Johnny Butterflyseed and his fairy friend, Raven Silverwing, embark on a mission to save the rapidly disappearing butterflies. They enlist the help of Queen Venus Goldwing and her kingdom of monarchs to educate and inspire kids to become butterfly farmers. At first, Johnny faces his own internal struggle with self-doubt and fear in his ability to make a difference, but then soon develops a mindset that allows him to not only get started, but also make progress one day at a time. Through challenge after challenge, Johnny learns that he is not alone in his mission and that there are many people who want to help. Together, Johnny, Raven, and Queen Venus educate thousands of children on becoming butterfly farmers. "The monarch butterfly is in peril and spiraling downward. Our children will determine whether the monarch makes a comeback or becomes one of North America's rarest butterflies. It is vitally important that children are aware of the problems that monarchs face and how we can all help—even children. This delightful book does exactly that and should be on the bookshelf of every child! Tarisa Parrish has seamlessly woven fact with fiction to create a story of importance, charisma, and hope for monarch butterflies in the future." —Dr.

Butterfly Adventures Bill Gulliver, 2011-07 Many butterflies are in danger of extinction as a result of the thoughtless actions of mankind. Ever-increasing human populations demand the rapid expansion of urbanisation and mechanized farming which reduces the habitat of heathland, meadows, pasture and woodland. This endangers butterfly species, such as Silver-studded blue, Chalkhill blue and Purple Emperor. Global warming has had a direct impact upon the reduction of river, lake and pond levels, drying out water meadows and flood plains. Fenland and bogs have been drained for agriculture. The lovely swallowtail butterfly, among other species, depends upon such wetlands for its survival. The British butterflies featured in this book signpost the urgency for action to prevent a world-wide calamity, not only to save butterflies, but to save us all! A portion of the revenue from the sale of this book will be donated to Butterfly conservation. Therefore, every book sold will help to save these beautiful creatures. In this book, butterflies compete with humans in sporting dramas, explore the planetary systems, fight in various armed services, run supermarkets and, incidentally, administer their own Athenian University, with the likes of Plato, Socrates and Euripides pontificating to earnest scholars. You will find, too, butterfly weddings and a structured social system! The Butterfly Marriage Bureau and Dating Service are quite something to behold! Finally, please read The Butterfly Blessing at the end of this book. In that blessing, the butterflies entreat humans to behave like themselves; to care and to share; to abide in harmony - and to be happy!

Bicycling with Butterflies Sara Dykman, 2021-04-13 "What a wonderful idea for an adventure! Absolutely inspired, timely, and important." –Alistair Humphreys, National Geographic Adventurer of the Year and author of *The Doorstep Mile* and *Around the World by Bike* Outdoor educator and field researcher Sara Dykman made history when she became the first person to bicycle alongside monarch butterflies on their storied annual migration—a round-trip adventure that included three countries and more than 10,000 miles. Equally remarkable, she did it solo, on a bike cobbled together from used parts. Her panniers were recycled buckets. In *Bicycling with Butterflies*, Dykman recounts her incredible journey and the dramatic ups and downs of the nearly nine-month odyssey. We're beside her as she navigates unmapped roads in foreign countries, checks roadside milkweed for monarch eggs, and shares her passion with eager schoolchildren, skeptical bar patrons, and unimpressed border officials. We also meet some of the ardent monarch stewards who supported her efforts, from citizen scientists and researchers to farmers and high-rise city dwellers. With both humor and

humility, Dykman offers a compelling story, confirming the urgency of saving the threatened monarch migration—and the other threatened systems of nature that affect the survival of us all.
