General Kenney Reports: A Personal History of the Pacific War ,1997 General Kenney Reports is a classic account of a combat commander in action. General George Churchill Kenney arrived in the South- west Pacific theater in August 1942 to find that his command, if not in a shambles, was in dire straits. The theater commander, General Douglas MacArthur, had no confidence in his air element. Kenney quickly changed this situation. He organized and energized the Fifth Air Force, bringing in operational commanders like Whitehead and Wurtsmith who knew how to run combat air forces. He fixed the logistical swamp, making supply and maintenance supportive of air operations, and encouraging mavericks such as Pappy Gunn to make new and innovative weapons and to explore new tactics in airpower application. The result was a disaster for the Japanese. Kenney's airmen used air power-particularly heavily armed B-25 Mitchell bombers used as commerce destroyers-to savage Japanese supply lines, destroying numerous ships and effectively isolating Japanese garrisons. The classic example of Kenney in action was the Battle of the Bismarck Sea, which marked the attainment of complete Allied air dominance and supremacy over Japanese naval forces operating around New Guinea. In short, Kenney was a brilliant, innovative airman, who drew on his own extensive flying experiences to inform his decision-making. General Kenney Reports is a book that has withstood the test of time, and which should be on the shelf of every airman.

**Nutrition and Medical Practice** Lewis A. Barness, Yank D. Coble, Donald Ian MacDonald, George Christakis, 2012-12-06 All forms of life require food materials in certain minimum amounts to insure an active life and successful reproduction. Nutrition is concerned with what these materials are, how they function, what effects they have when absent and what happens to them when ingested. During the past two centuries such nutritional disorders as scurvy, beriberi, rickets and pellagra have been discovered, successfully treated and eradicated by physicians in developed countries. In this century, such noted researchers as Rose, Meyerhof and Krebs have contributed enormously to the field of nutrition. Currently, research is evolving new concepts and facts so rapidly that the average practitioner can hardly keep current, even in his own field of medicine. Bona fide research by universities and governmental agencies has produced voluminous information, much of which seems contradictory and therefore tends to confuse the general public, particularly in the area of potential carcinogens. This confusion has prompted consumer groups, politicians, and social welfarists to bring pressures and demands on medical schools and practitioners of medicine to increase their knowledge and concern in the field of nutrition. Taking advantage of and adding to this confusion are

the health food faddists and cultists, some only for monetary gain and others with a real religious zeal.

**Handbook of Motivational Counseling** W. Miles Cox, Eric Klinger, 2004-03-05 Motivation is a pervasive force that can affect well-being in a variety of life situations, from the more minor through to the ability to overcome addictions and other serious psychological problems. This book presents empirically supported theories (featuring current concerns theory), questionnaires based on these theories (highlighting the Motivational Structure Questionnaire) and varied interventions based on these, with special emphasis on Systematic Motivational Counselling but also including chapters on such approaches as Personality Systems Interaction Theory, expectancy-based approaches, Motivational Interviewing, logotherapy and several others.

There's a Future Nayef Al-Fodhan, 2013-04-16 The book presents eighteen essays that explore the future from very different perspectives, grouped under five overarching themes: Fundamentals, Science and Technology, The Environment, Global Society, and People. The final chapter details how BBVA is preparing itself for this new reality. The contributing authors are leaders of research and current practice in fields such as nanotechnology, urban design, ecology, demographics, education, and international relations in the globalised world. Presenting their arguments with rigor and objectivity, they reject fatalism and instead affirm their conviction that there is still time to build a better world for future generations.

The Vibrational Universe Kenneth James Michael MacLean, 2005-02-01 In a wide-ranging metaphysical discussion from consciousness, incarnation and death to politics, economics and science, the author describes a cooperative universe which responds to an individual's thoughts, and provides a user-friendly interface.

**The Business Plan Workbook** Colin Barrow, Paul Barrow, Robert Brown, 2012-04-03 Without a business plan no bank, venture capital house, or corporate parent will consider finance for start up, expansion or venture funding. The Business Plan Workbook is the essential guide to all aspects of business planning for entrepreneurs, senior executives and students alike. Based on methodology developed at Cranfield School of Management and using successful real-life business plans, The Business Plan Workbook brings together the process and procedures required to produce that persuasive plan. The case examples have been fully updated and include a cross section of businesses at various stages in their development, making the book invaluable reading for anyone in business - whatever their background.

**Regeneration of the Built Environment from a Circular Economy Perspective** Stefano Della Torre, Sara Cattaneo, Camilla Lenzi, Alessandra Zanelli, 2019-01-01 This open access book explores the strategic importance and advantages of adopting multidisciplinary and multiscale approaches of inquiry and intervention with respect to the built environment, based on principles of sustainability and circular economy strategies. A series of key challenges are considered in depth from a multidisciplinary perspective, spanning engineering, architecture, and regional and urban economics. These

challenges include strategies to relaunch socioeconomic development through regenerative processes, the regeneration of urban spaces from the perspective of resilience, the development and deployment of innovative products and processes in the construction sector in order to comply more fully with the principles of sustainability and circularity, and the development of multiscale approaches to enhance the performance of both the existing building stock and new buildings. The book offers a rich selection of conceptual, empirical, methodological, technical, and case study/project-based research. It will be of value for all who have an interest in regeneration of the built environment from a circular economy perspective.

The Boston Consulting Group on Strategy Carl W. Stern, Michael S.

Deimler, 2012-06-14 A collection of the best thinking from one of the most innovative management consulting firms in the world For more than forty years, The Boston Consulting Group has been shaping strategic thinking in business. The Boston Consulting Group on Strategy offers a broad and up-to-date selection of the firm's best ideas on strategy with fresh ideas, insights, and practical lessons for managers, executives, and entrepreneurs in every industry. Here's a sampling of the provocative thinking you'll find inside: You have to be the scientist of your own life and be astonished four times: at what is, what always has been, what once was, and what could be. The majority of products in most companies are cash traps . . . [They] are not only worthless, but a perpetual drain on corporate resources. Use more debt than your competition or get out of the business. When information flows freely, reputation, more than reciprocity, becomes the basis for trust. As a strategic weapon, time is the equivalent of money, productivity, quality, even innovation. When brands become business systems, brand management becomes far too important to leave to the marketing department. The winning organization of the future will look more like a collection of jazz ensembles than a symphony orchestra. Most of our organizations today derive from a model whose original purpose was to control creativity. Rather than being an obstacle, uncertainty is the very engine of transformation in a

business, a continuous source of new opportunities. IP assets lack clear property lines. Every bit of intellectual property you can own comes with connections to other valuable innovations.

**All for a Few Perfect Waves** David Rensin,2009-03-17 For twenty years, Miki Da Cat Dora was the king of Malibu surfers—a dashing, enigmatic rebel who dominated the waves, ruled his peers' imaginations, and who still inspires the fantasies of wannabes to this day. And yet, Dora railed against surfing's sudden post-Gidget popularity and the overcrowding of his once empty waves, even after this avid sportsman, iconoclast, and scammer of wide repute ran afoul of the law and led the FBI on a remarkable seven-year chase around the globe in 1974. The New York Times named him the most renegade spirit the sport has yet to produce and Vanity Fair called him a dark prince of the beach. To fully capture Dora's never-before-told story, David Rensin spent four years interviewing hundreds of Dora's friends, enemies, family members, lovers, and fellow surfers to uncover the untold truth about surfing's most outrageous practitioner, charismatic antihero, committed loner, and enduring mystery.
