**Finance, Rule of Law and Development in Asia** Jiaxing Hu, Matthias Vanhullebusch, Andrew Harding, 2016-05-12 This volume offers a comparative study of Hong Kong, Singapore and Mainland China's financial models conducted by leading experts in the field and advances a sophisticated and common understanding on the development of financial centres in Asia based on the rule of law.

**Routledge Handbook of Chinese Media** Gary D. Rawnsley, Ming-yeh T. Rawnsley, 2015-04-24 The study of Chinese media is a field that is growing and evolving at an exponential rate. Not only are the Chinese media a fascinating subject for analysis in their own right, but they also offer scholars and students a window to observe multi-directional flows of information, culture and communications within the contexts of globalization and regionalization. Moreover, the study of Chinese media provides an invaluable opportunity to test and refine the variety of communications theories that researchers have used to describe, analyse, compare and contrast systems of communications. The Routledge Handbook of Chinese Media is a prestigious reference work providing an overview of the study of Chinese media. Gary and Ming-Yeh Rawnsley bring together an interdisciplinary perspective with contributions by an international team of renowned scholars on subjects such as television, journalism and the internet and social media. Locating Chinese media within a regional setting by focusing on 'Greater China', the People's Republic of China, Taiwan, Hong Kong, Macau and overseas Chinese communities; the chapters highlight the convergence of media and platforms in the region; and emphasise the multi-directional and trans-national character of media/information flows in East Asia. Contributing to the growing de-westernization of media and communications studies; this handbook is an essential and comprehensive reference work for students of all levels and scholars in the fields of Chinese Studies and Media Studies.

**Human Security in China** Chi Zhang, 2021-10-21 This book explores the emergent concept of 'human security' within the political context of COVID-19 Chinese politics. For decades, Western nations have used 'human rights' as a rubric with which to scold Chinese leaders, betraying a fundamental unwillingness to accept diversity of governance systems. As COVID-19 has demonstrated, different governance systems yield different outcomes—the freedom of circulation, speech and movement in Western democracies yielding one, and use of surveillance, lockdowns, and private-public collaboration in China and Asian societies such as Korea and Singapore yielding another. Chinese political scientists have become fixated on the notion of 'human security,' a utilitarian concept which insists on the importance of protecting and extending human life via health care, technology, and a wide range of other systems—sometimes, in ways which contradict Western notions of human rights, even as they demonstrably achieve superior outcomes for the humans involved. Being the first English language book to explore these issues, this book aims to generate a sustained theoretical relevance in the aftermath of the crisis which is likely to have lasting effects on how people live and will be of note for political scientists, China scholars, and economists.

**Partners and Rivals** Wendy Dobson, 2013-10-28 Until the global financial crisis, China was thought to be decades away from overtaking the United States as the world's largest economy. But while the US skirted economic stagnation, China was able to successfully navigate the crisis, and its growth continues to accelerate. Has the time arrived to re-evaluate our assumptions about the current world order? Will China openly contest the United States' status, unchallenged since the Second World War, as a world leader? Will conflict be inevitable, or would its costs be unthinkable in a globalized world economy? *Partners and Rivals*, the latest book from acclaimed economist Wendy Dobson, examines the central role that China and the United States will play on the global stage in

the next half-century. Dobson provides a balanced and accessibly written understanding of China's domestic challenges, as well as an analysis of both the United States and China's goals on the world stage. Demonstrating why neither power will be able to dominate the other, the book emphasizes that they will need to cooperate and work together in the coming decades because of their deep economic interdependence.

