Policy and Practice in Asian Distance Education Tian Belawati,Jon Baggaley,2010-11-10 This book has been designed for the orientation and training of specialists in open and distance learning methods in Asia. It is the outcome of the collaborative PANdora research and development initiative (2005–08) between 24 open and distance learning (ODL) institutions, government departments and non-governmental organizations in 13 Asian countries. The guidelines in the book have been designed in modular form so that selected sections can be combined according to users' needs and translated into local languages in keeping with the PANdora network's open resources philosophy.

Distance Education Technologies in Asia Jon Baggaley,Tian Belawati,2010-11-10 In Asia, Distance Education (DE) is providing major solutions in the areas of education and training. DE methods that are standard in other parts of the world, however, have yet to demonstrate their full potential in Asia. Covering nine DE projects by 39 researchers from 13 countries, this book analyses the DE scenario in Asia, the successes, the failures and the reasons behind them. This book is a unique collation of the results of studies of educational technologies across an extensive network of Asian countries. It also provides a useful snapshot of DE's development in Asia in the early years of the 21st century. The surveys reported cover different DE contexts, methodologies, and levels of

generalisability, and add to the existing scholarship on the subject by providing previously unavailable, firm evidence about DE's prospects in Asia. The contributors give important recommendations that can be translated into practical and political actions to help solve critical socio-economic problems of Asia as well as other parts of the world.

Information Trapping Tara Calishain,2006-12-07 How many times have you run a Google search that resulted in thousands of results? With over 8 billion pages online and more posted every day, the Web more than likely contains the information you're looking for — if only you could find it. In Information Trapping: Real-Time Research on the Web, Internet-search-engine expert Tara Calishain makes researching more efficient and rewarding for anyone for whom the Web is an indispensable tool — academics, journalists, scientists, and professionals, as well as bloggers, genealogists, and hobbyists. She does so by teaching the latest techniques for building automated information-gathering systems. As an alternative to the typical one-time search for information, Tara demonstrates how readers can use RSS feeds, page monitoring tools, and other software to set up information streams of many different data types — from text to multimedia to conversations — for capture and review.
