Governance and Politics in the Post-Crisis European Union Ramona Coman,Amandine Crespy,Vivien A. Schmidt,2020-08-27 The European Union of today cannot be studied as it once was. This original new textbook provides a much-needed update on how the EU's policies and institutions have changed in light of the multiple crises and transformations since 2010. An international team of leading scholars offer systematic accounts on the EU's institutional regime, policies, and its community of people and states. Each chapter is structured to explain the relevant historical developments and institutional framework, presenting the key actors, the current controversies and discussing a paradigmatic case study. Each chapter also provides ideas for group discussions and individual research topics. Moving away from the typical, neutral account of the functioning of the EU, this textbook will stimulate readers' critical thinking towards the EU as it is today. It will serve as a core text for undergraduate and graduate students of politics and European studies taking courses on the politics of the EU, and those taking courses in comparative politics and international organizations including the EU.

Engine of Inequality Karen Petrou,2021-03-05 The first book to reveal how the Federal Reserve holds the key to making us more economically equal, written by an author with unparalleled expertise in the real world of financial policy Following the 2008 financial crisis, the Federal Reserve's monetary policy placed much greater focus on stabilizing the market than on helping struggling Americans. As a result, the richest Americans got a lot richer while the middle class shrank and economic and wealth inequality skyrocketed. In Engine of Inequality, Karen Petrou offers pragmatic solutions for creating more inclusive monetary policy and equality-enhancing financial regulation as quickly and painlessly as possible. Karen Petrou is a leading financial-policy analyst and consultant with unrivaled knowledge of what drives the decisions of federal officials and how big banks respond to financial policy in the real world. Instead of proposing legislation that would never pass Congress, the author provides an insider's look at politically plausible, high-impact financial policy fixes that will radically shift the equality balance. Offering an innovative, powerful, and highly practical solution for immediately turning around the enormous nationwide problem of economic inequality, this groundbreaking book: Presents practical ways America can and should tackle economic inequality with fast-acting results Provides revealing examples of exactly how bad economic inequality in America has become no matter how hard we all work Demonstrates that increasing inequality is disastrous for long-term economic growth, political action, and even personal happiness Explains why your bank's interest rates are still only a fraction of what they were even though the rich are getting richer than ever, faster than ever Reveals the dangers of FinTech and BigTech companies taking over banking Shows how Facebook wants to control even the dollars in your wallet Discusses who shares the blame for our economic inequality, including the Fed, regulators, Congress, and even economists Engine of Inequality: The Fed and the Future of Wealth in America should be required reading for leaders, policymakers, regulators, media professionals, and all Americans wanting to ensure that the nation's financial policy will be a force for promoting economic equality.

The European Union's Common Agricultural Policy Reforms Marko Lovec, 2016-08-02 This book engages in the controversies of the European Union's Common Agricultural Policy (CAP) reforms, demonstrating how these are reiterated by mainstream theoretical approaches in the field. The reforms that the European Union's CAP underwent during the last three decades were intended to make it less trade-distorting, more taxpayer-friendly and more able to meet the new challenges of environmental concerns and rural development/territorial cohesion. The outcome of the reforms has, however, contradicted these objectives, with the controversies being reiterated by the mainstream theoretical approaches in the field. *European Union's Common Agricultural Policy Reforms* argues that these controversies are due to reductionist, rationalist and idealist assumptions with regard to the object of inquiry applied by mainstream approaches. It proposes an alternative critical approach that takes into account the role of real material factors. Critical realism is not just an alternative explanation of CAP reforms but an alternative theory of how explanations can be made, which enables readers to reflect upon and endorse the results of existing lines of research in proceeding towards deeper level theory.

Handbook of Research on Social and Economic Development in the European Union Bayar, Yilmaz, 2019-11-29 The EU has experienced serious economic and political crises such as the sovereign debt crisis and Brexit in the past few years. However, despite these issues, the EU has implemented considerable institutional, fiscal, and collective improvements during the unification process to continue as a significant actor in the global economy. The *Handbook of Research on Social and Economic Development in the European Union* provides a multidisciplinary evaluation of the institutional, economic, and social development of the European Union and makes inferences for the future dynamics and collaborations of the EU, the global economy, and other countries. Featuring coverage on a broad range of topics such as energy security, gender discrimination, and global economics, this book is ideally designed for government officials, policymakers, world leaders, politicians, diplomats, international relations officers, economists, business professionals, historians, market analysts, academicians, researchers, and students concerned about the multifaceted integration processes surrounding the EU.