**China Dreams** Jane Golley, Linda Jaivin, Ben Hillman, Sharon Strange, 2020-04-16 The year 2019 marked a number of significant anniversaries for the People's Republic of China (PRC), each representing different 'Chinese dreams'. There was the centennial of the May Fourth Movement — a dream of patriotism and cultural renewal. The PRC celebrated its seventieth anniversary — a dream of revolution and national strength. It was also thirty years since the student-led Protest Movement of 1989 — dreams of democracy and free expression crushed by government dreams of unity and stability. Many of these 'dreams' recurred in new guises in 2019. President Xi Jinping tightened his grip on power at home while calling for all citizens to 'defend China's honour abroad'. Escalating violence in Hong Kong, the ongoing suppression of Uyghurs in Xinjiang, and deteriorating Sino-US relations dominated the headlines. Alongside stories about China's advances in artificial intelligence and genetically modified babies and its ambitions in the Antarctic and outer space, these issues fuelled discussion about what Xi's own 'China Dream' of national rejuvenation means for Chinese citizens and the rest of the world. The China Story Yearbook: China Dreams reflects on these issues and more. It surveys the dreams, illusions, aspirations, and nightmares that coexisted (and clashed) in 2019 in China and beyond. As ever, we take a cross-disciplinary perspective that recognises the inextricable links between economy, politics, culture, history, language, and society. The Yearbook, with its accessible analysis of the main events and trends of the year, is an essential tool for

understanding China's growing power and influence around the world.

**Urban China Reframed** Wing-Shing Tang, Kam Wing Chan, 2021-06-22 Given China's rapid economic growth and massive urbanization, no one in the world can ignore what is happening in urban China. This book is a critical review of existing urban China research, which is found wanting due to the decontextualized use of theories and concepts developed in the West. *Urban China Reframed: A Critical Appreciation* consists of epistemological, theoretical and methodological contributions to remedy these limitations by focusing on a number of relevant topics. First, models are widely employed in any study, and China nowadays has invoked models like city system, zones and global city in socio-economic development. How to interpret them in terms of knowledge production in a strong party-state? Second, given the global prevalence of neoliberalism, it is an important debate whether neoliberalism is applicable to China. Third, what is urban ideology in China? How to contextualize it? Are debates about the differentiation between the city and urbanization relevant to China? Fourth, massive rural-urban migration in China has taken place within its mega rural-urban dual system, an institution that has persisted since the 1950s. How does it manifest nowadays? Fifth, has the town-country divide in China, like in the West, disappeared? If not, how can one interpret China's town-country relations, within the politics and administration of the Chinese state? Sixth, how to decipher the territorial development in the Pearl River Delta, the world's factory, under the auspices of the state? The collection of essays in this volume contributes to the theoretical understanding of urban China. The chapters in this book were originally published in the *Eurasian Geography and Economics*.

**China'S Dance with the Foreign Devils** Dick K. Nanto, PhD, 2016-07-15 Since 1978 in China, foreign direct investment has served as a driver of change that has brought the country into the

modern economic world. Mao Zedong had shut out the foreign devils Europeans, Japanese, Americans and other outsiders. He created chaos in an economy that was long on suffering but short on foreign currency, technology and capital. In this detailed account, Dick K. Nanto explores how foreign companies came in to fill the gaps in China's economy and helped it to become a manufacturing marvel. He focuses on topics such as how: Industrialization has created a socialist economy with Chinese characteristics that are reflected in industrial policy, governmental institutions, state-owned enterprises, the push to climb the high-technology ladder, indigenous innovation, and the drive to create more national champion companies. Chinese are investing abroad, entering the home turf of multinational corporations and raising issues related to national security. Foreign enterprises are now being squeezed as Beijing seeks to replace them with companies of its own. Business people, entrepreneurs, international business students, politicians, and anyone interested in how things get done in China will find engaging, informative, and comprehensive information in China's Dance with the Foreign Devils.

Online Film Production in China Using Blockchain and Smart Contracts Patrice

Poujol, 2019-03-04 This book explores the use of Blockchain and smart contract technologies to develop new ways to finance independent films and digital media worldwide. Using case studies of Alibaba and in-depth, on-set observation of a Sino-US coproduction, as well as research collected from urban China, Hong Kong, Europe, and the USA, Online Film Production in China Using Blockchain and Smart Contracts explores new digital platforms and what this means for the international production of creative works. This research assesses the change in media consciousness from young urban audiences, their emergence as a potential participative and creative community within dis-intermediated, decentralised and distributed crowdfunding and

crowdsourcing models. This research proposes solutions on how these young emerging local creative talents can be identified and nurtured early on, particularly those who now produce creative and artistic audiovisual content whether these works are related to film, Virtual Reality (VR), video game, graphic novels, or music. Ultimately, a new media content finance and production platform implementing blockchain is proposed to bring transparency in the film sector and open doors to emerging artists in digital media. Appropriate for both professionals and academics in the film industry as well as computer science.

