- Service-Oriented Computing: Agents, Semantics, and Engineering Ryszard Kowalczyk,Quoc Bao Vo,Zakaria Maamar,Michael Huhns,2009-12-11 This book constitutes the thoroughly refereed post-conference proceedings of the International Workshop on Service-Oriented Computing: Agents, Semantics and Engineering, SOCASE 2009, held in Budapest, Hungary, as an associated event of AAMAS 2009, the main international conference on autonomous agents and multi-agent systems. The 10 revised full papers presented were carefully reviewed and selected for inclusion in the book. The papers address a range of topics at the intersection of service-oriented computing, semantic technology, and intelligent multiagent systems, such as: service description and discovery; planning, composition and negotiation; semantic processes and service agents; as well as applications.
- *Recent Advances in Temporal Databases* James Clifford,Alexander Tuzhilin,2012-12-06 The International Workshop on Temporal Databases held in Zurich, Switzerland, 17-18 September 1995 brought together researchers from academic and industrial institutions with database practitioners interested in keeping up with the state-of-the-art developments in the management of temporal data. A previous workshop in Arlington, Texas in June 1993 focused on the development of an infrastructure that would spur the development of commercial implementations of many of the generally agreed-upon features of temporal database management that have emerged from the temporal database research community over more than a decade of research. This ARP AlNSF-sponsored Arlington workshop saw the formation of the TSQL2 Language Design Committee, which led to the development of the recently completed TSQL2 Language Specification, and also created a consensus glossary of temporal database terminology and a test suite of temporal database queries. The Zurich workshop was conceived from the outset to be universal in scope, and international in participation. The Call for Papers sought to evoke the highest quality and most up-to-date temporal database research from around the world. Mindful of the important work accomplished by the previous workshop, the Call also specifically sought out research papers and panels that would comment and build upon the widely publicized results from Arlington. These proceedings contain the papers that were selected for presentation at the International Workshop, on Temporal Databases held in Zurich, Switzerland on 17-18 September 1995.

- *The Technical Director's Toolkit* Zachary Stribling,Richard Girtain,2015-12-07 In the world of theatre, the technical director is responsible for overseeing the safe and efficient realization and implementation of scenery for the stage. The Technical Director's Toolkit is the first book to address every nut and bolt of this multifaceted job. This book guides readers though the step-by-step processes of technical direction and the responsibilities of the TD in the mounting of a theatrical production. Leadership, management, relationship building, personal responsibility, and problem solving are addressed, demonstrating not only how to become a more efficient and effective TD, but also how to be a collaborative member of a production team that artists will seek to work with again and again. The book also addresses scene shop design, facility repair and maintenance, and finishes with a brief overview of other areas of technical theatre that help round out the far reaching skill set of a successful TD. This book is perfect for university courses in Stagecraft and Technical Direction and for the aspiring Technical Director.
