**Special Report: Peru Bicentenary** ,2021-04-06 In 2021, Peru celebrates 200 years of independence. Since then, the country has emerged as a regional economic force, having experienced annual growth rates above 5% from 2002 to 2013. From 2014 to 2019, growth slowed to around 3% per year, a result of low international commodities prices. Peru, however, was well equipped to manage what could otherwise have been described as a crisis, thanks to some nimble fiscal maneuvering. That was coupled with the coming online of new mining projects, which saw the current account deficit slashed to just 1.5% in 2019. It is our hope that this 45-page special report form both an important snapshot of the Peruvian economy, as well as a looking glass to the near future, beyond COVID-19, when the country once again hopes to shine.

**Driver Behaviour and Training: Volume 2** Dr. Lisa Dorn,2017-07-05 Research on driver behaviour over the past two decades has clearly demonstrated that the goals and motivations a driver brings to the driving task are important determinants for driver behaviour. The importance of this work is underlined by statistics: WHO figures show that road accidents are predicted to be the number three cause of death and injury by 2020 (currently more than 20 million deaths and injuries p.a.). The objective of this second edition, and of the conference on which it is based, is to describe and discuss recent advances in the study of driving behaviour and driver training. It bridges the gap between practitioners in road safety, and theoreticians investigating driving behaviour, from a number of different perspectives and related disciplines. A major focus is to consider how driver training needs to be adapted, to take into account driver characteristics, goals and motivations, in order to raise awareness of how these may contribute to unsafe driving behaviour, and to go on to promote the development of driver training courses that considers all the skills that are essential for road safety. As well as setting out new approaches to driver training methodology based on many years of empirical research on driver behaviour, the contributing road safety researchers and professionals consider the impact of human factors in the design of driver training as well as the traditional skills-based approach. Readership includes road safety researchers from a variety of different academic backgrounds, senior practitioners in the field of driver training from regulatory authorities and professional driver training organizations such as the police service, and private and public sector personnel who are concerned with improving road safety.

*The Late Truck Driver* David Longanecker,2021-02-03 The Late Truck Driver isn't about a deceased truck driver or someone who arrives late to pick up or deliver a load. It's about becoming a truck driver later in life. David Longanecker always dreamed of driving a big rig, but his life took a different path, leading him to enjoy a career as a higher education administrator and in policy analysis. When he retired, however, he chased his dream. In this book, he shares how he made the leap, what it was like prepping for and taking the test to earn his commercial driver's license, and how he earned real-world experience on the road. He also pays tribute to the beauty of big rigs and the pure joy that comes along with looking at them and driving them. There really is nothing like admiring the beauty of a landscape while sitting in the elevated cab of a big rig tractor. Whether you've wondered what it is like to drive a big rig, want to make a career change, or simply crave to know more about truck driving culture, you'll get an accurate picture of what the life is all about with this book.
