The Impact of New Technology and Mobile Banking in Africa. A Case Study of the Standard Bank South Africa Difrane Madara, 2019-11-28 Seminar paper from the year 2019 in the subject Business economics - Banking, Stock Exchanges, Insurance, Accounting, grade: A, Kenyatta University, language: English, abstract: This paper explores the impact of new technology and mobile banking in the entire financial sector in Africa. The paper focuses on the case of Standard Bank South Africa to assist in understanding the challenges faced by the major commercial banks in adopting new banking technologies in less developed worlds, such as Africa. To realize the primary goal of this paper, the researcher discusses how technology can help Standard Bank to move forward in the aftermath of the 2008/9 financial crisis and the new opportunities for the bank to grow its financial service businesses. Furthermore, the research suggests how new technological applications in the financial services sector can help Africans to escape poverty and if diversification is appropriate for a diverse bank, such as Standard Bank. Technology has immensely transformed business-to-business and within business transactions and interactions. Technological applications are enabling reconfiguration of design, production, marketing, and service delivery in most businesses. For instance, the design reconfigurations have allowed for the implementation of online marketplaces,

mobile business activities, such as mobile banking, and better risk assessment. In the emerging financial markets of Africa, disruptive market innovations and reconstituted value chains have become key drivers of the growing financial services industry. Despite the huge benefits of financial innovations, conventional financial services providers, such as banks, finance companies, microfinance institutions, and insurance must be wary of the new risks and challenges posed by these financial technologies. For a major bank like the Standard Bank, financial innovations, such as e-banking and mobile banking present both new opportunities and threats to its core businesses.

Mobile Deposit Francis A. K. Banson, 2014-06-27

Mobilization of deposit to a bank is as essential as oxygen for human being, (Deb, K. 1988). Deposit mobilization is one of the core functions of banking business and so an important source of working capital for the bank. Since deposits are normally considered as a cost effective source of working fund, the bank's ability to lend more as well as its success greatly lies on its deposit mobilization. Walk in deposit remains the major system where by customers are able to deposit money into their account. This has led to long queues in banking halls to the displeasure of customers since they have to spend a lot of time just to deposit money. In addition, the banks are unable to mobilize deposit from the unbanked since they don't have physical presence in these communities. On the other hand, if the banks can adopt a system where by people in these communities could operate an account and make regular deposits without necessarily visiting the bank, then the bank can mobilize cheap funds to augment its working capital. The findings show that mobile deposit has proven to be very effective means of mobilizing deposit apart from

the traditional usual walk in deposit system.

New Era in Banking Angel Berges, Mauro F. Guillen, Juan Pedro Moreno, Emilio Ontiveros, 2016-10-21

The financial crisis that began in 2007 triggered a break with banking practices of the past. Even as the crisis occurred, a broader set of economic, geopolitical, and technological forces were already reshaping the financial industry's transition from the twentieth to the twenty-first century. While these changes in the financial and global climate have led to a major overhaul of banking regulations and increased scrutiny of banks, they have also revealed opportunities for the development of a banking sector fit for the future. *A New Era in Banking: The Landscape After the Battle* identifies the main drivers of change at the heart of this wholesale transformation of the financial services industry. It examines the complex challenge for financial institutions to de-risk business models, reconnect with customers, and approach stakeholder value creation. Untangling the severe mutations that have taken place in the banking sector, *A New Era in Banking*, contextualizes these changes within larger trends that extend beyond the confines of the financial crisis. Banks are more vulnerable than ever to the crosscurrents of economic, demographic, regulatory, and technological change. However, by discussing how banks can operate as flexible, technology-enabled information businesses, *A New Era in Banking* advocates financial practices based not only on survival, but innovation.

Marketing and Mobile Financial Services Aijaz A. Shaikh, Heikki Karjalainen, 2018-12-21 Mobile financial services (MFS) are of major interest and importance to both researchers and practitioners. The role played by nonbanking actors including telecoms and FinTech firms as well as other participants, such as PayPal and Amazon, in developing and deploying innovative financial and payment services is undeniable. Peer2peer (P2P) payments from nonbank services are becoming increasingly commonplace and will shortly be codified by EC (EU?) regulations requiring banks to provide access to consumer data for third-party app developers and service providers. Three major mobile financial systems—mobile banking, mobile payments, and branchless banking—currently dominate the electronic retail banking sector. Although interconnected and interrelated, their business models, regulatory frameworks, and target markets are distinct. This book provides a unified perspective on MFS and discusses its evolution, growth, and future, as well as identifying the frameworks, stakeholders, and technologies used in financial information systems in general and MFS in particular. Academics and researchers in digital and financial marketing will find this book an invaluable resource, as will bank executives, regulators, policy makers, FinTech professionals, and anyone interested in how mobile technology, social media and financial services will increasingly intersect.

The Digital Banking Revolution Luigi

Wewege, 2017-01-16 Over the past decade financial service innovations have contributed to a completely new way in which customers can bank, threatening the status quo of traditional retail banks, and redefining a banking model which has been in place for generations. These new technological advancements have facilitated the rapid emergence of digital banking firms and FinTech companies, leading to established banks being forced to swiftly increase their pace of digital adoption to stay relevant and stop mass client attrition to these agile financial start-ups. These threats come at an inopportune time for banks due to mature markets currently experiencing stagnant growth. This coupled with decreasing profit margins due to the competitive pricing of new entrants, and financial customer loyalty becoming ever increasingly more tenuous.

Bank 3.0 Brett King, 2012-11-19 The first edition of *BANK 2.0*—#1 on Amazon's bestseller list for banking and finance in the US, UK, Germany, France, and Japan for over 18 months—took the financial world by storm and became synonymous with disruptive customer behaviour, technology shift, and new banking models. In *BANK 3.0*, Brett King brings the story up to date with the latest trends redefining financial services and payments—from the

global scramble for dominance of the mobile wallet and the expectations created by tablet computing to the operationalising of the cloud, the explosion of social media, and the rise of the de-banked consumer, who doesn't need a bank at all. BANK 3.0 shows that the gap between customers and financial services players is rapidly widening, leaving massive opportunities for new, non-bank competitors to totally disrupt the industry. On the Web and on Mobile, the customer isn't king—he's dictator. Highly impatient, skeptical, cynical. Brett King understands deeply what drives this new hard-nosed customer. Banking professionals would do well to heed his advice. —Gerry McGovern, author of Killer Web Content

Banking the World Robert Cull, Asli Demirguc-Kunt, Jonathan Morduch, 2021-08-03 Experts report on the latest research on extending access to financial services to the 2.5 billion adults around the world who lack it. About 2.5 billion adults, just over half the world's adult population, lack bank accounts. If we are to realize the goal of extending banking and other financial services to this vast "unbanked" population, we need to consider not only such product innovations as microfinance and mobile banking but also issues of data accuracy, impact assessment, risk mitigation, technology adaptation, financial literacy, and local context. In Banking the World, experts take up these topics, reporting on new research that will guide both policy makers and scholars in a broader push to extend financial markets. The contributors consider such topics as the complexity of surveying people about their use of financial services; evidence of the impact of financial services on income; the occasional negative

effects of financial services on poor households, including disincentives to work and overindebtedness; and tools for improving access such as nontraditional credit scores, financial incentives for banking, and identification technologies that can dramatically reduce loan default rates.
