The Political Economy of Chinese Finance J. Jay Choi, Michael R. Powers, Xiaotian Tina Zhang, 2016-09-02 Volume 17 of International Finance Review focusses on a variety of issues relating to the political economy of Chinese finance.

Informal Finance in China Jianjun Li, Sara Hsu, 2009 Informal finance consists of nonbank financing activities, whether conducted through family and friends, local money houses, or other types of financial associations. It has provided much-needed financing to small and medium enterprises (SMEs) in particular, in the face of a tightly constrained and overburdened formal banking system. Unable to obtain a bank loan, firms have relied upon individuals and informal organizations outside of the banking system to obtain financing for their ventures or working capital (operating funds). Presently there is a scarcity of information on informal finance in China and it is expected to have a significant impact upon GDP and money supply. This book, with contributions from leading scholars, describes the evolution, characteristics, and variation of informal finance in China from American and Chinese perspectives. Literature by Jiang Shuxia, Jiang Xuzhao, and Li Jianjun has heretofore been available only in Chinese, while work by Kellee Tsai, Jianwen Liao, Harold Welsch, David Pistrui, and Sara Hsu has been available in English. For the first time, they come together to discuss informal financing and its many aspects. Most of the essays are based upon original survey research conducted locally, as this type of data is not normally collected by the government. The papers pioneer the description and analysis of the nuances of informal finance from several perspectives; the authors look at the social, cultural, political, and economic causes of informal finance, its many variations, and its economic, personal, and political ramifications.

Planning and Finance in China's Economic Reforms Thomas P. Lyons, Yan Wang, 1988

China Macro Finance: a US Perspective Ronald M. Schramm, 2020-09-08 In this new edition of *China Macro Finance: A US Perspective*, Professor Ron Schramm delves into what makes the Chinese economy and financial system unique and fundamentally different from that of the United States. Building on the key drivers of the Chinese economy, he utilizes numerous Case Studies and Macro Finance Insights to shed light on some of the most puzzling aspects of the world's second-largest economy. No other textbook so adeptly applies insights from finance and management to the macroeconomic problems of a country, providing useful tools and data to analyze not just China, but any emerging economy. China has evolved in important ways since the publication of the first edition of this textbook. A burgeoning service sector, slowing returns on investment, and the ebbs and tides of the China's real estate market all provide grist for a reconsideration of where China is and where it is going. New challenges and

opportunities also present themselves: the Trump trade war, the COVID-19 shock, President Xi Jinping's One Belt One Road initiative, e-money, and the weave and weft of China's social safety net. A new chapter on China's financial system is required reading for a deep and broad understanding of opportunities and pitfalls in Chinese corporate finance and asset management. This textbook is intended for master's students and advanced undergraduate students in economics, finance, or international affairs.

China's Guaranteed Bubble Ning Zhu, 2016-03-11 The truth about China's financial industry—and the growing bubble that's guaranteed to blow it apart... In recent years, the Chinese economy has been fueled by the implicit guarantee of major banks and local governments by the nation's central government. The resultant bubble has led to the emergence of a large shadow banking industry that poses major risks to China's real estate market, speculative stock investments, state-owned enterprises, and more. It's not a matter of if China's bubble will burst. It's a matter of when. This eye-opening book from renowned financial scholar Ning Zhu provides a provocative in-depth analysis of China's current economic practices—and the profound dangers they pose—as well as a powerful wake-up call to investors, regulators, and the entire financial industry. Zhu's book is packed with startling revelations, including: * The enormous impact of China's implicit guarantees on economic growth—and what will happen when those guarantees are gone * The ever-increasing size of China's shadow banking industry—and how it's just the tip of the iceberg * The once-reliable strength of China's real estate and stock markets—and how they're threatened by government distortion * The latest financial innovations and channels—and how they are circumventing regulations and triggering unprecedented risks Filled with fascinating case studies, worst case scenarios, and a well-argued case for much-needed reforms, Zhu's enlightening book is a must-read for anyone with interests or investments in China's rapidly changing economy. You'll find intriguing new perspectives on traditional growth models, innovative solutions for overcapacity problems, and revealing new stats on so-called Voodoo Statistics. You'll get a glimpse behind the curtain of the "unknown unknowns" of China's implicit guarantees—and learn just how misleading these government policies can be. Most importantly, Zhu's book provides solid recommendations for diffusing the time bomb these guarantees can and will set off. Brilliant, incisive, and ultimately optimistic, China's Guaranteed Bubble will incite a much-needed call for change and set us on a new path of prosperity and growth—for China, the economy, and the world.

