Directory of Web Sites Graham Bennett,1999 Overloaded with the mass of information on the Internet? Frustrated by how difficult it is to find what you really want? Now you don't need to spend hours browsing around the Internet or grappling with the huge number of hits from an Internet search engine: the Directory of Web Sites will take you straight to the best educational sites on the Internet. From archaeology to zoology, from dance to technology, the Directory provides information more than 5,500 carefully selected Web sites that represent the best of what the Internet has to offer. The sites are grouped by subject; each one features a full description; and the text is complemented throughout by screenshots and fact boxes. As well, sites have been selected purely on educational merit: all sites with overtly commercial content and influence from Internet providers have been excluded.

Stolen Figs Mark Rotella,2004-05-01 An effortlessly artful blend of travel book, memoir, and affectionate portrait of a people Calabria is the toe of the boot that is Italy—a rugged peninsula where grapevines and fig and olive trees cling to the mountainsides during the scorching summers while the sea crashes against the cliffs on both coasts. Calabria is also a seedbed of Italian American culture; in North America, more people of Italian heritage trace their roots to Calabria than to almost any other region in Italy. Mark Rotella's *Stolen Figs* is a marvelous evocation of Calabria and Calabrians, whose way of life is largely untouched by the commerce that has made Tuscany and Umbria into international tourist redoubts. A grandson of Calabrian immigrants, Rotella persuades his father to visit the region for the first time in thirty years; once there, he meets Giuseppe, a postcard photographer who becomes his guide to all things Calabrian. As they travel around the region, Giuseppe initiates Rotella—and the reader—into its secrets: how to make soppressata and 'nduja, where to find hidden chapels and grottoes, and, of course, how to steal a fig without actually committing a crime. *Stolen Figs* is a model travelogue—at once charming and wise, and full of the earthy and unpretentious sense of life that, now as ever, characterizes Calabria and its people.

The Duchess of Malfi John Webster, 2023-07-11 John Webster was a later contemporary of Shakespeare, and The Duchess of Malfi, Webster's best known play, is considered among the best of the period. It appears to have been first performed in 1612–13 at the Blackfriars before moving on to the larger and more famous Globe Theatre, and was later published in 1623. The play is loosely based on a real Duchess of Amalfi, a widow who marries beneath her station. On learning of this, her brothers become enraged and vow their revenge. Soon the intrigue, deceit, and murders begin. Marked by the period's love of spectacular violence, each character exacts his revenge, and in turn suffers vengeance at the hands of others. Coming after Shakespeare's equally sanguine Hamlet and Kyd's The Spanish Tragedy, Webster's The Duchess of Malfi brings to a close the era of the great Senecan tragedies of blood and revenge. As the Jacobean period progressed, the spectacle became more violent and dark, reflecting the public's growing dissatisfaction with the corruption of King James' court.

Spatial Interpolation for Climate Data Hartwig Dobesch, Pierre Dumolard, Izabela Dyras, 2013-03-01 This title gives an authoritative look at the use of Geographical Information Systems (GIS) in climatology and meteorology. GIS provides a range of strategies, from traditional methods, such as those for hydromet database analysis and management, to new developing methods. As such, this book will provide a useful reference tool in this important aspect of climatology and meteorology study.

Graph Machine Learning Claudio Stamile, Aldo Marzullo, Enrico Deusebio, 2021-06-25 Build machine learning algorithms using graph data and efficiently exploit topological information within your models Key Features Implement machine learning techniques and algorithms in graph data Identify the relationship between nodes in order to make better business decisions Apply graph-based machine learning methods to solve real-life problems Book Description Graph Machine Learning will introduce you to a set of tools used for processing network data and leveraging the power of the relation between entities that can be used for predictive, modeling, and analytics tasks. The first chapters will introduce you to graph theory and graph machine learning, as well as the scope of their potential use. You'll then learn all you need to know about the main machine learning models for graph representation learning: their purpose, how they work, and how they can be implemented in a wide range of supervised and unsupervised learning applications. You'll build a complete machine learning pipeline, including data processing, model training, and prediction in order to exploit the full potential of graph data. After covering the basics, you'll be taken through real-world scenarios such as extracting data from social networks, text analytics, and natural language processing (NLP) using graphs and financial transaction systems on graphs. You'll also learn how to build and scale out data-driven applications for graph analytics to store, query, and process network information, and explore the latest trends on graphs. By the end of this machine learning book, you will have learned essential concepts of graph theory and all the algorithms and techniques used to build successful machine learning applications. What you will learn Write Python scripts to extract features from graphs Distinguish between the main graph representation learning techniques Learn how to extract data from social networks, financial transaction systems, for text analysis, and more Implement the main unsupervised and supervised graph embedding techniques Get to grips with shallow embedding methods, graph neural networks, graph regularization methods, and more Deploy and scale out your application seamlessly Who this book is for This book is for data scientists, data analysts, graph analysts, and graph professionals who want to leverage the information embedded in the connections and relations between data points to boost their analysis and model performance using machine learning. It will also be useful for machine learning developers or anyone who wants to build ML-driven graph databases. A beginner-level understanding of graph databases and graph data is required, alongside a solid understanding of ML basics. You'll also need intermediate-level Python programming knowledge to get started with this book.

Freedom of expression and the internet Wolfgang Benedek,Matthias C. Kettemann,2020-09-08 An invaluable resource for students of law, politics, international relations and technology as well as for diplomats and civil society actors, this publication demonstrates how the Council of Europe contributes to ensuring that everyone’s voice online can be heard. This is key to sustainable, human rights oriented and people-centred digitalisation. Human rights matter on the internet. Without freedom of expression, people cannot participate in everything that the information society has to offer. Yet online free speech is in danger. Between state laws, private rules and algorithms, full participation in the online communicative space faces many challenges. This publication explores the profound impact of the internet on free expression and how it can be effectively secured online. The second, updated edition of this introduction into the protection of freedom of expression online answers essential questions regarding the extent and limits of freedom of expression online and the role of social networks, courts, states and organisations in online communication spaces. In clear language, with vivid examples spanning two decades of internet law, the authors answer questions on freedom of expression in cyberspace. Addressing issues from the protection of bloggers to the right to access online information, the publication also shows the importance of the standard-setting, monitoring and promotion activities of international and non-governmental organisations and includes a chapter on relevant national practice. It pays special attention to the role of European human rights law and the Council of Europe as this region’s most important human rights organisation.
