Signaling in the Heart José Marín-García, 2011-06-21 Signal transduction pathways are at the core of most biological processes and are critical regulators of heart physiology and pathophysiology. The heart is both a transmitter and dynamic receptor of a variety of intracellular and extracellular stimuli, playing a critical role of an integrator of diverse signaling mechanisms. Alterations in signaling pathways are contributing factors in the development and progression of a broad spectrum of diseases, ranging from dysrhythmias and atherosclerosis to hypertension and the metabolic syndrome. Targeting specific components of these signaling pathways has been shown to be effective in preclinical studies with significant therapeutic impact. This book brings together current knowledge in cardiovascular cell signal transduction mechanisms, advances in novel therapeutic approaches to improve cardiac function, and discussion of future directions. Presented from a post-genomic perspective, this exciting book introduces important new ideas in cardiovascular systems biology. It is an invaluable reference for cardiology researchers and practitioners.

Cardiac CT Zheng-yu Jin, Bin Lu, Yining Wang, 2020-08-07 Over the past few decades there have been major advances in computed tomography (CT) to improve the performance of cardiac imaging. Thanks to the improved scanning speed, power boost tubes, and increased-width detectors, the latest CT technology delivers greater coverage, better spatial and temporal resolution, and functional information on cardiac diseases. Focusing on cardiac CT imaging, this book offers case-based information on cardiac diseases, presents the current technical status, and highlights applications, helping readers systematically understand how cardiac CTs are performed and interpreted in clinical practice. Divided into six chapters, it broadly discusses the characteristics of CT imaging and its applications to coronary artery disease (CAD); non-atherosclerotic coronary artery disease; congenital heart disease; cardiac neoplasms; cardiomyopathy and aortic diseases.

Cardioskeletal Myopathies in Children and Young Adults John Lynn Jefferies, Burns Blaxall, Jeffrey Towbin, Jeffrey Robbins, 2016-10-22 Cardioskeletal Myopathies in Children and Young Adults focuses on plaques that kill people in their 40's-50's and the way they start to form in young adulthood. The Annals of Family Medicine report that approximately half of young adults have at least one cardiovascular disease risk factor (Mar 2010), and an increase in cardiovascular mortality rates in young adults was substantiated in a study at Northwestern Medicine (Nov 2011). Given the increasing recognition of genetic triggers behind all types of cardiovascular disease, and the growing population of young adults with primary or acquired myocardial disease, the need has arisen for a reference that offers a comprehensive approach to the understanding of basic, translational, and clinical aspects of specific muscle diseases while making the link between young adult and adult health. Reveals the link between cardiac muscle disease and skeletal muscle disease Explains how genetics and environmental factors effect muscle function of diverse origins Designates current and novel therapeutic strategies that target both cardiac and skeletal muscle systems

Goodness Not Grief Yanling Lin, 2014 A biography of the author's background which provides insight into his training in medicine and his opinions on the concepts and training that are necessary to be a good doctor. The aims of this book are to first show how coronary angioplasty was pioneered in Australia, Singapore and China. Second, it is to illustrate the founding of a long-awaited medical

school in Xiamen, China where the author's ancestors originate. Third, it is to describe the reformation of healthcare, cardiology, medical research and Art academy in Singapore. Fourth, it is to demonstrate the vision and realization of the third Asia Pacific cardiovascular intervention block. Last but not least, this book describes the merging of East West culture, medicine, art and a personal Christian testimony. This book hopes to show that with hard work, determination and vision, any young man or woman should be able to write a similar life story of their own. It is particularly important for young doctors to learn how not to bring grief but goodness to their patients and relatives. This book also illustrates the history of the development of coronary intervention in China and the rise of the Asia Pacific region in this field. Finally, this book provides a unique, personal perspective in the convergence of Eastern and Western culture, medicine and art. Sample Chapter(s). Foreword (241 KB). Chapter 1: Early Years (917 KB). Contents: Early Years; Vow to be a Doctor; A Good Doctor; Goodness not Grief; Xiamen University Medical College; Health Reform and Centres of Excellence; Asia Pacific OCo The Third Block; East and West, Science and God. Readership: Students, professional, and general public.