**Uncovering African Agency** Lucy Corkin, 2016-02-17 China's engagement in Africa is generally portrayed simply as African countries being exploited for their mineral wealth by a wealthy political and economic superpower. Is this always the case? Certain African countries have been able to use China's involvement in the region to grow their economies and solicit renewed interest from previously disengaged foreign powers by using their relationship with China to bolster their political capital. In this thought provoking and original work Lucy Corkin demonstrates how Angola has been amongst the most successful of African nations in this role. The concept of 'African agency' covers a wide range of different countries with very different capabilities and experiences of engaging with China. In each individual country there are a myriad of actors all with increasingly discernible agencies. *Uncovering African Agency; Angola's Management of China's Credit Lines* casts a fascinating new light on China's involvement with her largest African trading partner and through this shows how different African states and the governmental actors within them are able to exploit the relationship to their best advantage.

**Leveraging Legacies from Sports Mega-Events** J. Grix, 2014-04-17 This volume offers a panoramic and interdisciplinary view of the growing field of Sports Mega-Event studies.

Contributions explore leveraging strategies and the legacies from previous sports megas (London, Seoul, Sydney, Vancouver) and recent and future 'emerging' states and their hosting strategies (India, China, Qatar, Russia, Brazil).

Rising China Jane Golley, Ligang Song, 2011-06-01 Where the last three decades of the 20th century witnessed a China rising on to the global economic stage, the first three decades of the 21st century are almost certain to bring with them the completion of that rise, not only in economic, but also political and geopolitical terms. China's integration into the global economy has brought one-fifth of the global population into the world trading system, which has increased global market potential and integration to an unprecedented level. The increased scale and depth of international specialisation propelled by an enlarged world market has offered new opportunities to boost world production, trade and consumption; with the potential for increasing the welfare of all the countries involved. However, China's integration into the global economy has forced a worldwide reallocation of economic activities. This has increased various kinds of friction in China's trading and political relations with others, as well as generating several globally significant externalities. Finding ways to accommodate China's rise in a way that ensures the future stability and prosperity of the world economy and polity is probably the most important task facing the world community in the first half of the 21st century. The book delves into these issues to reflect upon the wide range of opportunities and challenges that have emerged in the context of a rising China.

**Driven to the Brink** Alicia Micklethwait, Patricia Dimond, 2017-03-14 Driven to the Brink is a collection of short stories about corporate disasters and how inadequate governance and flawed culture caused a massive destruction of shareholder value. Look at any major corporate meltdown and two factors emerge: a failure of corporate governance and a culture where short-termism and

greed are rewarded and risk is encouraged to flourish unchecked. Two years before the latest crash, Alicia Micklethwait co-wrote the best-selling Greed and Corporate Failure which examined some of the high profile corporate disasters of the early years of the 21st century. Sadly those lessons were forgotten. Companies have continued to be Driven to the Brink of disaster. Now, with co-author Patty Dimond, they examine what we must learn this time around. Drawing on in-depth case studies of the Libor scandal, Olympus, Co-op, Kids Company and others, Dimond and Micklethwait ask what have we learned and more importantly, what can we do to prevent these disasters from happening again? They also examine the large, emerging and less widely understood world of Corporate China with detailed discussion of the Lixel and Glaxo frauds. On a positive note, staying with China, they look at the story of Alibaba and ask is an ethical culture enough to protect shareholder rights?

**Annual Report** United States. Congressional-Executive Commission on China,2010

**China Goes Global** Huiyao Wang,Miao Lu,2016-04-08 Mainland China businesses are going global, transforming the country from a manufacturing export platform into an overseas investment powerhouse. China Goes Global is the most thorough and up-to-date empirical analysis of the accelerating effort of Chinese companies to go global by investing overseas. It details the overall trends of this activity with respect to its sectors, channels, overseas targets, and particular firms, along the role of Chinese Government policy in facilitating business enterprise globalization. The book offers readers an enterprise level of view outward expansion by Chinese firms that is focused not only on the big-names, but also less well-known, but equally important trailblazing enterprises. In doing so it offers practical suggestions on how firms can tackle the challenges encountered when expanding outward.

