Women, Identity and India's Call Centre Industry J.K. Tina Basi, 2009-06-02 This book examines the concept of globalised identities and the way in which agency is exercised over identity construction by women working in India's transnational call centre industry. Drawing on qualitative empirical data and extensive original fieldwork, the book provides a nuanced analysis of the experiences of Indian women call centre workers and the role of women's participation in the global labour market. The author uses social, cultural, and historical factors to create a framework for examining the processes of identity construction. Within this framework, the book explores the impact of the call centre labour process on the social landscape of urban centres in India and the way in which this has impacted upon transformations and shifts in society with relation to gendered, sexual, and generational relationships. Highlighting the significance of identity in a globalised world, the author argues that identity acts as one of the most powerful constructs in transforming global 'scapes' and flows of culture and economics. This book will be of interest to academics working on South Asia, gender and labour studies and issues of globalization, identity and social change.

Global Call Center Employees in India Mayank Kumar Golpelwar, 2015-10-23 Mayank Kumar Golpelwar analyses why Business Process Outsourcing (BPO) units and their young employees found themselves to be the target of severe criticism from India's middle classes. Using social and organizational psychological frameworks as well as ethnographic and variance analytic research, the author takes a look at the validity of the criticism against the BPO industry. He uses the framework of

cultural theories to analyze and present the gap between the mainstream Indian culture and its rapidly emerging and globalized BPO sub-culture.

Drugs & Pharmaceutical Technology Handbook NIIR

Board, 2004-01-01 Drugs and pharmaceutical industry plays a vital role in the economic development of a nation. It is one of the largest and most advanced sectors in the world, acting as a source for various drugs, medicines and their intermediates as well as other pharmaceutical formulations. India has come a long way in this field, from a country importing more than 95% of its requirement of drugs and pharmaceuticals; India now is exporting it even to developed countries. Being the intense knowledge driven industry, it offers innumerable business opportunities for the investors/ corporate the world over. The existence of well defined and strong pharmaceutical industry is important for promoting and sustaining research and developmental efforts and initiatives in an economy as well as making available the quality medicines to all at affordable prices. That is, it is essential to improve the health status of the individuals as well as the society as a whole, so that positive contributions could be made to the economic growth and regional development of a country. On the global platform, India holds fourth position in terms of volume and thirteenth position in terms of value of production in pharmaceuticals. The pharmaceutical industry has been producing bulk drugs belonging to all major therapeutic groups requiring complicated manufacturing processes as well as a wide range of pharmaceutical machinery and equipments. The modern Indian Pharmaceutical Industry is recent and its foundation was laid in the beginning of the current century. The pharmaceutical industry can be broadly categorised as bulk drugs, formulations, IV fluids and pharmaceutical aids (such as medical equipment, hospital disposables, capsules, etc.). Special feature of the pharmaceutical industry is a large number of manufacturers in the small scale sector. The government is also encouraging the SSI sector

providing some incentives. The recent developments in the technology and R & D work in this field have led to the increased growth rate of industries and have established Indian Pharmaceutical industries in the international market. The content of the book includes information about properties, general methods of analysis, methods of manufacture, of different types of drugs and pharmaceuticals. Some of the fundamentals of the book are polymeric materials used in drug delivery systems , theoretical aspects of friction and lubrication , a convenient method for conversion of quinine to quinidine, formulation and evaluation of bio-available enteric-coated erythromycin and metronidazole tablets, extraction of virginiamycin, antipyretics and analgesics, column chromatographic assay of aspirin tablets, differentiating titration of phenacetin and caffeine, infrared spectra of some compounds of pharmaceutical interest etc. This book covers an intensive study on manufacturing, production, formulation and quality control of drugs and pharmaceuticals with technology involved in it. This book is an invaluable resource for technologists, professionals and those who want to venture in this field.

Storytelling Christian Salmon,2017-01-31 The narrative spell cast over politics and society Politics is no longer the art of the possible, but of the fictive. Its aim is not to change the world as it exists, but to affect the way that it is perceived. In Storytelling Christian Salmon looks at the twenty-first-century hijacking of creative imagination, anatomizing the timeless human desire for narrative form, and how this desire is abused by the marketing mechanisms that bolster politicians and their products: luxury brands trade on embellished histories, managers tell stories to motivate employees, soldiers in Iraq train on Hollywood-conceived computer games, and spin doctors construct political lives as if they were a folk epic. This “storytelling machine” is masterfully unveiled by Salmon, and is shown to be more effective and

insidious as a means of oppression than anything dreamed up by Orwell.

The Age of Aspiration Dilip Hiro, 2015-10-06 Nearly four decades ago, Dilip Hiro's *Inside India Today*, banned by Indira Gandhi's government, was acclaimed by *The Guardian* as simply "the best book on India." Now Hiro returns to his native country to chronicle the impact of the dramatic economic liberalization that began in 1991, which ushered India into the era of globalization. Hiro describes how India has been reengineered not only in its economy but also in its politics and cultural mores. Places such as Gurgaon and Noida on the outskirts of Delhi have been transformed from nondescript towns into forests of expensive high-rise residential and commercial properties. Businessmen in Bollywood movies, once portrayed as villains, are now often the heroes. The marginal, right-wing Hindu militants of the past now rule the nominally secular nation, with Prime Minister Narendra Modi as their avatar, one whose electoral victory was funded by big business. Hiro provides a gripping account of the role played by Indians who have settled in the United States and Britain since 1991 in boosting India's GDP. But he also highlights the negatives: the exponential growth in sleaze in the public and private sectors, the impoverishment of farmers, and the rise in urban slums. A masterful panorama, *The Age of Aspiration* covers the whole social spectrum of Indians at home and abroad.
