Canada's Laws on Import and Export Mohan A. Prabhu,2014 This book provides a comprehensive overview of legislation dealing with customs, customs tariffs, free trade agreements, anti-dumping measures, prohibited subsidies, Kimberley Process, cultural property, and other statutes regulating Canada's international trade. Important illustrative decisions of the Canadian International Trade Tribunal and of the courts, as well as decisions of the NAFTA and WTO panels, are discussed to aid understanding of the interpretation by these bodies of statutory provisions. The book will be of special interest to importers, foreign exporters, customs brokers, trade law practitioners, and those engaged in international trade and commerce, as well as to Canada's current and potential free trade partner countries. The author's previous works in this field include eleven editions of the Annotated Customs Act(Carswell, 1991-2012), and three editions of Customs and Excise Laws of Canada(Carswell, 1983-2004) in 8 CED (Ontario).

Export Control Law and Regulations Handbook Yann Aubin,Arnaud Idiart,2016-05-15 The importance of export control laws and regulations in international trade continues to grow, not only because of the increase in world trade and technology dispersion, but also due to concerns surrounding national and regional stability and the risk of terrorism. Accordingly, familiarity with export control laws and regulations around the world has become extremely important for those involved in the international trade of dual-use or military goods, technology, and services. In this preeminent handbook, now in its third edition, two experienced professionals have gathered contributions from expert practitioners and academics. The third edition adds three new country chapters (Brazil, Israel, and Sweden) and a new separate chapter on sanctions and embargoes. In addition to chapters on the international regime in general, the book provides a practical overview of the export/import control regimes covering defence and dual-use goods and services in fourteen key jurisdictions. Country reports each follow the same structure for easy comparison. Issues and topics covered include the following and much more: • import/export legal and regulatory requirements for controlled goods and services; • sanctions for breach of such requirements (civil, administrative, or criminal); • licence application processes; • arms, dual-use and other products embargo (including chemical and biological materials and technology); and • enforcement measures. The Handbook also makes available, through an online application, all important standard export control-related forms, templates, and other related documents, all of which readers can use to draft their own documents. The Handbook is invaluable to any professional (such as lawyers, compliance key players, procurement, logistics, finance and customs practitioners) working in relation to an organisation with a need to know the specific requirements to be followed for the efficient - and legally compliant - import or export of controlled military or dual-use goods, technologies or services.

Canadian Controls on the Export of Arms and Strategic Goods Jean-François

Rioux, Canadian Institute for International Peace and Security, 1991 Like many countries, Canada regulates the export of weapons and technologies which could be used for military purposes. Such regulation is broadly referred to as the 'control of strategic exports'. Western countries have, individually and collectively, developed rules of conduct on trade in strategic products. Since the end of the Cold War and the conflict with Iraq, these control policies have become the subject of a general review. This document discusses the history of strategic export controls, principles governing the control of strategic exports, Canadian legislation and controls on strategic exports, principal restrictions on Canadian strategic exports at the present time, and the current debate on the control of strategic exports.
