### **Small Cities with Big Dreams** Greg Richards, Lian Duif, 2018-07-20

How can small cities make an impact in a globalizing world dominated by 'world cities' and urban development strategies aimed at increasing agglomeration? This book addresses the challenges of smaller cities trying to put themselves on the map, attract resources and initiate development. Placemaking has become an important tool for driving urban development that is sensitive to the needs of communities. This volume examines the development of creative placemaking practices that can help to link small cities to external networks, stimulate collaboration and help them make the most of the opportunities presented by the knowledge economy. The authors argue that the adoption of more strategic, holistic placemaking strategies that engage all stakeholders can be a successful alternative to copying bigger places. Drawing on a range of examples from around the world, they analyse small city development strategies and identify key success factors. This book focuses on the case of 's-Hertogenbosch, a small Dutch city that used cultural programming to link itself to global networks and stimulate economic, cultural, social and creative development. It advocates the use of cultural programming strategies as a more flexible alternative to traditional top-down planning approaches and as a means of avoiding copying the big city. *Diplomacy's Value* Brian C. Rathbun, 2014-10-31 What is the value of diplomacy? How does it affect the course of foreign affairs independent of the distribution of power and foreign policy interests? Theories of international relations too often implicitly reduce the dynamics and outcomes of diplomacy to structural factors rather than the subtle qualities of negotiation. If diplomacy is an independent effect on the conduct of world politics, it has to

add value, and we have to be able to show what that value is. In *Diplomacy's Value*, Brian C. Rathbun sets forth a comprehensive theory of diplomacy, based on his understanding that political leaders have distinct diplomatic styles—coercive bargaining, reasoned dialogue, and pragmatic statecraft. Drawing on work in the psychology of negotiation, Rathbun explains how diplomatic styles are a function of the psychological attributes of leaders and the party coalitions they represent. The combination of these styles creates a certain spirit of negotiation that facilitates or obstructs agreement. Rathbun applies the argument to relations among France, Germany, and Great Britain during the 1920s as well as Palestinian-Israeli negotiations since the 1990s. His analysis, based on an intensive analysis of primary documents, shows how different diplomatic styles can successfully resolve apparently intractable dilemmas and equally, how they can thwart agreements that were seemingly within reach.

### **Can Blockchain Revolutionize International Trade?**

Emmanuelle Ganne, 2018 Trade has always been shaped by technological innovation. In recent times, a new technology, Blockchain, has been greeted by many as the next big game-changer. Can Blockchain revolutionize international trade? This publication seeks to demystify the Blockchain phenomenon by providing a basic explanation of the technology. It analyses the relevance of this technology for international trade by reviewing how it is currently used or can be used in the various areas covered by WTO rules. In doing so, it provides an insight into the extent to which this technology could affect cross-border trade in goods and services, and intellectual property rights. It discusses the potential of Blockchain for reducing trade costs and enhancing supply chain transparency as well as the opportunities it provides for small-scale producers and companies. Finally, it reviews various challenges that must be addressed before the technology can be used on a wide scale and have a significant impact on international trade.

Monstrous Liminality Robert G. Beghetto, 2022-01-24 This book examines the transformation of the figure of the stranger in the literature of the modern age in terms of liminality. As a 'spectral monster' that has a paradoxical and liminal relationship to both the sacred and the secular, the figure of the modern stranger has played a role in both adapting and shaping a culturally determined understanding of the self and the other. With the advent of modernity, the stranger, the monster, and the spectre became interconnected. Haunting the edges of reason while also being absorbed into 'normal' society, all three, together with the cyborg, manifest the vulnerability of an age that is fearful of the return of the repressed. Yet these figures can also become re-appropriated as positive symbols, able to navigate between the dangerous and chaotic elements that threaten society while serving as precarious and ironic symbols of hope or sustainability. The book shows the explanatory potential of focusing on the resacralizing – in a paradoxical and liminal manner – of traditionally sacred concepts such as 'messianic' time and the 'utopian,' and the conflicts that emerged as a result of secularized modernity's denial of its own hybridization. This approach to modern literature shows how the modern stranger, a figure that is both paradoxically immersed and removed from society, deals with the dangers of failing to be re-assimilated into mainstream society and is caught in a fixed or permanent state of liminality, a state that can ultimately lead to boredom, alienation, nihilism, and failure. These 'monstrous' aspects of liminality can also be rewarding in that traversing difficult and paradoxical avenues they confront both traditional and contemporary viewpoints, enabling new and fresh perspectives suspended between imagination and reality, past and future, nature and artificial. In many ways, the modern stranger as a figure of literature and the cultural imagination has become more complicated and challenging in the (post)modern contemporary age, both clashing with and encompassing people who go beyond simply the psychological or even spiritual inability