Beyond Free Trade K. Ervine,G. Fridell,2015-04-08 The world of trade is changing rapidly, from

the 'rise of the South' to the growth of unconventional projects like fair trade and carbon trading. Beyond Free Trade advances alternative ways for understanding these new dynamics, based on historical, political, or sociological methods that go beyond the limitations of conventional trade economics.

**The Oxford Handbook of the International Relations of Asia** Saadia M. Pekkanen, John Ravenhill, Rosemary Foot, 2014-08-19 In the past quarter century, the importance of Asia in international relations has grown exponentially. This Handbook gathers the most important scholars in the field of Asia's international relations to address this momentous change in world politics. The editors and contributors focus on three basic themes: assessing appropriate theories for explaining the evolution of the international relations of Asian countries within the region and with the rest of the world; tracing the recent history of Asia in world politics; and focusing on emerging trends. The Handbook brings readers the latest scholarship on the bilateral, regional, and global relations of Asian countries in the fields of political economy, national security, and human security. Comprehensive in theme, breadth, and methodology, this Handbook is a timely addition to the existing literature on the changes currently underway in Asian countries that promise to have significant implications for world politics.

Oxford Handbook of the International Relations of Asia Saadia M. Pekkanen, John Ravenhill, Rosemary Foot, 2014 This handbook examines the theory and practice of international relations in Asia. Building on an investigation of how various theoretical approaches to international relations can elucidate Asia's empirical realities, authors examine the foreign relations and policies of major countries or sets of countries.

Power Jane Golley, Linda Jaivin, Paul J. Farrelly, Sharon Strange, 2019-04-11 In 2018, the People's

Republic of China (PRC) was, by most measures, more powerful than at any other time in its history and had become one of the most powerful countries in the world. Its economy faced serious challenges, including from the ongoing 'trade war' with the US, but still ranked as the world's second largest. Its Belt and Road Initiative, meanwhile, continued to carve paths of influence and economic integration across several continents. A deft combination of policy, investment, and entrepreneurship has also turned the PRC into a global 'techno-power'. It aims, with a good chance of success, at becoming a global science and technology leader by 2049 – one hundred years from the founding of the PRC. In surveying the various ways in which the Party-state wields its hard, soft, and sharp power, the *China Story Yearbook: Power* offers readers a sense of the diversity of power at work both in China and abroad. Citizens of the PRC have long negotiated the state's influence; increasingly, diaspora communities and other actors are now being subject to its might. As with previous editions in the series, we place important developments in historical context, and adopt a cross-disciplinary approach: it is our view that economy and politics cannot be divorced from culture, history, and society. The *Yearbook* provides accessible analysis of the main events and trends of the year and is an essential tool for understanding China's growing power and influence around the world.

**China in the Xi Jinping Era** Steve Tsang, Honghua Men, 2016-07-30 This book examines the driving forces behind national-level politics, changes to the judiciary, social control, economic reform, environmental protection, urban development, the management of ethnic relations, as well as foreign and security policy orientation in China under Xi Jinping. It explains Xi's ambition, examines the limitations he has to confront, and maps the direction of reform he pursues. The book starts off by examining how the consultative Leninist nature of the political system continues to

shape politics and policy in China under Xi, and what the China dream Xi advocates actually entails domestically and beyond China. It ends by highlighting the megatrends that will prevail in the decade when Xi is expected to stay in power. The book also includes contributions from five Central Party School professors whose views are taken seriously by the Chinese leadership.

**US-China Relations in the Twenty-First Century** Michael Tai, 2015-04-24 The relationship between the United States and China will be of critical importance to the world throughout the twenty-first century. In the West China's rise is often portrayed as a threat and China seen in negative terms. This book explores the dynamics of this crucial relationship. It looks in particular at what causes an international relationship to be perceived negatively, and considers what can be done to reverse this, arguing that trust is a key factor. It goes on to discuss US and Chinese rhetoric and behaviour in three key areas - climate change, finance, and international security. The book contends that, contrary to much US rhetoric, China's actions in these areas is often much more flexible and accommodating than the US position, and that the Chinese are much more knowledgeable about, and understanding and appreciative of, the United States than vice versa.
