Holding On to Reality Albert Borgmann, 2007-12-01 Holding On to Reality is a brilliant history of information, from its inception in the natural world to its role in the transformation of culture to the current Internet mania and its attendant assets and liabilities. Drawing on the history of ideas, the details of information technology, and the boundaries of the human condition, Borgmann illuminates the relationship between things and signs, between reality and information. [Borgmann] has offered a stunningly clear definition of information in Holding On to Reality. . . . He leaves room for little argument, unless one wants to pose the now vogue objection: I guess it depends on what you mean by nothing.—Paul Bennett, *Wired* A superb anecdotal analysis of information for a hype-addled age.—*New Scientist* This insightful and poetic reflection on the changing nature of information is a wonderful antidote to much of the current hype about the 'information revolution.' Borgmann reminds us that whatever the reality of our time, we need 'a balance of signs and things' in our lives.—Margaret Wertheim, *LA Weekly*

**Writing the Map of Anglo-Saxon England** Nicholas Howe, 2008-01-01 Eminent Anglo-Saxonist Nicholas Howe explores how the English, in the centuries before the Norman Conquest, located themselves both literally and imaginatively in the world. His elegantly written study focuses on Anglo-Saxon representations of place as revealed in a wide variety of texts in Latin and Old English, as well as in diagrams of holy sites and a single map of the known world found in British Library, Cotton Tiberius B v. The scholar's investigations are supplemented and aided by insights gleaned from his many trips to physical sites. The Anglo-Saxons possessed a remarkable body of geographical knowledge in written rather than cartographic form, Howe demonstrates. To understand fully their cultural geography, he considers Anglo-Saxon writings about the places they actually inhabited and those they imagined. He finds in Anglo-Saxon geographic images a persistent sense of being far from the center of the world, and he discusses how these migratory peoples narrowed that distance and developed ways to define themselves.

**Digital Knowledge Maps in Education** Dirk Ifenthaler, Ria Hanewald, 2013-11-01 Digital knowledge maps are 'at a glance' visual representations that enable enriching, imaginative and transformative ways for teaching and learning, with the potential to enhance positive educational outcomes. The use of such maps has generated much attention and interest among tertiary education practitioners and researchers over the last few years as higher education institutions around the world begin to invest heavily into new technologies designed to provide online spaces within which to build resources and conduct activities. The key elements of this edited volume will comprise original and innovative contributions to existing scholarship in this field, with examples of pedagogical possibilities as they are currently practiced across a range of contexts. It will contain chapters that address, theory, research and practical issues related to the use of digital knowledge maps in all aspects of tertiary education and draws predominantly on international perspectives with a diverse group of invited contributors. Reports on empirical studies as well as theoretical/conceptual chapters that engage deeply with pertinent questions and issues raised from a pedagogical, social, cultural, philosophical, and/or ethical standpoint are included. Systematic literature reviews dealing with digital knowledge mapping in education are also an integral part of the volume.

**Mapping European Empire** Russell Foster,2015-06-26 Empire and maps are mutually reliant phenomena and traceable to the dawn of civilisation. Furthermore, maps retain a supremely authoritative status as unquestioned reflections of reality. In today's image-saturated world, their influence is more powerful now than at any other time in history. This book argues that in the 21st century we are seeing an imperial renaissance in the European Union (EU), a political organisation which defies categorisation, but whose power and influence grows by the year. It examines the past, present, and future of the EU to demonstrate that empire is not a category of state but rather a collective imagination which reshapes history and appropriates an artificial past to validate the policies of the present and the ambitions of the future. In doing so, this book illuminates the imperial discourse that permeates the mass maps of the modern EU. This text will be of key interest to students and scholars of political science, EU Studies, Human Geography, European political history, cartography and visual methodologies and international relations.