to blend in and out of society. However, while the stranger may be altering once again the defining or essentializing the figure could result in the creation of other sets of binaries, and thereby dissolve the purpose and productiveness of both strangeness and liminality. The intention of "Monstrous Liminality" is to trace the liminal sphere located between the secular and sacred that has characterized modernity itself. This space has consequently altered the makeup of the stranger from something external, into a figure far more liminal, which is forced to traverse this uncanny space in an attempt to find new meanings for an age that is struggling to maintain any.

The Shadow of the Sun Ryszard Kapuscinski, 2011-05-25 A moving portrait of Africa from Poland's most celebrated foreign correspondent - a masterpiece from a modern master. Famous for being in the wrong places at just the right times, Ryszard Kapuscinski arrived in Africa in 1957, at the beginning of the end of colonial rule - the sometimes dramatic and painful, sometimes enjoyable and jubilant rebirth of a continent. The Shadow of the Sun sums up the author's experiences (the record of a 40-year marriage) in this place that became the central obsession of his remarkable career. From the hopeful years of independence through the bloody disintegration of places like Nigeria, Rwanda and Angola, Kapuscinski recounts great social and political changes through the prism of the ordinary African. He examines the rough-and-ready physical world and identifies the true geography of Africa: a little-understood spiritual universe, an African way of being. He looks also at Africa in the wake of two epoch-making changes: the arrival of AIDS and the definitive departure of the white man. Kapuscinski's rare humanity invests his subjects with a grandeur and a dignity unmatched by any other writer on the Third World, and his unique ability to discern the universal in the particular has never been more powerfully displayed than in this work.

**Fiasco** Stanislaw Lem, 2012-07-18 "A stunningly inventive

fantasy about cosmic travel” from the Kafka Prize-winning author of *Solaris* (The New York Times). The *Hermes* explorer ship represents the epitome of Earth’s excellence: a peaceful mission sent forth to make first contact with an alien civilization, and to use the expansive space technology developed by humanity to seek new worlds, friendships, and alliances. But what its crew discovers on the planet Quinta is nothing like they had hoped. Locked in a seemingly endless cold war among themselves, the Quintans are uncommunicative and violent, refusing any discourse—except for the firing of deadly weapons. The crew of the *Hermes* is determined to accomplish what they had set out to do. But the cost of learning the secrets hidden on the silent surface of Quinta may be grave. Stark, startling, and insightful, *Fiasco* has been praised by *Publishers Weekly* as “one of Lem’s best novels.” It is classic, thought-provoking hard science fiction, as prescient today as when it was first written.

*Spacecraft Operations* Florian Sellmaier, Thomas Uhlig, Michael Schmidhuber, 2022-06-14 This book describes the basic concepts of spacecraft operations for both manned and unmanned missions. The first part of the book provides a brief overview of the space segment. The next four parts deal with the classic areas of space flight operations: mission operations, communications and infrastructure, the flight dynamics system, and the mission planning system. This is followed by a part describing the operational tasks of the various subsystems of a classical satellite in Earth orbit. The last part describes the special requirements of other mission types due to the presence of astronauts, the approach of a satellite to another target satellite, or leaving Earth orbit in interplanetary missions and landing on other planets and moons. The 2nd edition is published seven years after the first edition. It contains four new chapters on flight procedures, the human factors, ground station operation, and software and systems. In addition, several chapters have been extensively expanded. The entire book has been brought up to date and the

language has been revised. This book is based on the “Spacecraft Operations Course” held at the German Space Operations Center. However, the target audience of this book is not only the participants of the course, but also students of technical and scientific courses, as well as technically interested people who want to gain a deeper understanding of spacecraft operations.

