The Himalayan Database Elizabeth Hawley, Richard Salisbury, 2004-10-01 The historical archives of Elizabeth Hawley-for more than 40 years the meticulous chronicler of mountaineering expeditions in Nepal-are now available on this searchable CD.

The Himalaya by the Numbers Richard Salisbury, Elizabeth Hawley, 2011 * A nirvana of mountaineering data for students of Himalaya climbing information * Written by two of the foremost experts in the world on mountaineering in the Himalaya * Data is presented and analyzed based on three distinct expeditionary periods in Himalayan climbing * Companion to *The Himalayan Database* What are the most dangerous peaks to climb in the Nepal Himalaya? What are the safest? When is the best time of year to climb? These and many other questions are answered in this comprehensive statistical analysis of climbing activity, ascents, and fatalities in the Nepal Himalaya. Co-written by Elizabeth Hawley, the official historian of all expeditions for the past 50 years in the Nepal Himalaya, and Richard Salisbury, a Himalayan mountaineer and retired computer analyst from the University of Michigan. Published by Vajra Publications and distributed in North America by Mountaineers Books.

No Summit Out of Sight Jordan Romero, 2014-05-06 The story of Jordan Romero, who at the age of 13 became the youngest person ever to reach the summit of Mount Everest. At age 15, he reached the summits of the world's 7 highest mountains--

The Will to Climb Ed Viesturs, David Roberts, 2012-10-23 The bestselling author of *The Mountain* and *No Shortcuts to the Top* chronicles his three attempts to climb the world's tenth-highest and statistically deadliest peak while exploring the dramatic and tragic

history of others who have made—or attempted—the ascent. “Viesturs and Roberts have written an exhaustively researched and wonderfully compelling history of the most fascinating and dangerous of the Himalayan giants.”—David Breashers, veteran mountaineer and documentary filmmaker, director of IMAX film *Everest* As a high school student, Ed Viesturs read and was captivated by the French climber Maurice Herzog’s famous and grisly account of the first ascent of Annapurna in 1950. When he began his own campaign to climb the world’s fourteen highest peaks in the late 1980s, Viesturs looked forward with trepidation to undertaking Annapurna himself. Two failures to summit in 2000 and 2002 made Annapurna his nemesis. His successful 2005 ascent was the triumphant capstone of his climbing quest. In *The Will to Climb* Viesturs and co-author David Roberts bring the extraordinary challenges of Annapurna to vivid life through edge-of-your-seat accounts of the greatest climbs in the mountain’s history, and of his own failed attempts and eventual success. In the process Viesturs ponders what Annapurna reveals about some of our most fundamental moral and spiritual questions—questions, he believes, that we need to answer to lead our lives well.

Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black

people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Nepal Himalaya H. Tilman, 2013-04-16 There can be no country so rich in mountains as Nepal. This narrow strip of territory, lying between Sikkim and Garhwal, occupies 500 miles of India's northern border; and since this border coincides roughly with the 1,500-mile-long Himalayan chain, it follows that approximately a third of this vast range lies within or upon the confines of Nepal. So starts this breathtaking account of mountaineering and exploring this isolated and awe-inspiring country by one of the most famous men in mountaineering. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

Brain-Computer Interface Research Christoph Guger, Brendan Allison, Junichi Ushiba, 2017-04-29 This book describes the prize-winning brain-computer-interface (BCI) projects honored in the community's most prestigious annual award. BCIs enable people to communicate and control their limbs and/or environment using thought processes alone. Research in this field continues to develop and expand rapidly, with many new ideas,

research groups, and improved technologies having emerged in recent years. The chapters in this volume feature the newest developments from many of the best labs worldwide. They present both non-invasive systems (based on the EEG) and intracortical methods (based on spikes or ECoG), and numerous innovative applications that will benefit new user groups

Brain-Computer Interfaces Handbook Chang S. Nam, Anton Nijholt, Fabien Lotte, 2018-01-09 Brain-Computer Interfaces Handbook: Technological and Theoretical Advances provides a tutorial and an overview of the rich and multi-faceted world of Brain-Computer Interfaces (BCIs). The authors supply readers with a contemporary presentation of fundamentals, theories, and diverse applications of BCI, creating a valuable resource for anyone involved with the improvement of people's lives by replacing, restoring, improving, supplementing or enhancing natural output from the central nervous system. It is a useful guide for readers interested in understanding how neural bases for cognitive and sensory functions, such as seeing, hearing, and remembering, relate to real-world technologies. More precisely, this handbook details clinical, therapeutic and human-computer interfaces applications of BCI and various aspects of human cognition and behavior such as perception, affect, and action. It overviews the different methods and techniques used in acquiring and pre-processing brain signals, extracting features, and classifying users' mental states and intentions. Various theories, models, and empirical findings regarding the ways in which the human brain interfaces with external systems and environments using BCI are also explored. The handbook concludes by engaging ethical considerations, open questions, and challenges that continue to face brain-computer

interface research. Features an in-depth look at the different methods and techniques used in acquiring and pre-processing brain signals, extracting features, and classifying the user's intention. Covers various theories, models, and empirical findings regarding ways in which the human brain can interface with the systems or external environments. Presents applications of BCI technology to understand various aspects of human cognition and behavior such as perception, affect, action, and more. Includes clinical trials and individual case studies of the experimental therapeutic applications of BCI. Provides human factors and human-computer interface concerns in the design, development, and evaluation of BCIs. Overall, this handbook provides a synopsis of key technological and theoretical advances that are directly applicable to brain-computer interfacing technologies and can be readily understood and applied by individuals with no formal training in BCI research and development.

Tacky Rax King, 2021-11-02 An irreverent and charming collection of deeply personal essays about the joys of low pop culture and bad taste, exploring coming of age in the 2000s in the age of Hot Topic, Creed, and frosted lip gloss—from the James Beard Award-nominated writer of the Catapult column *Store-Bought Is Fine*—Tacky is about the power of pop culture—like any art—to imprint itself on our lives and shape our experiences, no matter one's commitment to good taste. These fourteen essays are a nostalgia-soaked antidote to the millennial generation's obsession with irony, putting the aesthetics we hate to love—snakeskin pants, *Sex and the City*, Cheesecake Factory's gargantuan menu—into kinder and sharper perspective. Each essay revolves around a different maligned (and yet, Rax would argue, vital) cultural artifact, providing thoughtful, even romantic meditations on desire, love, and the power of nostalgia. An essay about the gym-tan-laundry exuberance of Jersey Shore morphs into an excavation of grief over the death of her father; in *You Wanna Be On Top*, Rax writes about friendship and early aughts girlhood; in another, Guy Fieri helps her heal from an abusive relationship. The result is a collection that captures the personal and generational experience of finding joy in caring just a little too much with clarity, heartfelt honesty, and Rax King's trademark humor.
