The Caregiver's Toolbox Carolyn P. Hartley,Peter Wong,2015-08-03 Millions of Americans are or will be amateur caregivers for ill spouses, parents, or friends. Caregivers today, more than ever, use technology to help manage schedules, medication routines and pharmacy reminders, legal and financial affairs, as well as travel and expenses. Yet recent insurance options and health care's emerging digital world make for an overwhelming, complex process. If you are one of the 64 million current caregivers, could you access your parents' critical documents in an emergency, using their user IDs and passwords? Do you know how often your parents or parents-in-law are taking medications, how often your loved one goes to the doctor, and how to be involved in medical and life decisions? Statistics show 85 percent of caregivers are not trained in caregiving, so many people are likely winging it, picking up pieces of information here and advice there. The Caregiver's Toolbox is your guide to cool apps and online tools, insider tips on how to reduce your medical bills, your privacy rights as a caregiver, where to go for free and low-cost help, and much more. It clearly shows which tools will relieve your stress, and those that may add stress. The authors dedicate much of their professional lives to helping people navigate the health care matrix. For updates on

tools, applications, and emerging technology, visit the authors' website, www.caregivers-toolbox.com.

Popular Health & Medical Writing for Magazines Anne Hart, 2005 Here's how to transform your interest in popular health topics such as gene hunters, medical trends, self-help, nutrition, current issues, or pets into writing salable

Become a health-aware feature writer, journalist, editor, indexer, abstractor, proofreader, information broker, book packager, investigative reporter, pharmaceutical copywriter, or documentary video producer. Here are the skills you'll need to transform your interest in popular science into writing health and medical feature and filler articles or columns for a wide variety of publications. For those who always wanted to write or edit medical publications, scripts, medical record histories, case histories, or books, here's a guide with all the strategies and techniques you'll need to become a medical writer, journalist, or editor. Whether you're a medical language specialist, transcriber, freelance writer, editor, indexer, or want to be, you'll learn how to write and market high-demand feature articles for popular magazines on a variety of popular science subjects from health, fitness, and nutrition to DNA, pet issues, and self-help. You'll find not only how-to techniques, but contacts for networking, associations, and where to find the research. You don't need science courses to write about popular science. What you do need is dedication to writing, journalism, or editing--freelance or staff. Feature articles and fillers are wanted on popular health-related subjects for general consumer, women's, men's, and niche magazines.