The SAGES / ERAS® Society Manual of Enhanced Recovery Programs for Gastrointestinal Surgery Liane S. Feldman, Conor P. Delaney, Olle Ljungqvist, Francesco Carli, 2015-08-31 This volume presents a comprehensive, up to date and practical approach to creating an ERAS program for GI surgery. The first sections review the evidence underlying individual elements of ERAS, including evidence from laparoscopic procedures when available or pointing to evidence gaps where more research is required. These are written by experts in the field, including surgeons, anesthesiologists, nurses, and physiotherapists. The format is in the style of a narrative review, with narrative evidence review, and concluding with a table with “take home messages” and 3-5 key references for readers interested in more depth in each topic. Each chapter also addresses management of common complications and patient selection or exceptions. Subsequent chapters address practical concerns, including creation of a pathway team, project management and engaging administration. Experts contribute real-world examples of their pathways for a variety of procedures, including colorectal surgery, bariatric surgery, upper GI and hepatobiliary surgery, enabling the user to have a starting point for creating their own programs. The SAGES Manual of Enhanced Recovery Programs for Gastrointestinal Surgery will be of great value to fully trained surgeons, anesthesiologists, nurses and administrators interested in initiating an ERAS program.

Dracula's Vault - A Collection of Vampiric Tales from the Pen of Bram Stoker Bram Stoker,2019-02-15 A chilling collection of classic gothic short stories written by Bram Stoker, all connected through the theme of vampires. "Gothic fiction" is a subgenre of Gothic horror that is defined by a combination of fiction writing with horror, death, and sometimes romance. It arguably originated from the 1764 novel "The Castle of Otranto" by English author Horace Walpole, which was subtitled "A Gothic Story" after the second edition. Abraham Bram Stoker (1847 - 1912) was an Irish author. He is best remembered for his 1897 Gothic novel "Dracula", which introduced the world-famous character of Count Dracula and is responsible for various conventions of vampire fantasy that persist to this day. The tales include: 'Dracula', 'The Judge's House', 'The Burial of the Rats' and 'The Squaw'. Other notable works by this author include: "The Primrose Path" (1875), "The Snake's Pass" (1890), and "Seven Golden Buttons" (1891). This volume will appeal to lovers of Gothic literature and classic vampire literature. Many vintage books such as this are increasingly scarce and expensive. It is with this in mind that we are republishing this volume now in an affordable, modern, high-quality edition complete with a specially-commissioned new biography of the author.

**They Followed the Trade Winds** Miles M. Jackson,2014 This is a revised edition from the original 2005 edition with minor changes and also additional archival photos. The intervening years have allowed time to add additional information to provide a better understanding of the small community of people of African ancestry who settled in the Hawaiian Islands.

**We Need to Talk About Kevin** Lionel Shriver,2011-05-01 The inspiration for the film starring Tilda Swinton and John C. Reilly, this resonant story of a mother's unsettling quest to understand her teenage son's deadly violence, her own ambivalence toward motherhood, and the explosive link between

them remains terrifyingly prescient. Eva never really wanted to be a mother. And certainly not the mother of a boy who murdered seven of his fellow high school students, a cafeteria worker, and a much-adored teacher in a school shooting two days before his sixteenth birthday. Neither nature nor nurture exclusively shapes a child's character. But Eva was always uneasy with the sacrifices and social demotion of motherhood. Did her internalized dislike for her own son shape him into the killer he's become? How much is her fault? Now, two years later, it is time for her to come to terms with Kevin's horrific rampage, all in a series of startlingly direct correspondences with her estranged husband, Franklin. A piercing, unforgettable, and penetrating exploration of violence and responsibility, a book that the Boston Globe describes as "impossible to put down," is a stunning examination of how tragedy affects a town, a marriage, and a family.

