Washington: Lessons in Leadership Gerald M. Carbone,2011-03-15 A compelling look at the military career, lessons, and legacy of America's first general and first president. Before he became the Father of our Country, George Washington was the Father of the American Army. He took troops that had no experience, no tradition, and no training, and fought a protracted war against the best, most disciplined force in the world—the British Army. Deftly handling the political realm, he left his mark with a vision of the Revolution as a war of attrition and his offensives which were as brilliant as they were unpredictable. In Washington, award-winning author Gerald M. Carbone argues that it is this sort of fearless but not reckless, spontaneous but calculated offensive that Washington should be remembered for—as a leader not of infallibility but of greatness.

The Perfect Birthday Recipe Katy Hudson,2020 Beaver's friends insist on baking him a birthday cake, but Beaver, the ultimate perfectionist, would rather do it himself, and in doing so realizes perfection does not necessarily mean perfect.

The Human Tradition in Imperial Russia Christine D. Worobec,2009-01-16 This compelling set of essays presents richly human stories of individual and group experiences, as well as of key events in the history of Imperial Russia. Beginning with Peter I's dress reforms in the early eighteenth century and concluding with poets arising out of a stratified and largely urban working class between the revolutions of 1905 and 1917, the essays introduce readers to many of the major changes in Imperial Russian history and their consequences. We see the effects of reforms; the consequences of an economy and society built on serfdom; as well as the development of a civil society, the woman question, urbanization, secularization, and modernity. At the same time, the contributors' nuanced reconstruction of personal and group histories provides important correctives to the traditional grand narratives of Russian history. These microhistories reveal individuals' daily negotiations with authority figures, be they government officials, religious leaders, individuals of another class, or even members of their own class. As this book vividly shows, individuals, groups,

and events raised out of obscurity remind us of the messiness of everyday life; of people's dreams, frustrations, and transformations; as well as of their sense of self and the community around them. Contributions by: Rodney D. Bohac, Barbara Alpern Engel, ChaeRan Y. Freeze, William B. Husband, Laura L. Phillips, David L. Ransel, Christine Ruane, Rochelle G. Ruthchild, Rebecca Spagnolo, Mark D. Steinberg, Elise Kimerling Wirtschafter, and Christine D. Worobec

The book is divided into 35 lessons, each lesson consisting of a word cluster. Each cluster contains words that have similar meanings or apply to similar circumstances. For instance, students encounter the words conciliate, mediate, and mitigate, and learn how they have different meanings that can sometimes be confused. A review exercise follows every five lessons with questions that closely reflect those found on the actual SAT.

The Rise and Fall of Television Journalism Steven Barnett, 2011-11-08 This book traces the history of television journalism in Britain from its austere roots in the BBC's post-war monopoly to the present-day plethora of 24 hour channels and celebrity presenters. It asks why a medium whose thirst for pictures, personalities and drama makes it, some believe, intrinsically unsuitable for serious journalism should remain in the internet age the most influential purveyor of news. Barnett compares the two very different trajectories of television journalism in Britain and the US, arguing that from the outset a rigorous statutory and regulatory framework rooted in a belief about the democratic value of the medium created and sustained a culture of serious, responsible, accurate and interrogative journalism in British television. The book's overarching thesis is that, despite a very different set of historical, regulatory and institutional practices, there is a very real danger that Britain is now heading down the same road as America.

Presentation Skills for Quivering Wrecks Bob Etherington, 2018-02-15 Spiders, death, dentists, snakes and flying are in the list of the top ten fears of businesspeople (Book of List). But the top position is held by “public speaking”. So great is this fear that most businesspeople have a single objective: to get off the platform as soon as possible. This book, based on a hugely successful course given to thousands of businesspeople, shows how anyone can speak with confidence to an audience of any size. Laced with humour and wit, the author emphasizes that you don't have to be a brilliant orator to be an effective speaker in business. Simply being good is plenty, because 95% of all business presenters are so awful! 10 reasons you must buy this book and avoid “death by slide-show”! 1. Most business audiences have a single objective: to get out of the room. 2. Most business presenters have a single objective: to sit down in the audience again. 3. Most corporate audiences

can't remember, 24 hours later, what was presented, the title of the presentation or the presenter's name. 4. Like it or not, 55% of the persuasive power of a presentation is transmitted by the speaker's body language, 38% by the speaker's voice tone and only 7% by the content. 5. 75% of speaker-nerves disappear with correct rehearsal. 6. You can discover how to generate applause when you want it. 7. There is a simple model you can use which will create a terrific presentation for you every time. 8. Bullet points are not what slides are for, and using all capital letters makes long stretches of text very hard to read. 9. Reading words off slides (as most presenters do) puts your audience to sleep in about 30 seconds. 10. Good presenters are very rare. When you become a good presenter you can often negotiate better employment terms, a higher salary, and even get yourself promoted - I did... so can you! [Facsimile reprint edition]
