Car Accidents Howard K. Rosenberg,2018-12-09 Warning: Making certain mistakes after an accident can make any insurance claims null and void, leaving you thousands of dollars out of pocket... If you want to learn how to do things the right way, then this short message will be the most important you ever read. Here's why. In the United States last year there were 2.4 million car accidents In fact, most drivers are now likely to be in an accident at least once in their lives. And if you've never been in an accident before - believe me, you won't know exactly what to do when it does happen Adrenaline is running high. You might be shaken up. There may be police on the scene. So it pays to learn the exact steps you need to take before you get into an accident This short book (you can read it from start to finish in less than 60 minutes) will show you the exact steps you need to take if the unfortunate does happen. Here's what you'll discover: What you may not know about leaving the scene of a minor accident The two words you should never say after an accident (doing this could land you a large bill at the end of the day without even realizing) The nine things to look for at the scene of a crash The unknown problem with waiting 48 hours after a crash to see a doctor How to avoid sleazy ambulance chasers and hire the right law firm - lawyers 5 hidden auto accident injuries (not just concussions and whiplash) Why you shouldn't rely on smartphone apps to store your insurance details The startling link between car insurance and identity theft Why you should get multiple repair estimates The exact number of hours you should wait before contacting the police to get a police report Don't hire an attorney before getting this straight - contingency The filing requirements for each state There's also free bonus "at the scene" checklist included. You can print this off and keep it in your glove compartment so you are prepared if the unfortunate does happen And If you know someone who has recently passed their test - this book should be considered as much of a necessity as a tire jack and a hands free kit for their cell phone

Achieving Traffic Safety Goals in the United States National Academies (U.S.). Committee for the Study of Traffic Safety Lessons from Benchmark Nations,2011 The tool kit will vary among jurisdictions depending on basic legal constraints, community attitudes, road system and traffic characteristics, and resources. The Transportation Research Board (TRB)

undertook a study to identify the sources of safety improvements in other countries. Researchers do not have a complete understanding of the underlying causes of long-term trends in crashes and fatalities. Differences among countries are in part attributable to factors other than government safety policies. To identify keys to success, the TRB study committee examined specific safety programs for which quantitative evaluations are available and relied on the observations of safety professionals with international experience. The committee's conclusions identify differences between U.S. and international practices that can account for some differences in outcomes. The committee recommendations, which are addressed to elected officials and to government safety administrators, identify actions needed in the United States to emulate the successes that other countries have achieved. The recommendations do not comprehensively address all aspects of traffic safety programs but rather address areas of practice that are highlighted by the international comparisons and for which credible evidence of effectiveness is available.--Pub. desc.

Car Emergency Kit Joseph Krueger, Virginia Nicols, 2020-03-20 PARTICULARLY GOOD FOR TEENAGERS OR NEW DRIVERS! If you're lucky enough to drive a nice new car, you may not think of it as being part of your emergency plan. But when disaster hits, all drivers can find themselves in trouble! What preparedness habits should all drivers develop? Review them with the latest booklet of the Emergency Preparedness Q&A Mini-Series. A Car Emergency Kit is not the same as a personal survival kit or go-bag. It is focused on the car itself and the car's role in protecting you and your family in a disaster or evacuation. Some of the questions you'll find: What should I be including when it comes to keeping my car ready for emergencies? What's the best way to get gas in an emergency? What tools should I carry in my car? In an emergency, how do I keep from getting lost? Are roadside assistance programs a good idea? As an experienced driver, most of the answers should be familiar to you. They may be brand new, however, to young drivers. All drivers will like the fast read - fewer than 50 pages - and the checklists of good ideas and recommendations. Don't overlook the safety cautions. Authors Virginia S. Nicols and Joseph A. Krueger are long-time car buffs whose background includes military training, disaster response marketing and nearly 20 years of hands-on experience with Community Emergency Response Teams (CERT). You can find out more about this title and the whole Mini-Series at <https://EmergencyPlanGuide.org>.
