Biomedical Organizations Dale Stirling, 2012-10-12 Determine what

organizations have issued position statements on a specific subject! A position document establishes the view of an organization based on its knowledge on the subject at that specific time. Biomedical Organizations: A Worldwide Guide to Position Documents puts the results of a survey of hundreds of global medical organizations and their position statements at your fingertips. This comprehensive reference not only analyzes and discusses the history and characteristics of the creation and development of the organizational position statement, but also lists medical organizations and their Web site addresses, and presents an alphabetical index of their position statements. Indexed according to subject as well as by organization, this one-of-a-kind source allows readers to determine what organizations have issued position documents on a specific subject such as alcoholism or HIV, as well as providing an appendix listing biomedical organizations without position documents. Over several years the author compiled this extensive index, which is designed to help physicians, fellows, residents, interns, medical students, and paramedical personnel to drastically cut their research time. Information can be found with ease quickly, as the index lists organizations by country, medical practice areas, and the core areas of interest of each organization. Ideally suited as a hands-on reference text in clinics, hospitals, and medical libraries, this reference cuts through the overwhelming mountain of information to give medical professionals exactly the information they are searching for while providing a historical account

of position documents, their growth, their continued use, and their efficacy. Biomedical Organizations: A Worldwide Guide to Position Documents reveals the organizations with position statements on a wide variety of subjects, such as: abortion AIDS cancer diabetes homosexuality immunization long-term care mental retardation midwives malpractice nutrition ozone the Persian Gulf war pharmaceuticals pollution radon tissue transplants violence and hundreds of others! Biomedical Organizations: A Worldwide Guide to Position Documents is a timesaving reference helpful to medical professionals, students, educators, and professional medical organizations.

Policy Change, Courts, and the Canadian Constitution Emmett Macfarlane, 2018-01-01 Policy Change, Courts, and the Canadian Constitution aims to further our understanding of judicial policy impact and the role of the courts in shaping policy change. Bringing together a group of political scientists and legal scholars, this volume delves into a diverse set of policy areas, including health care issues, the regulation of elections, criminal justice policy, minority language education, citizenship, refugee policy, human rights legislation, and Indigenous policy. While much of the public law and judicial politics literatures focus on the impact of the constitution and the judicial role, scholarship on courts that makes policy change its central lens of analysis is surprisingly rare. Multidisciplinary in its approach to examining policy issues, this book focuses on specific cases or policy issues through a wide-ranging set of approaches, including

the use of interview data, policy analysis, historical and interpretive analysis, and jurisprudential analysis.

Health Systems in Transition Gregory Marchildon, The health care system in Canada is much-discussed in the international sphere, but often overlooked when it comes to its highly decentralized administration and regulation. Health Systems in Transition: Canada provides an objective description and

analysis of the public, private, and mixed components that make up health care in Canada today including the federal, provincial, intergovernmental and regional dynamics within the public system. Gregory P. Marchildon's study offers a statistical and visual description of the many facets of Canadian health care financing, administration, and service delivery, along with relevant comparisons to five other countries' systems. This second edition includes a major update on health data and institutions, a new appendix of federal laws concerning select provincial and territorial Medicare legislation, and, for the first time, a comprehensive and searchable index. It also provides a more complete assessment of the Canadian health system based on financial protection, efficiency, equity, user experience, quality of care, and health outcomes. Balancing careful assessment, summary, and illustration, *Health Systems in Transition: Canada* is a thorough and illuminating look at one of the nation's most complex public policies and associated institutions.

Harris,1976-12-15 This book traces the development of higher education in Canada, through a detailed description and analysis of what was being taught and of the research opportunities available to professors in the years from 1860 to 1960. Background is provided in the opening chapters of Part I, which outline the origins of post-secondary education in both French and English Canada from 1635 to 1860, and in the parallel chapters of Parts II to V which describe the establishment of new and the growth of existing institutions during the period 1861-90, 1891-1920, 1921-40, and 1941-60. The remaining chapters of each of the book's main divisions present an examination of the curricula in arts and science, professional education, and graduate studies in 1860, 1890, 1920, 1940, and 1960, as well as the conditions pertaining to

scholarship and research in these years. The concluding chapter identifies the characteristics which differentiate Canadian higher education from that of other countries. The book includes a full bibliography, an extensive index, and statistical appendices providing data on enrolment and degrees granted. A History of Higher Education in Canada 1663-1960 will be the definitive work in its field, valuable both for the wealth of information and the historical insights it contains.