Exosomes in Cardiovascular Diseases Junjie Xiao,Sanda Cretoiu,2017-09-19 The book provides and intensive overview on exosomes in cardiovascular diseases, its potential as biomarkers, as well as pathological and therapeutic effects. It firstly describes the general aspects of exosomes including the definition, formation and secretion of exosomes and highlight their roles as biomarkers and pathological and therapeutic effects in cardiovascular diseases as well. Secondly, basic aspects of exosomes including the purification methods of exosomes, exosomes content, and functional roles of the cardiovascular exosomes are summarized. Thirdly, exosomes as biomarkers of cardiovascular diseases are overviewed including their roles in diagnosis, prognosis and reaction to therapy. Fourthly, pathological effects of exosomes and therapeutic effects of exosomes are highlighted. Finally, future prospects of exosomes in cardiovascular research would be provided. This is an essential reference for researchers working in cell biology and regeneration, as well as clinicians such as cardiologist.

Heart Failure in Congenital Heart Disease: Robert. E Shaddy,2010-11-19 This book will provide both an evidence base and practical recommendations for the treatment of patients with congenital heart disease. It will be a resource to all health care providers, including pediatric cardiologists, pediatric intensivists, pediatric heart surgeons, fetal specialists, maternal fetal medicine specialists, neonatologists, nurses, advanced practice nurses, in addition to trainees in the field. It will summarize world knowledge on the topic of heart failure in patients with congenital heart disease. It will provide an in depth analysis of the current methods of diagnosis and treatment of heart failure. Now that surgical results are at record success rates, more patients with congenital heart disease are surviving, and thus at risk for sequelae from their disease, including heart failure. It will provide evidence based and practical recommendations to the practitioner for the management of heart failure signs and symptoms.

Cardiovascular Complications of COVID-19 Umair Mallick,2022-02-10 This book discusses the evidence behind the relationship between COVID-19 and heart disease based on emerging state-of-the-art data. The rapid and unexpected global spread of the COVID-19

has revealed proportional levels of cardiovascular and metabolic complications. A myriad of pathogenetic mechanisms has come to the surface. There is still much research required to define whether cardiovascular disease causes COVID-19 complications or that cardiovascular disease appears as a result of the infection and which mechanisms are responsible. With cardiovascular and metabolic diseases already at pandemic levels and expected to increase further, this book provides readers with an urgent and thorough analysis of this association. *Cardiovascular Complications of COVID-19: Risk, Pathogenesis and Outcomes* provides answers to the increasing numbers of questions related to heart disease in COVID-19, highlighting the association between these pandemics and including risk factors, mechanisms and how these may impact diverse patients populations. It describes how COVID-19 impacts older patients and those with metabolic illnesses such as obesity and diabetes mellitus, while providing an overview of the observed gender dichotomy among patients. It therefore represents an essential resource not only for all cardiovascular physicians but also for any healthcare professionals managing patients with these diseases or those exploring COVID-19.

Sensors for Next-Generation Electronic Systems and Technologies P. Uma Sathyakam,K. Venkata Lakshmi Narayana,2023-05-16 The text covers fiber optic sensors for biosensing and photo-detection, graphene and CNT-based sensors for glucose, cholesterol, and dopamine detection, and implantable sensors for detecting physiological, bio-electrical, biochemical, and metabolic changes in a comprehensive manner. It further presents a chapter on sensors for military and aerospace applications. It will be useful for senior undergraduate, graduate students, and academic researchers in the fields of electrical engineering, electronics, and communication engineering. The book Discusses implantable sensors for detecting physiological, bio-electrical, biochemical, and metabolic changes Covers applications of sensors in diverse fields including healthcare, industrial flow, consumer electronics, and military Includes experimental studies such as the detection of biomolecules using SPR sensors and electrochemical sensors for biomolecule detection Presents artificial neural networks (ANN) based industrial flow sensor modeling Highlights case studies on surface plasmon resonance sensors, MEMS-based fluidic sensors, and MEMS-based electrochemical gas sensors The text presents case studies on surface plasmon resonance sensors, MEMS-based fluidic sensors, and MEMS-based electrochemical gas sensors in a single volume. The text will be useful for senior undergraduate, graduate students, and academic researchers in the fields of electrical engineering, electronics, and communication engineering.

