*South American Handbook 2004* Ben Box,2003 Footprint's South American Handbook, the longest-running guidebook in the English language, celebrates its 80th anniversary this year. As the Minneapolis Star Tribune declared, it is amazingly detailed, updated every year, and has good city maps. It has set the standard since 1924. Covering more than 120 of the world's most exciting destinations, Footprint guides offer everything discerning travelers need to get the most out of their trip.

**Owners of the Map** Claudio Sopranzetti,2018 On May 19, 2010, the Royal Thai Army deployed tanks, snipers, and war weapons to disperse the thousands of Red Shirts protesters who had taken over the commercial center of Bangkok to demand democratic elections and an end to inequality. Key to this mobilization were motorcycle taxi drivers, who slowed down, filtered, and severed mobility in the area, claiming a prominent role in national politics and ownership over the city and challenging state hegemony. Four years later, on May 20, 2014, the same army general who directed the dispersal staged a military coup, unopposed by protesters. How could state power have been so fragile and open to challenge in 2010 and yet so seemingly sturdy only four years later? How could protesters who had once fearlessly resisted military attacks now remain silent? *Owners of the Map* provides answers to these questions—central to contemporary political mobilizations around the globe—through an ethnographic study of motorcycle taxi drivers in Bangkok. Claudio Sopranzetti explores the unresolved tensions in the drivers' everyday lives, their migration trajectories, consumer desires, and political demands amidst the restructuring of Thai capitalism after the 1997 economic crisis. Reconstructing the entanglements between their everyday mobility and political mobilization, Sopranzetti reveals mobility not just as a strength of contemporary capitalism but also as one of its fragile spots, always prone to disruption by the people who sustain its channels but remain excluded from their benefits. In so doing, *Owners of the Map* advances an analysis of power that focuses not on the sturdiness of hegemony or the ubiquity of everyday resistance but on its potential fragility as well as the work needed for its

maintenance.

**Between Public and Private Mobility** ,2016-03 TRB Special Report 319 analyzes the ways that innovative transportation services--including ridesharing, carsharing, bikesharing, and microtransit--are changing mobility for millions of travelers. Such services could reduce congestion and emissions from surface transportation if regulated wisely to encourage concurrent, instead of sequential, ridesharing. Rapidly growing transportation network companies (TNCs), such as Uber and Lyft, however, are disrupting conventional taxi and limousine services and are raising policy challenges related to personal security and public safety, insurance requirements, employment and labor issues, and accessibility and equity. The committee's report offers guidance to state and local officials responsible for policy setting and regulation of for-hire transportation services in each of these areas. The report also addresses the need for greater consistency in regulations across jurisdictions and calls for TNCs to share more information about the volume, the frequency, and the types of trips they are providing, to allow for informed regulation and planning of transportation services--provided by publisher.
