Distance Education Technologies in Asia Jon Baggaley,Tian Belawati,2010-11-10 In Asia,
Distance Education (DE) is providing major solutions in the areas of education and training.
DE methods that are standard in other parts of the world, however, have yet to
demonstrate their full potential in Asia. Covering nine DE projects by 39 researchers from
13 countries, this book analyses the DE scenario in Asia, the successes, the failures and the
reasons behind them. This book is a unique collation of the results of studies of educational
technologies across an extensive network of Asian countries. It also provides a useful
snapshot of DE's development in Asia in the early years of the 21st century. The surveys
reported cover different DE contexts, methodologies, and levels of generalisability, and add
to the existing scholarship on the subject by providing previously unavailable, firm evidence
about DE's prospects in Asia. The contributors give important recommendations that can be
translated into practical and political actions to help solve critical socio-economic problems
of Asia as well as other parts of the world.
