Electronic Art Roger F. Malina, W. Van der Plas, T. Hokken, J. den Biggelaar, 2013-10-22 Computers are more and more becoming creative tools in music as well as in the visual arts and design. In the last few years, it has become clear that digital technology provides a platform for multimedia productions as well as a medium for new art forms. Computer Music and Computer Graphics & Animation have their own international forums. The need was felt, however, to bring together the diverse disciplines within art and technology in one international event - the First International Symposium on Electronic Art (FISEA). The Symposium attracted considerable interest and hundreds of papers and proposals were submitted, of which a selection were accepted. This book, also published as a supplement to the journal Leonardo, publishes 20 of these selected papers under the editorship of Wim van der Plas, Ton Hokken and Johan den

Biggelaar. This richly illustrated issue on Electronic Art reflects the enormous international interest which FISEA generated and will further stimulate interest in applications of new technology in music, visual arts and design.

Upholstery Conservation: Principles and Practice Dinah Eastop, Kathryn Gill, 2012-09-10 This well referenced book provides an amply illustrated publication on upholstery conservation which discusses and reviews the issues related to the care, interpretation and treatment of upholstered furniture. Through many well illustrated case studies the inter-disciplinary collaboration fundamental to upholstery conservation, and the complex decision-making process involved in the treatment of upholstered furniture, are made evident. The case histories are contributed by leading international practitioners in the field and concern objects and collections in the care of English Heritage, the Victoria and Albert Museum, the Metropolitan Museum of Art and other internationally renowned institutions. Likewise, the contributors, from both sides of the Atlantic, are world-renowned specialists and leaders in this area of conservation working for the public and private sectors. The case histories, illustrated in

colour, black and white and specially prepared line drawings, concern object treatment and documentation, the conservation of information, the function and the artefact. They range from the documentation of eighteenth century removable chair covers and the treatment of a nineteenth century carriage to a twentieth century foam-filled chair belonging to a museum.
