Mobile Digital Art David Scott Leibowitz,2013-07-04 Learn how to create beautiful artwork on your iPad or iPhone. Over 65 expert artists from around the world will show you how they created their original art, from inspiration and conceptualization, to the creation of the final image. Using step-by-step examples and easy-to-follow tutorials, you'll learn how to create stunning images on your iPad or iPhone. Learn more about using the apps you already have, like Brushes, and discover new apps that will enhance your art creation like Sketchbook Mobile, Layers, Collage, Juxtaposer, Hiptamatic, and PhotoFX. Whether you are taking your first steps into digital art, or are an accomplished artist looking to broaden your skill set, Mobile Digital Art covers it all - how to turn photographs into oil paintings, design cartoons from scratch and create beautiful landscape vistas - all on your iPad or iPhone.

The Camera as Actor Amy Cox Hall,2020-11-29 Looking beyond the impact photographs have on the perpetuation and expression of social norms and stereotypes, and the influence of the act of taking a photograph, this new collection brings together international scholars to examine the camera itself as an actor. Bringing the camera back into view, this volume furthers our understanding of how, and in what ways, imaging technology shapes us, our lives, and the representations out of which we fashion knowledge, base our judgments and ultimately act. Through a broad range of case studies, the authors in this collection make the convincing claim that the camera is much more than a mechanical device brought to life by the photographer. This book will be of interest to scholars in photography, visual culture, anthropology and the history of photography.

Person Re-Identification with Limited Supervision Rameswar Panda,Amit K. Roy-Chowdhury,2022-06-01 Person re-identification is the problem of associating observations of targets in different non-overlapping cameras. Most of the existing learning-based methods have resulted in improved performance on standard re-identification benchmarks, but at the cost of time-consuming and tediously labeled data. Motivated by this, learning person re-identification models with limited to no supervision has drawn a great deal of attention in recent years. In this book, we provide an overview of some of the literature in person re-identification, and then move on to focus on some specific problems in the context of person re-identification with limited supervision in multi-camera environments. We expect this to lead to interesting problems for researchers to consider in the future, beyond the conventional fully supervised setup that has been the framework for a lot of work in person re-identification. Chapter 1 starts with an overview of the problems in person re-identification and the major research directions. We provide an overview of the prior works that align most closely with the limited supervision theme of this book. Chapter 2 demonstrates how global camera network constraints in the form of consistency can be utilized for improving the accuracy of camera pair-wise person re-identification models and also selecting a minimal subset of image pairs for labeling without compromising accuracy. Chapter 3 presents two methods that hold the potential for developing highly scalable systems for video person re-identification with limited supervision. In the one-shot setting where only one tracklet per identity is labeled, the objective is to utilize this small labeled set along

with a larger unlabeled set of tracklets to obtain a re-identification model. Another setting is completely unsupervised without requiring any identity labels. The temporal consistency in the videos allows us to infer about matching objects across the cameras with higher confidence, even with limited to no supervision. Chapter 4 investigates person re-identification in dynamic camera networks. Specifically, we consider a novel problem that has received very little attention in the community but is critically important for many applications where a new camera is added to an existing group observing a set of targets. We propose two possible solutions for on-boarding new camera(s) dynamically to an existing network using transfer learning with limited additional supervision. Finally, Chapter 5 concludes the book by highlighting the major directions for future research.

Lomo Thomas Q. Napper,2002-08-06 The Lomo camera, an icon of mid-20th century design, is perceived as unable to take a bad picture, due to the unique, glass lens and capability for handling low-light levels. This antidote to all things digital and slick has found a vast international following of people who use it to document every aspect of their lives. This has spawned fan clubs and competitions the world over, culminating in the 2001 final in Cuba. This work features many images by keen lomographers, alongside facts, figures, anecdotes and ravings. It charts the visual language, history and lifestyle of this unique cult, an extraordinary camera and its global audience.

