Limits of Computation Bernhard Reus,2016-03-25 This textbook discusses the most fundamental and puzzling questions about the foundations of computing. In 23 lecture-sized chapters it provides an exciting tour through the most important results in the field of computability and time complexity, including the Halting Problem, Rice's Theorem, Kleene's Recursion Theorem, the Church-Turing Thesis, Hierarchy Theorems, and Cook-Levin's Theorem. Each chapter contains classroom-tested material, including examples and exercises. Links between adjacent chapters provide a coherent narrative. Fundamental results are explained lucidly by means of programs written in a simple, high-level imperative programming language, which only requires basic mathematical knowledge. Throughout the book, the impact of the presented results on the entire field of computer science is emphasised. Examples range from program analysis to networking, from database programming to popular games and puzzles. Numerous biographical footnotes about the famous scientists who developed the subject are also included. Limits of Computation offers a thorough, yet accessible, introduction to computability and complexity for the computer science student of the 21st century.

Who's in the Game? Terri Toles Patkin,2020-11-20 Some board games--like Candy Land, Chutes & Ladders, Clue, Guess Who, The Game of Life, Monopoly, Operation and Payday--have popularity spanning generations. But over time, updates to games have created significantly different messages about personal identity and evolving social values. Games offer representations of gender, sexuality, race, ethnicity, religion, age, ability and social class that reflect the status quo and respond to social change.Using popular mass-market games, this rhetorical assessment explores board design, game implements (tokens, markers, 3-D elements) and playing instructions. This book argues the existence of board games as markers of an ever-changing sociocultural framework, exploring the nature of play and how games embody and extend societal themes and values.

My Angel's Gem Crystal Belle,Theresa Jade, Nothing was as it seemed at first in this contemporary, heartwarming tale of a young woman who had come to a point in her life where everything was going downhill. Having to deal with an injured, petulant younger sister, a morose, grieving mother, and a recent breakup, Georgie Greene had only one choice left: to cope as best she could in her own way. She had thought the trip to her grandparent's ranch up north, supposedly for the benefit of her sister, would be nothing more than revisiting painful old memories. Little did she know that she would come to learn of a heart-wrenching secret her grandparents had thus far kept from the family. Apart from that was her family's mysterious involvement with the gorgeous-looking, impertinent ranger whose face she could not get out of her head. Just when things were starting to look up, she was tossed into a whirlpool of disconcerting circumstances which threatened to send her spirits plummeting once more. Would she get her life back on track, and perhaps, even kindle a little romance anew? She knew the man she wanted, but did he want her, now that he was holding the other woman's hand sparkling with a diamond ring?

August Wilson's Gem of the Ocean August Wilson,2015-09 Set in 1904, August Wilson's Gem of the Ocean begins on the eve of Aunt Esther's 287th birthday. When Citizen Barlow comes to her Pittsburgh's Hill District home seeking asylum, she sets him off on a spiritual journey to find a city in the middle of the Atlantic Ocean. Gem of the Ocean is the ninth work in Wilson's ten-play cycle that has recorded the American Black experience and helped to define generations. The Broadway run starred Tony Award winner Phylicia Rashad as Aunt Esther.