Cardiovascular Endocrinology and Metabolism Andrew J. Krentz,Robert J. Chilton,2023-03-28 *Cardiovascular Endocrinology and Metabolism: Theory and Practice of Cardiometabolic Medicine* discusses the close intersection between metabolic disorders and cardiovascular disease, covering the basic science and pathophysiology of disease and the latest research in pharmacological approaches and translational therapeutic options. This book is a valuable resource for the vascular and endocrinology clinical and research communities in need of knowledge and potential outcomes. The global increase in the prevalence of cardiometabolic disorders, and the introduction of therapeutic options for treating metabolic disease that also lower cardiovascular risk, is bringing endocrinologists and cardiologists together in a shared clinical experience. Discusses the intersection between metabolic disorders and cardiovascular diseases Provides a comprehensive understanding of the relevant pathophysiology of diseases as a basis for the evidence-based management of cardiometabolic disorders Offers a comprehensive reference, ranging from basic science and

pathophysiology to clinical diagnostics and management

Developments in Cardiac Implantable Electronic Device Therapy: How can we improve clinical implementation? Mate Vamos,Alexander Benz,Gabor Duray,Julia W. Erath,2023-06-27 The use of cardiac implantable electronic devices (CIEDs) has substantially increased in the last decades. They have a significant impact on reducing morbidity and mortality of patients suffering from cardiac arrhythmias and heart failure. Several developments of technical issues have appeared over recent years to improve safety and efficacy. However, their role in daily clinical practice is still unclear. For instance, different leadless technologies, such as leadless pacemakers, subcutaneous defibrillators or wearables are only partly or not included in the current guideline recommendations. There are also several attempts to improve clinical response to cardiac resynchronization therapy with multipoint or fusion optimized technologies, it is however not clear which patients really benefit from these. The same is true for novel conduction system pacing modalities: His-bundle pacing seems to be the most physiological but manually challenging compared to left bundle branch area pacing, which latter restores only the physiologic activation of the left ventricle but may be easier to perform. The classical indications for primary prophylactic ICD are also questioned based on some new study results, highlighting the need for an improved, more detailed and individual risk stratification for better patient selection. We have important but somehow controversial study results regarding preventive antibiotic therapy (incremental perioperative antibiotics vs antibiotic-eluting envelope) during CIED implantation. Lead extraction tools are also expanding but randomized controlled trials regarding the best approach are completely missing in this field. The importance of remote monitoring is also constantly growing, especially in the current pandemic times, the best way of patient selection needs however more research.

Protocols and Methodologies in Basic Science and Clinical Cardiac MRI Christakis Constantinides,2017-10-24 This book focuses on the practical issues of the implementation of state-of-the-art acquisition methodologies and protocols for both basic science and clinical practice. It is a practical guidebook for both beginners and advanced users for easy and practical implementation of acquisition protocols. It is relevant for a wide audience that ranges from students, residents, fellows, basic scientists, physicists, engineers, and medical practitioners. The novelty of this book relates to its intended practical use and focus on state-of-the-art cardiac MRI techniques that span both the clinical and basic science fields. In comparison and contrast to other pre-existing books, this book will distinguish from others for its practical usefulness and conciseness. Correspondingly, the book will be used as a handbook (quick reference) for new starters or people who would like to establish state-of-the-art cardiac MRI techniques in their institutions. Given the historical evolution of technique development in MRI, the clinical and basic science topics will be described separately. However, in instances where basic science development complemented (or is envisaged to complement) clinical development (e.g., Diffusion MRI and tractography), every effort will be made to allow a comprehensive review and associations of the clinical/basic science subfields.

Poincaré Plot Methods for Heart Rate Variability Analysis Ahsan Habib Khandoker,Chandan Karmakar,Michael Brennan,Marimuthu Palaniswami,Andreas Voss,2013-08-15 The Poincaré plot (named after Henri Poincaré) is a popular two-dimensional visualization tool for dynamic systems due to its intuitive display of the dynamic properties of a system from a time series. This book presents the basis of Poincaré plot and focus especially on traditional and new methods for analysing the geometry, temporal and spatial dynamics disclosed

by the Poincaré plot to evaluate heart rate variability (HRV). Mathematical descriptors of Poincaré plot have been developed to quantify the autonomic nervous system activity (sympathetic and parasympathetic modulation of heart rate). Poincaré plot analysis has also been used in various clinical diagnostic settings like diabetes, chronic heart failure, chronic renal failure and sleep apnea syndrome. The primary aims of quantification of the Poincaré plots are to discriminate healthy physiological systems from pathological conditions and to classify the stage of a disease. The HRV analysis by Poincaré plot has opened up ample opportunities for important clinical and research applications. Therefore, the present book can be used either for self-study, as a supplement to courses in linear and nonlinear systems, or as a modern monograph by researchers in this field of HRV analysis.
