Calling My Name Liara Tamani, 2017-10-24 "Calling My Name is a treasure."—Nic Stone, New York Times—bestselling author of Dear Martin Calling My Name is a striking, luminous, and literary exploration of family, spirituality, and self—ideal for readers of Jacqueline Woodson, Jandy Nelson, Naomi Shihab Nye, and Sandra Cisneros. This unforgettable novel tells a universal coming-of-age story about Taja Brown, a young African American girl growing up in Houston, Texas, and deftly and beautifully explores the universal struggles of growing up, battling family expectations, discovering a sense of self, and finding a unique voice and purpose. Told in fifty-three short, episodic, moving, and iridescent chapters, Calling My Name follows Taja on her journey from middle school to high school. Literary and noteworthy, this is a beauty of a novel that captures the multifaceted struggle of finding where you belong and why you matter.

This Thing Called Music Victoria Lindsay Levine, Philip V. Bohlman, 2015-05-21 The most fundamental subject of music scholarship provides the common focus of this volume of essays: music itself. For the distinguished scholars from the field of musicology and related areas of the humanities and social sciences, the search for music itself—in its vastly complex and diverse forms throughout the world—characterizes the lifetime of reflection and writing by Bruno Nettl, the leading ethnomusicologist of the past generation. This Thing Called Music: Essays in Honor of Bruno Nettl salutes not only a great scholar and beloved teacher, but also a thinker whose search for the meaning and ontology of music has exerted a global influence. Editors Victoria Lindsay Levine and Philip V. Bohlman have gathered essays that represent the many dimensions of musical meaning, addressing some of the most critically important areas of music scholarship today. The social formations of musical communities play counterpoint to analytical studies; investigations into musical change and survival connect ethnography to history, offering a collection of essays that can serve as an invaluable resource for the intellectual history of ethnomusicology. Each chapter explores music and its meanings in specific geographic areas—North and South America, Europe, Asia, and the Middle East—crossing the boundaries of genre, repertory, and style to provide insight into the aesthetic zones of contact between and among the folk, classical, and popular musics of the world. Readers from all disciplines of music scholarship will find in this collection a proper companion in an era of globalization, when the connections that draw musicians and musical practices together are more sweeping than ever. Chapters offer models for detailed analysis of specific musical practices, while at the same time they make possible new methods of comparative study in the twenty-first century, together posing a challenge crucial to all musicians and scholars in search of "this thing called music."

Call Center Optimization Ger Koole,2013 This book gives an accessible overview of the role and potential of mathematical optimization in call centers. It deals extensively with all aspects of workforce management, but also with topics such as call routing and the scheduling of multiple channels. It does so without going into the mathematics, but by focusing on understanding its consequences. This way the reader will get familiar with workload forecasting, the Erlang formulas, simulation, and so forth, and learn how to improve call center performance using it. The book is primarily meant for call center professionals involved in planning and business analytics, but also call center managers and researchers will find it useful. There is an accompanying website which contains several online calculators.

Nelson's Foundational Bible Dictionary with the New King James Version Bible Katherine Harris,2014-06-10 The Bible was written for people to read, ponder, and understand. The message of God's love for humans transcends time, culture, and language. Nevertheless, readers of the Bible are often left with questions. The names sound strange to our ears, the geography is often unfamiliar, and we ask, Who was this person? Is he mentioned somewhere else in the Bible? When did this happen? Where did it happen? Is this a real city? Nelson's Foundational Bible Dictionary seeks to answer questions like these and many more. Features include: Every person mentioned in the Bible with biblical references and biographical information All animals and minerals mentioned in the Bible with definitions Modern equivalents of ancient geographical names Key theological terms with their various meanings and interpretations Common household items and occupations with cultural and historical information about life in ancient times In addition to the full Dictionary materials, the eBook version of Nelson's Foundational Bible Dictionary also contains an appendix of the full text of the New King James Version Bible. All verse references in the Dictionary are linked to that verse in the Bible so that you can easily navigate between the Dictionary and Bible text.

We Have Capture Thomas P. Stafford,Michael Cassutt,2014-01-14 What an amazing career. Tom Stafford attained the highest speed ever reached by a test pilot (28,547 mph), carried a cosmonaut's coffin with Soviet Secretary Leonid Brezhnev, led the team that designed the sequence of missions leading to the original lunar landing, and drafted the original specifications for the B-2 stealth bomber on a piece of hotel stationery. But his crowning achievement was surely his role as America's unofficial space ambassador to the Soviet Union during the darkest days of the Cold War. In this lively memoir written with Michael Cassutt, Stafford begins by recounting his early

successes as a test pilot, Gemini and Apollo astronaut, and USAF general. As President Nixon's stand-in at the 1971 Soviet funeral for three cosmonauts, he opened the door to the possibility of cooperation in space between Russians and Americans. Stafford's Apollo-Soyuz team was the first group of Americans to work at the cosmonaut training center, and also the first to visit Baikonur, the top-secret Soviet launch center, in 1974. His 17 July 1975 "handshake in space" with Soviet commander Alexei Leonov (who became a lifelong friend) proved to the world that the two opposing countries could indeed work successfully together. Stafford has continued in this leadership role right up to the present, participating in designing and evaluating the Space Shuttle, Mir, and the International Space Station. He is truly an American hero who personifies the broadest spirit of exploration and cooperation.
