Village View James Collins,Neil Gosling,2014-04-11 A year living on Symi, a Greek island. James' blog posts from 2013, edited and set out in printed form with images by Neil Gosling, take us through one whole year living on a small Greek island in southeast Greece. From winter storms to summer visitors, from photo walks to book signings, and from goats to shrimp festivals, Village View gives us an upfront, honest and mildly edited account of James and Neil's eleventh year on Symi. Symi's charm is in its people and the minutiae of their lives; James's great talent lies in his careful observation of the absurd and the amusing, the dramas and the difficulties, because nothing in Symi is ever simple, and in reporting what he sees with kind humour and a writer's eye for the details essential to lively travel writing. Anne Zouroudi, author of Bloomsbury's Greek Detective mysteries.

Innovative Internet Secrets Doug Knell,2018-01-11 There are so many secrets packed in here, I have to wonder if the Illuminati will have this author assassinated - Derrick Mennings, Marxist Internet Weekly Digest Written by an engineering expert with comprehensive knowledge of SEO marketing, computers, and the best Belgian beers to drink with them. Preview the book to enter enlightenment. Give Me A Couple Of Hours And I'll Turn You Into An Internet Wizard! There are other internet secrets books and they work as excellent paperweights and have some therapeutic benefits, too: you can use them to put you to sleep. This book is not to be equated with all those boring-as-all-hell books with dubious internet insights and SEO tips. Trust us: what you know about the internet isn't as much as you think you know. Beyond the basics, how clued in are you really about

the internet? You probably know more about Bangladesh (which ain't much, right?) than you do about web development, link building, and search engine optimization. The internet may play an integral role in our lives, yet in informal testing, close to 92% of internet users scored no more than basic competence with it. Less than 16% had any legitimate knowledge of SEO marketing. I can hear you from here: Basic competence is good enough for me. Why would I want or need to do more than that? You can use the Google or Bing search engine (but lazily, not with any genuine optimization), get around the Gmail and Hotmail interfaces, buy an airline ticket at Expedia, order a book at Amazon, and post an update at Facebook. Is that mastery when anyone can do that? Complacency never does anyone any favors. If the complacent had won out, we'd still believe the world is flat and airplane flight is impossible. Do you really need to be told that the internet is one of those things you cannot afford to be complacent about? Your livelihood, your identity, your social networks, your ability to distinguish yourself from the competition will all one day be measured by the breadth and depth of your internet skills. Development of the web hasn't stood still. Should your skills? Every single one of these internet secrets will shoot your internet productivity into the stratosphere and leave you head and shoulders above your peers. We're not naive to think you don't know any of these secrets, but we're confident you don't know about most of them. Any of these 100+ internet insights will more than make up for the book's cost

- * Keep your computer and other devices protected: the best anti-virus & malware tools internet tools you should install to keep your computer, mobile phone, and tablet from being crippled.
- * Set up sharable internet networks wherever you happen to be, like standing in front of Buckingham Palace.
- * Start building your favorite link bookmarks across all internet browsers and platforms.
- * Avoid internet scams.
- * Download and view internet videos offline. Video streaming sucks bandwidth from your 4G plan.
- * Keep your identity safe.
- * Transfer large files.
- * Set up online music libraries so you can listen to your music anywhere, anytime.
- * Shop on the internet for the absolute best prices.
- * View web sites optimally on any device.
- * Remember your passwords for any site and situation.
- * And much, much more.

Some of these internet secrets you could discover if you knew where to look, but it would take you months to collect the same knowledge you'll find here. Other internet tools we've picked up from years of experience. You won't find those gems anywhere else. Dump your other SEO books and for-idiots web development guides. You will not find another internet book this practical or enjoyable for any price. The new internet isn't going anywhere, but you should. Let's get going, with us as your guide along this infinitely more diverse Information Superhighway.

Practical Laboratory Automation Matheus C. Carvalho,2017-06-19 By closing the gap between general programming books and those on laboratory automation, this timely book makes accessible to every laboratory technician or scientist what has traditionally been restricted to highly specialized professionals. Following the idea of learning by doing, the book provides an introduction to scripting using AutoIt, with many workable examples based on real-world scenarios. A large portion of the book tackles the traditionally hard problem of instrument synchronization, including remote, web-based synchronization. Automated result processing, database operation, and creation of graphical user interfaces are also examined. Readers of this book can immediately profit from the new knowledge in terms of both increased efficiency and reduced costs in laboratory operation. Above all, laboratory technicians and scientists will learn that they are free to choose whatever equipment they desire when configuring an automated analytical setup, regardless of manufacturers suggested specifications.
