Paddle The Thames Mark Rainsley, 2017-04 The River Thames is simply a fantastic place to paddle your canoe, kayak or paddleboard, whether touring, training, racing, expeditioning or just 'bimbling'. From its early reaches in the Cotswold Hills, through the Home Counties into London and far out beyond into the estuary, the river's surroundings are remarkably varied and diverse, yet always attractive and engaging. If your mental image of the Thames depicts an urban sewer, be prepared to be amazed; the water is clean, the banks are invariably green and naturalists describe the river's ecosystems as a 'wildlife superhighway'. This natural beauty is equalled by the human story which the Thames narrates; from locks, gardens and parks to mansions, abbeys, castles and palaces, the paddler is continuously immersed in what MP John Burns famously called liquid history. The riverine Arcadia of willow-draped banks, back channels and islands celebrated in *Three Men in a Boat* and *The Wind in the Willows* was not a myth, and it still exists. Is a paddler's guidebook to the Thames needed? Britain's best-known river might actually be the least-known by paddlers. The huge paddling population and numerous canoe clubs based along it belie a surprising fact; many of these paddlers

aren't sure what is found up- and down-stream from their patch. In a river stretching 347km, this is both understandable and forgivable. However, there are other reasons for the relatively low numbers of paddlers encountered whilst enjoying the Thames. Information about where and how to launch is hard to come by, existing guides and media give the impression that the Thames is the preserve of powerboats and rowers, and finally, the perception often lingers that it isn't actually very attractive or interesting. This book sets out to redress these major omissions and misconceptions, and to reclaim John 'Rob Roy' MacGregor's river for paddlers.

Canoeing Ray Goodwin, 2016-04-15 This is a thoroughly modern book on the traditional open canoe. It covers all aspects of the open canoe,

from design to wilderness travel. What really sets it apart is its focus on canoeing techniques. Ray Goodwin is the UK's best known and (many would go so far as to say) foremost canoe coach. By introducing some of the latest canoeing performance skills, based on what he has discovered through decades of coaching and guiding, he sets out to inspire a new generation of paddlers. Through clear language and the use of photographs acquired over many years of paddling around the world, he shares some real insights of the reality of canoeing; sometimes gritty, but always enthralling. New in the 2nd edition is a section on 'vision pattern', a method for creating a mental map of a rapid. There is an expanded and re-written chapter on canoeing with children. There are more techniques for improvised sailing and more on advanced lining and tracking. It describes new solo rescue techniques and has many new inspirational canoe expedition examples. Ray has paddled extensively in Europe and his British canoe trips include the circumnavigation of Wales and the Irish Sea Crossing. In North America he has canoed the Rio Grande in the South and done trips as far north as the Arctic Circle, as well as doing two kayak descents of the Grand Canyon of the Colorado. In addition to being a British Canoe Union Level 5 Coach in Canoe, Inland Kayak, he holds a Mountain Instructor's Certificate and has led ice climbs on Kilimanjaro, Mount Kenya and in the Atlas Mountains. He runs his own coaching and guiding business, working at all levels from novice to the top BCU leadership and coaching qualifications courses.