Nanjing 1937 Peter Harmsen, 2015-11-17 A true story of the Sino-Japanese conflict: A "valuable account of a little-known event [and] a grim reminder of the darker side of war" (Military History Monthly). The infamous Rape of Nanjing looms like a dark shadow over the history of Asia in the twentieth century, and is among the most widely recognized chapters of World War II in China. By contrast, the story of the month-long campaign before this notorious massacre has never been told in its entirety. Nanjing 1937 by Peter Harmsen fills this gap. This is the follow-up to Harmsen's bestselling Shanghai 1937: Stalingrad on the Yangtze, and begins where that book left off. In stirring prose, it describes how the Japanese Army, having invaded the mainland and emerging victorious from the Battle of Shanghai, pushed on toward the capital, Nanjing, in a crushing advance that confirmed its reputation for bravery and savagery in equal measure. While much of the struggle over Shanghai had carried echoes of the grueling war in the trenches two decades earlier, the Nanjing campaign was a fast-paced mobile operation in which armor and air power played major roles. It was blitzkrieg two years before Hitler's invasion of Poland. Facing the full might of modern, mechanized warfare, China's resistance was heroic, but ultimately futile. As in Shanghai, the battle for Nanjing was more than a clash between Chinese and Japanese. Soldiers and citizens of a variety of nations witnessed or took part in the hostilities. German advisors, American journalists, and British diplomats all played important parts in this vast drama. And a new power appeared on the scene: Soviet pilots dispatched by Stalin to challenge Japan's control of the skies. This epic tale is told with verve and attention to detail by Harmsen, a veteran East Asia correspondent who consolidates his status as the foremost chronicler of World War II

in China with this path-breaking work of narrative history.

China's New Sources of Economic Growth: Reform, Resources and Climate Change - Ligang Song, Ross Garnaut, Cai Fang, Lauren Johnston, 2016-07-20 China's change to a new model of growth, now called the 'new normal', was always going to be hard. Events over the past year show how hard it is. The attempts to moderate the extremes of high investment and low consumption, the correction of overcapacity in the heavy industries that were the mainstays of the old model of growth, the hauling in of the immense debt hangover from the fiscal and monetary expansion that pulled China out of the Great Crash of 2008 would all have been hard at any time. They are harder when changes in economic policy and structure coincide with stagnation in global trade and rising protectionist sentiment in developed countries, extraordinarily rapid demographic change and recognition of the urgency of easing the environmental damage from the old model. China's economy has slowed and there are worries that the authorities will not be able to contain the slowdown within preferred limits. This year's Update explores the challenge of the slowdown in growth and the change in economic structure. Leading experts on China's economy and environment review change within China's new model of growth, and its interaction with ageing, environmental pressure, new patterns of urbanisation, and debt problems at different levels of government. It illuminates some new developments in China's economy, including the transformational potential of internet banking, and the dynamics of financial market instability. China's economic development since 1978 is full of exciting change, and this year's China Update is again the way to know it as it is happening.

How China Sees the World John M. Friend, Bradley A. Thayer, 2018-11-01 Han-centrism, a virulent form of Chinese nationalism, asserts that the Han Chinese are superior to other peoples and have a legitimate right to advance Chinese interests at the expense of other countries. Han nationalists have called for policies that will allow China to reclaim the prosperity stolen by foreign powers during the "Century of Humiliation." The growth of Chinese capabilities and Han-centrism suggests that the United States, its allies, and other countries in Asia will face an increasingly assertive China—one that thinks it possesses a right to dominate international politics. John M. Friend and Bradley A. Thayer explore the roots of the growing Han nationalist group and the implications of Chinese hypernationalism for minorities within China and for international relations. The deeply rooted chauvinism and social Darwinism underlying Han-centrism, along with China's rapid growth, threaten the current stability of international politics, making national and international competition and conflict over security more likely. Western thinkers have yet to consider the adverse implications of a hypernationalistic China, as opposed to the policies of a pragmatic China, were it to become the world's dominant state.

