Privacy and Identity Management for Emerging Services and Technologies Marit Hansen,Jaap-Henk Hoepman,Ronald Leenes,Diane Whitehouse,2014-05-02 This book contains a range of keynote papers and submitted papers presented at the 7th IFIP WG 9.2, 9.5, 9.6/11.7, 11.4, 11.6 International Summer School, held in Nijmegen, The Netherlands, in June 2013. The 13 revised full papers and 6 keynote papers included in this volume were carefully selected from a total of 30 presentations and 11 keynote talks and were subject to a two-step review process. The keynote papers cover the dramatic global changes, including legislative developments that society is facing today. Privacy and identity management are explored in specific settings, such as the corporate context, civic society, and education and using particular technologies such as cloud computing. The regular papers examine the challenges to privacy, security and identity; ways of preserving privacy; identity and identity management and the particular challenges presented by social media.

Emerging Technologies Jennifer Koerber,Michael Sauers,2015-05-06 Here's a one-stop snapshot of emerging technologies every librarian should know about and examples that illustrate how the technologies are being used in libraries today! The e-book includes videos of interviews with librarians that are using them. The videos are available on a web site for people who purchase the print book. The first four

chapters—Audio & Video, Self- and Micro-Publishing, Mobile Technology, and Crowdfunding—all look at older technologies reinvented and reimagined through significant advances in quality, scale, or hardware. Many libraries were already using these technologies in some way, and are now able to change and adapt those uses to meet current needs and take advantage of the latest improvements. The two next chapters look at new technologies: wearable technologies and the Internet of Things (simple but powerful computers that can be embedded into everyday objects and connected to controllers or data aggregation tools). The last two chapters—Privacy & Security and Keeping Up With Technology—are all-purpose topics that will continue to be affected by new developments in technology. Each of these chapters offers a brief overview of background information and current events, followed by a list of advantages and challenges to using these technologies in a library setting. The authors highlight the most useful or most well-known tools and devices, then specify how these technologies might be used in a library setting. Finally, they look at a variety of current examples from libraries in the United States and around the globe.
