It is a must-read for every existing or potential homeowner and it meticulously debunks the myths about mortgage brokers that are designed to mislead you. Canadian Mortgage Payments Stephen S. Solomon, Clifford W. Marshall, Martin Pepper, 2003-05-01 This set of tables eliminates need for calculation and gives readers at-a-glance data on a range of standard and adjustable mortgage rates, loan balance reduction and time periods that reflect current real estate prices, and mortgages available in Canada today. The Postwar Canadian Housing and Residential Mortgage Markets and the Role of Government Lawrence Berk Smith, 1974 This study describes the organization and operation of the postwar Canadian housing and residential mortgage markets and investigates the role of and scope for government policy in these markets. There are three main sections. The first investigates the behaviour of the housing market and structural relationships within it, and quantifies these relationships through the development of an econometric model. The single and multiple dwelling sectors are analysed separately, and considerable attention is paid to the factors affecting both housing demand and supply. The housing model is then used to explain the long-run and cyclical variations in residential construction activity on a period-by-period basis. The residential mortgage market is examined in the second section. The main participants are described and their mortgage investment behaviour is analysed in terms of both their portfolio investment decisions and their net inflows of funds. The factors influencing the supply of mortgage credit are integrated with demand factors to explain the determination of mortgage rates, and simulations are conducted to indicate the

interest sensitivity of mortgage flows for the major lending institutions. The third section focuses upon government policy in the housing and mortgage markets using the models previously developed. The major government programs are analysed, and simulation experiments run to quantify their effects. The book concludes with a discussion of the trade-off between policies directed towards housing objectives and those directed toward general economic stability. This work should be helpful to students of Canadian housing and mortgage markets and to economists who are interested in more than cursory knowledge of the area. Policy-makers should also find it useful because it provides an in-depth analysis of past housing and mortgage market policy, and describes the framework and market structure within which future policies will operate.

Mortgage Freedom Alexander Aitken, Sandy Aitken, 2011-03-15 Mortgage Freedom will save the average Canadian homeowner tens of thousands of dollars and help shave years off the mortgage. In this book Alexander Aitken offers readers a comprehensive method to structure their debt in a way that will provide tax deductions and tax refunds for most Canadians. The book explains - the type of mortgage required, - ways to accelerate the plan, - the investments used, - how to use tax refunds, - recent tax rulings, - and much more. In the simplest terms, Canadian homeowners make regular mortgage payments, which creates home equity. That equity can be borrowed back in a line of credit and used for investment purposes. Interest on an investment line of credit is tax-deductible and the tax refunds, along with the net income from these investments, can be used to pay off a mortgage much faster. Foreword by Jonathan Chevreau.

Show Me the Money Vladimir Klyuev, 2008 This paper examines access to business finance by Canadian small and medium-sized enterprises (SMEs) and to housing finance by Canadian households (particularly non-prime borrowers) against the background of a fairly concentrated and protected banking industry. It finds access broadly adequate for the former group. However, given the dominance of the large banks and their fairly low risk tolerance, financing of riskier projects is a challenge. Problems with venture capital, plausibly related to the prevalence of tax-advantaged labor-sponsored funds, exacerbate the situation for the most innovative SMEs. The paper also finds the market for housing finance to be highly advanced and sophisticated. However, non-prime mortgage financing is in its infancy in Canada, and further development of that sector (while avoiding the excesses that beset the U.S. market in the last few years) would be beneficial. More broadly, despite recent innovations, options available to Canadians for financing house purchases are still somewhat limited, with scarce availability of mortgage maturities beyond five years particularly surprising. Further advances in securitization could help progress in both of these areas.

Competition in the Canadian Mortgage Insurance Industry G. Frank Mathewson, Canada Mortgage and Housing Corporation, 1985 The objective of the report is to present alternatives open to the government to encourage competition in the mortgage insurance industry. The principal focus of the report concerns CMHC's exit from the market conditional on the forecast of reduced demand for mortgage insurance. The author asserts that the presence of a publicly-subsidized product exerts anti-competitive effects on the market. In addition, the market is viewed as being non-contestable,

primarily due to the long-term nature of the liability, and regulatory restrictions which impede mobility into and out of the industry. Since contestability is negatively linked to the degree of sunkenness in fixed costs, the report concludes that the only way to render the market contestable would be for the government to underwrite those costs, and hold sufficient capacity to rent necessary capital to potential entrants at prevailing market prices.