Transforming Food and Agricultural Policy Carsten Daugbjerg, Peter H. Feindt, 2019-12-18 Western democratic welfare states often featured sectoral governance arrangements where governments negotiated policy with sectoral elites, based on shared ideas and exclusive institutional arrangements. Food and agriculture policy is widely considered an extreme case of compartmentalized and 'exceptionalist' policy-making, where sector-specific policy ideas and institutions provide privileged access for sectoral interest groups and generate policies that benefit their members. In the last two decades, policy exceptionalism has been under pressure from internationalization of policy-making, increasing interlinkage of policy areas and trends towards self-regulation, liberalization and performance-based policies. This book introduces the concept of 'post-exceptionalism' to characterize an incomplete transformation of exceptionalist policies and politics which preserves significant exceptionalist features. Post-exceptional constellations of ideas, institutions, interests and policies can be complementary and stable, or tense and unstable. Food and agriculture policy serves as an example to illustrate an incomplete transformation towards a more open, contested and networked politics. Chapters on agricultural policy-making in the European Union and the United States, the politics of food in Germany and the United Kingdom, transnational organic standard setting and global food security debates demonstrate how 'postexceptionalism' helps to understand the co-existence of transformation and path dependency in contemporary public policies. The chapters in this book were originally published as a special issue of the *Journal of European Public Policy*.

Research Handbook on EU Agriculture Law Joseph A. McMahon,Michael N. Cardwell,2015-11-27 Following the conclusion of the latest round of reforms to the Common Agricultural Policy (CAP) in 2013, the Research Handbook on EU Agriculture Law provides an up-to-date discussion of these reforms and the changing landscape in which the CAP now operates. Adopting an interdisciplinary approach, and with international contributors from across Europe and the United States, the Handbook commences with analyses of the legal instruments which implement the reformed CAP, before moving on to consider questions of land use, the role of agriculture within the wider food chain and the international dimension. In these contexts, particular issues identified include: the environmental impact of past, present and future farming practices; the ability of the food chain to accommodate consumer preferences and scientific innovation; and the hurdles to be cleared before international consensus can be reached on a whole range of agricultural imperatives. As well as providing a state-of-the-art point of reference for academics, this comprehensive book will be of great interest to students, scholars and policymakers dealing with these new challenges faced by agriculture in the EU.

EU Financial Framework from 2014 Great Britain: Parliament: House of Lords: European Union Committee,2011-04-05 The EU Multiannual Financial Framework (MFF) will shape what the EU achieves in the second half of this decade. This report is set against the themes of the EU's Europe 2020 strategy: smart, sustainable and inclusive growth. The report includes three principal recommendations: Common Agricultural Policy must be reformed; the EU's budget must not grow in real terms; the EU must spend its money more carefully. The Common Agricultural Policy must be reformed to release resources for other priorities, including research. One third of the EU's budget still goes on agricultural subsidies. Overall funding must be reduced. And the CAP must shift resources behind rural development (pillar two) from production (pillar one). The Committee calls for an end to trade-distorting subsidies, and a focus on today's challenges: global food security, biodiversity and climate change. The Committee found proposals for new EU revenue streams or taxes (own resources) to be an 'unfortunate distraction' on which it will be impossible to reach agreement. It also recommends that the Financial Framework be for five years, not seven as at present, so that it has more flexibility to respond to changing events - such as recent events in North Africa - and economic circumstances, like the financial crisis. EU mismanagement of large scale projects is unacceptable. And the EU's regional development funds should go to where they are most needed: the EU's poorest countries. And the EU should not spend at all where EU spending adds no value compared with spending at national or regional level.

Law, Ecology, and the Management of Complex Systems Tiina Paloniitty,2022-08-19 This book addresses the role of law in the adaptive management of socio-ecological systems. Recent years have witnessed a rise in discussion over the relation between adaptivity and law, as if after decades of insouciance, legal scholars have finally started to understand the impacts of the scientific paradigm called 'adaptive management' on the legal sphere. Even though the complicated relations between law and the adaptive management of socio-ecological systems have become more debated, a thorough examination of the scientific and theoretical fundamentals of such endeavours has yet to be presented. Using the illustrative example of European Union water governance and its path toward embracing adaptive management, this book emphasises the legal significance of properly understanding the manner in which scientific knowledge of the environment is produced. Though always pivotal, rigorously apprehending science is especially crucial when dealing with the management of complex ecosystems as the 'normative' is created gradually before law begins to examine the 'facts' of the matter. After examining the roots of adaptive management, this book argues that the legal needs to understand itself as an integral part of the process of the socio-ecological management of complex systems and not merely an external umpire resolving disputes. As a whole, the book offers new insights into the

EU regulator's approaches to scientific realities, making it an interesting read not only to academics and legal scholars but also to regulators striving to deepen their understanding or pondering which approach to adopt in the face of new regulatory challenges, and to scientists interested in the science and law aspects of their work.