This Book Is a Camera Kelli Anderson,2015-11-20 This is a working camera that pops up from the pages of a book..The book concisely explains--and actively demonstrates--how a structure as humble as a folded piece of paper can tap into the intrinsic properties of light to produce a photograph.The book includes:- a piece of paper folded into a working 4x5 camera- a lightproof bag- 5 sheets of photo-paper film- development instructions (from complete DIY to outsource it)- a foil-stamped cover- a satisfying demonstration of the connection between design & science / structures & functions

The Best Camera Is The One That's With You Chase Jarvis,2009-09-18 A beacon of creativity with boundless energy, Chase Jarvis is well known as a visionary photographer, director, and social artist. In *The Best Camera Is The One That's With You*, Chase reimagines, examines, and redefines the intersection of art and popular culture through images shot with his iPhone. The pictures in the book, all taken with Chase's iPhone, make up a visual notebook—a photographic journal—from the past year of his life. The book is full of visually-rich iPhone photos and peppered with inspiring anecdotes. Two megapixels at a time, these images have been gathered and bound into a book that represents a stake in the ground. With it, Chase underscores the idea that an image can come from any camera, even a mobile phone. As Chase writes, "Inherently, we all know that an image isn't measured by its resolution, dynamic range, or anything technical. It's measured by the simple—sometimes profound, other times absurd or humorous or whimsical—effect that it can have upon us. If you can see it, it can move you." This book is geared to inspire everyone, regardless of their level of photography knowledge, that you can capture moments and share them with our friends, families, loved ones, or the world at the press of a button. Readers of *The Best Camera Is The One That's With You* will also enjoy the iPhone application Chase Jarvis created in conjunction with this book, appropriately named Best Camera. Best Camera has a unique set of filters and effects that can be applied at the touch of a button. Stack them. Mix them. Remix them. Best Camera also allows you to share directly to a host of social marketing sites via www.thebestcamera.com, a new online community that allows you to contribute to a living, breathing gallery of the best iPhone photography from around the globe. Together, the book, app, and website, represent a first-of-its-kind ecosystem dedicated to encouraging creativity through picture taking with the camera that you already have. *The Best Camera Is The One That's With You*—shoot!

A Beautiful Catastrophe Bruce Gilden, 2005 New York City, the unique metropolis that Le Corbusier has called a beautiful catastrophe, 'is a natural home to Bruce Gilden. Since 1981, Gilden has been roaming the streets of the city, capturing its characters and eccentricities with his confrontational, highly energetic style and exuberant vision. In this new opus, *A Beautiful Catastrophe*, Magnum photographer Bruce Gilden celebrates a trademark style with abandon, firmly ensconcing him in the pantheon of New York City photographic poets.'

The Figital Revolution Stephen Schaub, Eve O. Schaub, 2007-09 Are you disillusioned by the current photographic market? Frustrated by the absurd claims of analog and digital proponents alike? Ready to throw in the towel? Then the Figital Revolution is for you. FIGITAL stands for the dynamic fusion of film and digital photographic technologies. The Figital Revolution transcends self-serving industry hype and old-fart conservatism to get at the real issues photographers face today: how did we get here? Is digital all it's cracked up to be? Why is film on life support? How can photographers create a sustainable art? Why do most photo magazines suck? The Figital Revolution is about all that and more. Remember: movement does not equal progress. Yes comrades- the revolution has begun!

Tokyo Camera Style John Sypal, 2015-02-10 Unique portraits of Japanese photography fanatics and their gear from the trendsetting Tokyo Camera Style blog Founded in 2008, John Sypal's blog, Tokyo Camera Style, has a devoted and passionate international following and has inspired a network of similar blogs worldwide. In street portraits taken on the fly, we see Tokyo's film-camera enthusiasts posing with their favorite photographic equipment. The images not only catalog the amazing range of cameras used by the most obsessive photography geeks but also offer a glimpse into a street culture where the photograph means everything and the camera takes center stage. Now, 300 of Sypal's colorful photographs of weird and wonderful cameras and their creative owners have been gathered together in a one-of-a-kind book. Often taken from above, with the camera owners' faces out of view, the images show telling details that might otherwise have been missed: the clothes, the jewelry, hands and feet, shoes and socks, customized camera straps, and other photography-related paraphernalia. Beyond the wonderful selection of rare, customized, and vintage analog camera makes, models, and lenses are portraits of the individual personalities who make up the avid street photography scene in Japan.