The Silver Way: China, Spanish America and the birth of globalisation 1565-1815: Penguin Specials Peter Gordon, Juan Jose Morales, 2017-01-09

Long before London and New York rose to international prominence, a trading route was discovered between Spanish America and China that ushered in a new era of globalisation. The Ruta de la Plata or 'Silver Way' catalysed economic and cultural exchange, built the foundations for the first global currency and led to the rise of the first 'world city'. And yet, for all its importance, the Silver Way is too often neglected in conventional narratives on the birth of globalisation. Gordon and Morales re-establish its fascinating role in economic and cultural history, with direct consequences for how we understand China today.

Developed Nations and the Economic Impact of Globalization Ken Moak, 2017-07-18 This book discusses the economic and geopolitical effects of globalization from historical and institutional perspectives. While it has had unintended consequences, such as displacing developed countries' dominance of production markets, the overall benefits of globalization far outweigh the costs. Moak argues that leading developed nations should not fear globalization but, instead, make concerted efforts to promote it in order to keep the cost-benefit balance weighing in favor of economic enhancement and geopolitical stability. Having incurred huge private and public debts as well as a weak monetary policy posture, many developed nations have been unable to recovery from the 2008 financial crisis. Moreover, geopolitical tensions are rising due to the power rivalry between the United States, China, and Russia over a host issues, including trade imbalances and geopolitics. This book aims to provide stakeholders with the relevant and necessary information to hold an objective debate on globalization. Ultimately, this book is about globalization— what it is, how it impacts the global economy and polity, and why it is needed now more than any other time in human history.

China's Gilded Age Yuen Yuen Ang, 2020-05-28 Why has China grown so fast for so long despite vast corruption? In China's Gilded Age, Yuen Yuen Ang maintains that all corruption is harmful, but not all types of corruption hurt growth. Ang unbundles corruption into four varieties: petty theft, grand theft, speed money, and access money. While the first three types impede growth, access money - elite exchanges of power and profit - cuts both ways: it stimulates investment and growth but produces serious risks for the economy and political system. Since market opening, corruption in China has evolved toward access money. Using a range of data sources, the author explains the evolution of Chinese corruption, how it differs from the West and other developing countries, and how Xi's anti-corruption campaign could affect growth and governance. In this formidable yet accessible book, Ang challenges one-dimensional measures of corruption. By unbundling the problem and adopting a comparative-historical lens, she reveals that the rise of capitalism was not accompanied by the eradication of corruption, but rather by its evolution from thuggery and theft to access money. In doing so, she changes the way we think about corruption and capitalism, not only in China but around the world.

Fateful Ties Gordon H. Chang, 2015-04-13 Americans look to China with fascination and fear, unsure whether it is friend or foe but certain it will play a crucial role in their future. This is nothing new, Gordon Chang says. *Fateful Ties* draws on literature, art, biography, popular culture, and politics to trace America's long and varied preoccupation with China.

Facing the Era of Great Transformation Wu Jinglian, 2021-03-31 This book collects essays from Chinese economic sage who was the mastermind of the reform and opening and persistent champion of market-driven development. In the essays, he outlines his vision of the systemic reform needed for today's China, from rule of law to completion of the market system and reform of state-owned enterprises. Dr. Wu's thoughts are always of interest, but at this pivotal moment of Chinese economic recalibration, his views will be of more value than ever, to scholars, economists, journalists, and those in civil society.

The Financial System We Need United Nations Environment Programme (UNEP), 2016-01-27 The Financial System We Need argues that there is now a historic opportunity to shape a financial system that can more effectively finance the development of an inclusive, green economy. This opportunity is based on a growing trend in policy innovation from central banks, financial regulators and standard setters, who are incorporating sustainability factors into the rules that govern the financial system. The report draws together practical examples of policy changes in banking, capital markets, insurance and institutional investment, drawing on detailed work in several countries. It offers a Framework for Action that shows how a systematic approach can now be taken at both the national and international levels.
