

Car Parental Control

Janet Lansbury

Fast Cars, Cool Rides Amy L. Best, 2006 Drawing on interviews with over 100 young men and women, and five years of research, the author explores the fast-paced world of kids and their cars. She reveals a world where cars have incredible significance for kids, as a means of transportation and thereby freedom to come and go, as status symbols and as a means to express their identities.

Street Fights in Copenhagen Jason Henderson, Natalie Marie Gulsrud, 2019-05-21 With 29 percent of all trips made by bicycle, Copenhagen is considered a model of green transport. This book considers the underlying political conditions that enabled cycling to appeal to such a wide range of citizens in Copenhagen and asks how this can be replicated elsewhere. Despite Copenhagen's global reputation, its success has been a result of a long political struggle and is far from completely secure. Car use in Denmark is increasing, including in Copenhagen's suburbs, and new developments in Copenhagen include more parking for cars. There is a political tension in Copenhagen over the spaces for cycling, the car, and public transit. In considering examples of backlashes and conflicts over street space in Copenhagen, this book argues that the kinds of debates happening in Copenhagen are very similar to the debates regularly occurring in cities throughout the world. This makes Copenhagen more, not less, comparable to many cities around the world, including cities in the United States. This book will appeal to upper-level undergraduates and graduates in urban geography, city planning, transportation, environmental studies, as well as transportation advocates, urban policy-makers, and anyone concerned about climate change and looking to identify paths forward in their own cities and localities.

Car Cultures Daniel Miller, 2020-05-26 Anyone who assumes that a car is simply a means to get from point A to point B, or who even thinks that they know what a car is, should read this book. Profoundly shaped by culture, the car gives rise to a wide range of emotions, from guilt about the environment in the UK to aboriginal concerns with car corpses, to struggles to keep the creatures alive with everything but the proper spare parts in West Africa. Cars and their landscapes prove central to human life from its most intimate to the widest sense of global crisis, and are capable of inspiring epic passions. From road rage in Western Europe to the struggles of cab driving in Africa to the emergence of Black identity in the US, this book examines the essential humanity of the car, which includes the jealousies, gender differences, fears and moralities that cars give rise to. Firmly grounded in detailed ethnographic and historical scholarship, this is the first book to provide an informed sense of cars as one of the most familiar and significant forms of material culture.

Kids These Days Karen Sternheimer, 2006 Kids These Days critically examines the hottest news stories of the past few years to assess whether the news is really as bad as it sounds. Is kidnapping by strangers really a bigger threat now than in the past? Are disputes at school now settled with guns instead of fists? And are kids, especially girls, becoming bigger bullies than ever before? This book dissects the stories that made headlines and explores overall trends and statistics to compare the hype to the reality. The truth is that kids today do face unique obstacles and challenges, but their situation isn't nearly as dire as the compelling news accounts would have us believe. Rather, the author proposes that our nation's youth have been targeted as a problem population to absolve adult responsibility for creating the often dangerous and difficult conditions many young people must deal with.

Earth Day Melissa Ferguson, 2021 Earth Day celebrates our beautiful planet and calls us to act on its behalf. Some people spend the day planting flowers or trees. Driving Identities Ken McLeod, 2020-04-30 Driving Identities examines long-standing connections between popular music and the automotive industry and how this relationship has helped to construct and reflect various socio-cultural identities. It also challenges common assumptions regarding the divergences between industry and art, and reveals how music and sound are used to suture the putative divide between human and non-human. This book is a ground-breaking inquiry into the relationship between popular music and automobiles, and into the mutual aesthetic and stylistic influences that have historically left their mark on both industries. Shaped by new historicism and cultural criticism, and by methodologies adapted from gender, LGBTQ+, and African-American studies, it makes an important contribution to understanding the complex and interconnected nature of identity and cultural formation. In its interdisciplinary approach, melding aspects of ethnomusicology, sociology, sound studies, and business studies, it pushes musicological scholarship into a new consideration and awareness of the complexity of identity construction and of influences that inform our musical culture. The volume also provides analyses of the confluences and coactions of popular music and automotive products to highlight the mutual influences on their respective aesthetic and technical evolutions. Driving Identities is aimed at both academics and enthusiasts of automotive culture, popular music, and cultural studies in general. It is accompanied by an extensive online database appendix of car-themed pop recordings and sheet music, searchable by year, artist, and title.

Mates Jay A Lee, 2014-09-26 In the year 2262 AD there were five inhabited celestial bodies. The Earth and its moon as well as Mars and its two moons. There were also several space stations in orbit around these celestial bodies. Several more space stations were scattered around the solar system. A central government had been formed to attempt to control all of the other smaller governments, it was called the Council of governments. The Council of Governments had a private mercenary service to enforce their laws, they were called the Silver fox organization. When George and Diane decided they wanted to have children, they decided to design them rather than go natural—a secret they barely managed to keep from the solar system government. They ended up developing an entirely new species that would change history and space forever. In Mates: From the Beginning, young Adam and Eve are forever under suspicion by the government due to their odd appearances and staggering intelligence. Choosing to fake their deaths and complete their genetic modifications away from prying eyes, Adam and Eve return as “aliens” to help the governments they once hid from.

Driverless Cars, Urban Parking and Land Use Robert A. Simons, 2020-02-05 The subject of driverless and even ownerless cars has the potential to be the most disruptive technology for real estate, land use, and parking since the invention of the elevator. This book includes new research and economic analysis, plus a thorough review of the current literature to pose and attempt to answer a number

of important questions about the effect that driverless vehicles may have on land use in the United States, especially on parking. Simons outlines the history of disruptive technologies in transport and real estate before examining how the predicted changes brought in by the adoption of driverless technologies and decline in car ownership will affect our urban areas. What could we do with all the parking areas in our cities and our homes and institutional buildings that may no longer be required? Can they be sustainably repurposed? Will self-driving cars become like horses, used only by hobbyists for recreation and sport? While the focus is on parking, the book also contains the views of real estate economists, architects, and policymakers and is essential reading for real estate developers and investors, transport economists, planners, politicians, and policymakers who need to consider the implications of a future with more driverless vehicles. Fasten your seat belt: like it or not, driverless cars will begin to change the way we move about our cities within ten years.

As a RIE teacher and student of pioneering child specialist Magda Gerber, her advice is not based solely on formal studies and the research of others, but also on her more than twenty years of hands-on experience guiding hundreds of parents and their toddlers. A collection of her most popular articles about toddler behavior, No Bad Kids presents her signature approach to discipline, which she sees as a parent’s act of compassion and love for a child. Full of wisdom and encouragement, it covers common toddler concerns such as: • Why toddlers need clear boundaries—and how to set them without yelling • What's going on when they bite, hit, kick, tantrum, whine, and talk back • Advice for parenting a strong-willed child • How to be a gentle leader, and Lansbury’s secret for staying calm For parents who are anticipating or experiencing those critical years when toddlers are developmentally obliged to test the limits of our patience and love, No Bad Kids is a practical, indispensable resource for putting respectful discipline into action.
