise Information Systems (EIS) is having an increasingly relevant strategic impact on global business and the world economy, and organizations are undergoing hard investments in search of the rewarding benefits of efficiency and effectiveness that these ranges of solutions promise. Organizational Integration of Enterprise Systems and Resources: Advancements and Applications show that EIS are at the same time responsible for tremendous gains in some companies and tremendous losses in others. Therefore, their adoption should be carefully planned and managed. This title highlights new ways to identify opportunities and overtake trends and challenges of EIS selection, adoption, and exploitation as it is filled with models, solutions, tools, and case studies. The book provides researchers, scholars, and professionals with some of the most advanced research, solutions, and discussions of Enterprise Information Systems design, implementation, and management.

Freight Broker Business Startup 2023 Alexander Sutton,2022-10-31 No matter how little you know about freight brokerage right now, you can single-handedly build the foundations of a booming business. Ready? Then read on... Between now and 2025, the freight brokerage market is expected to grow by a staggering \$41.6 billion. The shipping industry has been going strong for

almost 5,000 years, and together with the transportation industry, it has shaped our whole world. Think of a product, and you can bet your bottom dollar that it (and the materials used to make it) has been shipped – often internationally. Shipping and transportation aren't going anywhere – these are industries that will always need workers, and as the market grows, getting in on it comes with the potential for serious money. While many of the most well-known roles in the industry require rigorous training and carefully practiced skills, there's one central role in the whole operation that requires no specialist training or formal education: a freight broker. As a freight broker, you can run a lucrative business that serves as the essential middleman between shipping companies and merchandisers. You can snag yourself a big slice of the shipping pie, simply by becoming that middleman. And while that might sound daunting at the moment, all you need is clear and straightforward guidance to the whole process... and that's exactly what you'll find in this book. Inside, you'll discover: - How to start your own freight broker business in 10 manageable steps (with a clear overview of each one before you get stuck in) - Everything you need to know about the shipping and trucking industries (and why you need this essential information) - The fundamentals of the freight brokerage business – lay a solid foundation before you begin building your startup - The rich history of freight brokerage (simplified) – because the more you understand the background, the more successful your business will be - Insider tips from the

most successful freight brokers – bring your business up to their level immediately - The top mistakes that have proved to be the downfall of other freight brokers – and how you can make sure you never make them - 6 specific challenges your business will face (with the secrets to navigating them) - Legal considerations and licenses you need to be aware of from Day 1 - The best training you can give yourself before you break into the industry... and how to find it - The nuts and bolts of setting up a successful business – everything from your business plan... to financing... to marketing (freight-brokerage-specific details included) - All your questions preempted... and answered in detail And much more. Freight brokerage is a highly lucrative industry... as long as your business is built on sturdy foundations. No matter how little you know right now, you can lay those foundations with confidence, and launch yourself into an exciting future. If you want in on one of the oldest and most successful industries in the world, scroll up and click Buy Now right now.

Enterprise Innovation Ecosystem Jin Chen,2023-09-19 This book targets the

key issues of both research and practice in innovation and strategic management fields and is regarded as one of the important works explaining enterprises from the innovation system perspective. The book is based on the existing literature involving national innovation system, regional innovation system, and industrial/sectional innovation system and reviews intra-organizational innovation system researches and inter-organizational innovation ecosystem literature. Accordingly, the book proposes a “core competence-based innovation ecosystem framework”, indicating the importance of fit between firms' internal core competence and external innovation ecosystem, which is pivotal for leveraging the sustainable competitiveness advantages. In addition, the book further adopts multiple case studies, involving the firms' innovation ecosystems upon ten typical global enterprises in and out of China – e.g., Apple Inc., Siemens, Procter & Gamble, Microsoft Corporation, Google, Founder Group, Haier Group, China South Railway, Huawei, and Midea. Teachers and researchers from universities in innovation and strategic management fields and industrial management practitioners can benefit from the book.

Mr. Stimson led the firm through its initial growth and established it as a leading provider to startups and small companies in the New England region. After QLFS, Mr. Stimson launched Trucking Capital LLC to provide services in the USA, Canada and Australia. Under his leadership, Trucking Capital LLC has expanded to offer a number of business finance products and can help companies in most industries. Trucking Capital LLC is one of the few companies that offers micro-factoring (also called small-ticket factoring), which helps early-stage companies with limited revenues. Small business factoring has been ignored by larger factoring firms and banks, establishing Mr. Terry as a pioneer in this market. Before starting

his career in finance, Mr. Stimson held several management positions in operations and marketing in the telecommunications industry for eight years. He earned a Master's Degree in Finance with a concentration in banking. HowExpert publishes quick 'how to' guides on all topics from A to Z by everyday experts.

