The January 6th Report Select Committee to Investigate the January 6th Attack on the United States Capitol,David Remnick,Jamie Raskin,2022-12-23 ****THE INSTANT NEW YORK TIMES BESTSELLER**** NOTE: The January 6th Report appendices on pages 693–716 can be accessed via the QR code below, along with the hyperlinks from the chapter endnotes and witness testimony transcripts. In a resolution six months later, the House of Representatives called it one of the darkest days of our democracy, and established a special committee to investigate how and why the attack happened. Celadon Books, in collaboration with The New Yorker, presents the committee's final report, the definitive account of January 6th and what led up to it, based on more than a year of investigation by nine members of Congress and committee staff,

with a preface by David Remnick, the editor of The New Yorker and a winner of the Pulitzer Prize, and an epilogue by Congressman Jamie Raskin of Maryland, a member of the committee.

Sensors in Agriculture Dimitrios Moshou,2019-06-12 Agriculture requires technical solutions for increasing production while lessening environmental impact by reducing the application of agro-chemicals and increasing the use of environmentally friendly management practices. A benefit of this is the reduction of production costs. Sensor technologies produce tools to achieve the abovementioned goals. The explosive technological advances and developments in recent years have enormously facilitated the attainment of these objectives, removing many barriers for their implementation, including the reservations expressed by farmers. Precision agriculture and 'smart farming' are emerging areas where sensor-based technologies play an important role. Farmers, researchers, and technical manufacturers are joining their efforts to find efficient solutions, improvements in production, and reductions in costs. This book brings together recent research and

developments concerning novel sensors and their applications in agriculture. Sensors in agriculture are based on the requirements of farmers, according to the farming operations that need to be addressed.
