**Phone Coaching in Dialectical Behavior Therapy** Alexander L. Chapman,2018-11-08 Phone coaching is an important aspect to dialectical behavior therapy. In this book, the author focuses on why we do it, how to make it effective, and ways to avoid common pitfalls. The book gives clinicians clear principles and practical guidance on how to approach this aspect of treatment. For new coping strategies to make a difference in clients' lives, clients need to use and practice them in everyday situations. Phone coaching is designed to help clients do just this. Regardless of your treatment approach, therefore, the principles and strategies in this book will give you new ways to help clients learn and apply effective coping skills to learn more about themselves, manage stress, improve relationships, and work toward important goals--

**Telephone Calls** K.K. Luke,Theodossia-Soula Pavlidou,2002-12-20 Telephone conversation is one of the most common forms of communication in contemporary society. For the first time in human history, some people are spending as much time, if not more, talking on the telephone as they are on face-to-face conversations. The aims of this book are: to bring together in one volume research on telephone conversations in different languages, to compare and contrast people's methods of handling telephone conversational tasks in different communities, and to explore the relationship between telephone conversational practice and cultural settings. The papers are based on first-hand, naturally-occurring data obtained from a variety of languages, including Chinese, Dutch, English, French, German, Greek, Japanese, Korean, and Persian. Theoretical and methodological issues pertaining to research on telephone conversations are discussed.

Pragmatics of Space Andreas H. Jucker,Heiko Hausendorf,2022-09-20 This handbook provides a comprehensive overview of spatial configurations of language use and of language use in space. It consists of four parts. The first part covers the various practices of describing space through language, including spatial references in spoken interaction or in written texts, the description of motion events as well as the creation of imaginative spaces in storytelling. The second part surveys aspects of the spatial organization of face-to-face communication including not only spatial arrangements of small groups in interaction but also the spatial dimension of sign language and gestures. The third part is devoted to the communicative resources of constructed spaces and the ways in which these facilitate and shape communication. Part four, finally, is devoted to pragmatics across space and cultures, i.e. the ways in which language use differs across language varieties, languages and cultures.