EU Digital Copyright Law and the End-User Giuseppe

Mazziotti, 2008-02-19 This book presents a thorough exploration of the legal framework of EU digital copyright law from the perspective of the end-user. It provides a detailed examination of the implications that the spectacular rise of this new actor creates for the interplay between the EU copyright system and human rights law, competition law and other important policies contained in the EC Treaty. This comprehensive, book is crucial reading for lawyers, policymakers and academics.

**Lanterne Rouge** Max Leonard, 2015-06-15 Froome, Wiggins, Mercks—we know the winners of the Tour de France, but *Lanterne Rouge* tells the forgotten, often inspirational and occasionally absurd stories of the last-placed rider. We learn of stage winners and former yellow jerseys who tasted life at the other end of the bunch; the breakaway leader who stopped for a bottle of wine and then took a wrong turn; the doper whose drug cocktail accidentally slowed him down and the rider who was recognized as the most combative despite finishing at the back. Max Leonard flips the Tour de France on its head and examines what these stories tell us

about ourselves, the 99% who don't win the trophy, and forces us to re-examine the meaning of success, failure and the very nature of sport.

**Proceedings of the 3rd Ph.D. Retreat of the HPI Research School on Service-oriented Systems Engineering**  
Meinel, Christoph ,Plattner, Hasso,Döllner, Jürgen,Weske, Mathias,Polze, Andreas,Hirschfeld, Robert,Naumann, Felix,Giese, Holger, 2009 Design and Implementation of service-oriented architectures imposes a huge number of research questions from the fields of software engineering, system analysis and modeling, adaptability, and application integration. Component orientation and web services are two approaches for design and realization of complex web-based system. Both approaches allow for dynamic application adaptation as well as integration of enterprise application. Commonly used technologies, such as J2EE and .NET, form de facto standards for the realization of complex distributed systems. Evolution of component systems has lead to web services and service-based architectures. This has been manifested in a multitude of industry standards and initiatives such as XML, WSDL UDDI, SOAP, etc. All these achievements lead to a new and promising paradigm in IT systems engineering which proposes to design complex software solutions as collaboration of contractually defined software services. Service-Oriented Systems Engineering represents a symbiosis of best practices in object-orientation, component-based development, distributed computing, and business process management. It provides integration of business and IT concerns. The annual Ph.D. Retreat of the Research School provides each member the opportunity to present his/her current state of their research and to give an

outline of a prospective Ph.D. thesis. Due to the interdisciplinary structure of the Research Scholl, this technical report covers a wide range of research topics. These include but are not limited to: Self-Adaptive Service-Oriented Systems, Operating System Support for Service-Oriented Systems, Architecture and Modeling of Service-Oriented Systems, Adaptive Process Management, Services Composition and Workflow Planning, Security Engineering of Service-Based IT Systems, Quantitative Analysis and Optimization of Service-Oriented Systems, Service-Oriented Systems in 3D Computer Graphics, as well as Service-Oriented Geoinformatics.

**LGBTQ Film Festivals** Antoine Damiens, 2020-03-17 While scholars have theorized major film festivals, they have ignored smaller, ephemeral, events. In taking seriously minor European and North-American LGBT festivals which often only exist as traces within archival collections, this book revisits festival studies' methodological and theoretical apparatuses. As the first 'critique' of festival studies from within, LGBTQ Film Festivals argues that both festivals and queer film cultures are by definition ephemeral. The book is organized around two concepts: First, 'critical festival studies' examines the political project and disciplinary assumptions that structure festival research. Second, 'the festival as a method' pays attention to festivals' role as producers of knowledge: it argues that festivals are not mere objects of research but also actors already shaping academic, industrial, and popular cinematic knowledge. Drawing on my experience on the festival circuit, this book pays homage to the labour of queer organizers, critics, and scholars and opens up new avenues for festival research.