M&A Integration Danny A. Davis, 2012-10-29 Most firms of a certain size will turn to Mergers & Acquisitions in their search for growth, forcing almost all managers to face up to the challenge of integration at some point in their career. For many managers it is often their first and only time, and M&A integration is high on the list of things that many managers need to learn more about. According to many studies, 50 to 75% M&A transactions fail to deliver their expected value. One of the main reasons for failure is late or wrong integration, or bad integration management. There is a significant demand for more information on best practice in Post-Merger Integration. This book intends to equip those managers for the task... Danny A. Davis demonstrates how to handle the post-merger integration process and show how to restructure, consolidate, reduce costs, create efficiencies and perform M&A, from smaller transactions to mega-mergers. The focus is on integration planning and delivery. The book combines a general/strategic view with detailed information on how to actually conduct M&A Integration via very practical tools and check lists that will prove essential during pre-deal M&A integration planning and Post deal delivery, as well as to ensure their

success.

Freight Broker Business Startup 2021-2022 Clement Harrison, 2021-01-10
Become Part of a Champion Industry that Overpowers Even the Toughest Economic Crises. Take a minute of your time, and look around you. Notice the furniture, gadgets, books, and all the other stuff you have lying around your home or office. Chances are, the majority of those items came to you by truck. E-commerce has changed the way we buy and sell things, especially in the light of current global events. This, in turn, has created a huge, global demand for transport carriers, especially motor carriers. The trucking industry has been flourishing and growing for some time now, and it will continue to do so, according to a market research report from Technavio. They predict that the global market size will reach an impressive \$41.47 billion by 2024. This extremely favorable forecast provides a fantastic opportunity for those who wish to become a part of this lucrative industry. Large trucking companies own a significant portion of that cake, but a huge amount of transport in the US is handled by freight brokers. In fact, the demand for these cargo intermediaries has risen exponentially throughout 2020, and market analysis shows that this is the perfect time to break into a freight industry. But there is a catch. Many have already recognized this amazing opportunity, and the number of independent freight brokers is increasing. Luckily, the market is so huge that there's enough room for more, but competition is a factor that needs to be considered. This is why those who

are considering to venture into the freight broker industry need to tread carefully, and take certain steps to ensure not only a great start to their business, but the potential to grow and expand. In Freight Broker Business Startup 2021, you will discover: Bulletproof freight brokerage business strategies, modeled after the latest market and industry analysis Detailed instructions for finding a profitable niche and conducting micro marketing for generating maximum profit A comprehensive guide through start-up costs and expenses, to help you invest your money smartly, and avoid unnecessary expenses How a bad business plan (or lack of it) can make your business fail before it even starts -- and a simple, effective template for writing one Helpful and proven tips and advice for finding customers -- shippers and carriers, and establishing a pool of long-term, steady clients A list of every form and license you'll need to obtain to start this business, including a guide through the best current Transportation Management System softwares Marketing strategies and networking tools, to help you understand exactly what your customers want, and how to provide it And much more. What makes the freight broker industry so desirable is its simplicity. No matter your background, education, or experience, you can succeed in this market and create a profitable business from scratch. Integrated Product, Process and Enterprise Design Ben Wang, 1997-08-31 The

need exists in the private sector and government manufacturing sites to reduce product development time, production lead times, inventory, and non-value added activities. At the same time, there is increased pressure to improve manufacturing process yields, production efficiency, and resource utilization. Much of the technology required to meet these needs already exists, but an integrated structure that can demonstrate the potential for the technology in a concurrent engineering context does not. This book provides a road map for building the integrated technology environment to evaluate existing products, manufacturing processes and system design tools. This book details innovative approaches that will significantly improve design/manufacturing technology development and deployment capabilities for civilian and defense applications. These approaches are integrated product, process, and system design (IPPSD) initiatives which will greatly enhance the manufacturing competitiveness of the economy. These approaches involve the use of simulation, modeling tools and computerized virtual workstations in conjunction with a design environment which allows a diverse group of researchers, manufacturers, and suppliers to work within a comprehensive network of shared knowledge. The IPPSD infrastructure consists of virtual workstations, servers and a suite of simulation, quantitative, computational, analytical, experimental and qualitative tools. Such an IPPSD infrastructure will permit effective and efficient predictions of complete product design, manufacturing process design, and customer satisfaction.

Life Cycle Analysis and Assessment in Civil Engineering: Towards an Integrated Vision Robby Caspeele, Luc Taerwe, Dan M. Frangopol, 2018-10-31 This volume contains the papers presented at IALCCE2018, the Sixth International Symposium on Life-Cycle Civil Engineering (IALCCE2018), held in Ghent, Belgium, October 28-31, 2018. It consists of a book of extended abstracts and a USB device with full papers including the Fazlur R. Khan lecture, 8 keynote lectures, and 390 technical papers from all over the world. Contributions relate to design, inspection, assessment, maintenance or optimization in the framework of life-cycle analysis of civil engineering structures and infrastructure systems. Life-cycle aspects that are developed and discussed range from structural safety and durability to sustainability, serviceability, robustness and resilience. Applications relate to buildings, bridges and viaducts, highways and runways, tunnels and underground

structures, off-shore and marine structures, dams and hydraulic structures, prefabricated design, infrastructure systems, etc. During the IALCCE2018 conference a particular focus is put on the cross-fertilization between different sub-areas of expertise and the development of an overall vision for life-cycle analysis in civil engineering. The aim of the editors is to provide a valuable source of cutting edge information for anyone interested in life-cycle analysis and assessment in civil engineering, including researchers, practising engineers, consultants, contractors, decision makers and representatives from local authorities.
