The Great Skills Gap Jason Wingard,Christine Farrugia,2021-06-08 An extraordinary confluence of forces stemming from automation and digital technologies is transforming both the world of work and the ways we educate current and future employees to contribute productively to the workplace. The Great Skills Gap opens with the premise that the exploding scope and pace of technological innovation in the digital age is fast transforming the fundamental nature of work. Due to these developments, the skills and preparation that employers need from their talent pool are shifting. The accelerated pace of evolution and disruption in the competitive business landscape demands that workers be not only technically proficient, but also exceptionally agile in their capacity to think and act creatively and quickly

learn new skills. This book explores how these transformative forces are—or should be—driving innovations in how colleges and universities prepare students for their careers. Focused on the impact of this confluence of forces at the nexus of work and higher education, the book's contributors—an illustrious group of leading educators, prominent employers, and other thought leaders—answer profound questions about how business and higher education can best collaborate in support of the twenty-first century workforce.

Unlock the Hidden Job Market Duncan Mathison, Martha I. Finney, 2009-09-20
More than 70% of today's job opportunities come through the "hidden job market": they're never advertised, assigned to search firms or internal recruiters, or displayed at job fairs. What's more, as employers cut recruiting costs, the proportion of "hidden" job opportunities is actually growing. And, since most jobseekers know practically nothing about it, those who do understand it have a powerful inside advantage. Now, two career experts reveal the hidden job market, and show how to use it to dramatically improve your chances of landing a job that fits your passions and skills perfectly. Duncan Mathison and best-selling author Martha Finney help you launch a custom, personal job search that avoids competing with thousands of desperate, laid-off job seekers. Learn how to: Use the hidden job market to leap-frog salary levels or even change professions Uncover hidden market opportunities, and your target employers' unspoken needs and wants Tell your story in two minutes, and make people want to know more Get the interviews that count, and run them like a pro Network without sounding phony, lame or desperate Reframe experiences, passions, and hobbies as "transferrable skills" Build a strategic support team of advisors Identify a "dead-ended" job search, and get it restarted Negotiate compensation for "hidden" jobs.

Vocational Engagement Model Nicholas A. Villani,2022-11-03 Imagine the moment where you are working in the field providing employment services for

people with disabilities and realize that the structure, or lack thereof, has contributed to the ongoing lack of progress, Imagine that moment where you see other disciplines such as education and medical fields engaging in their services in a more effective manner that makes every day in your job seem chaotic and redundant. Finally, imagine that there was this illuminating moment where it seemed as if you may have found the answer to the question Why can't we make the progress we so desperately want? That is the origin and implementation of the Vocational Engagement Model. The Vocational Engagement Model (VEM) presents the intersection of different disciplines to rethink job placement services as they are offered to people with disabilities today. The model connects aspects of the medical, educational, and rehabilitation disciplines in a process to improve the skills of the people who seek assistance to find and keep employment. VEM transcends the traditional format for job placement services, as defined by state VR systems. It is designed to manage the job placement service and exemplify cost optimization and job-seeker engagement. VEM intends to more fully engage the job seeker, their family and circle of support in the entire job search process; establish a career quest agreement on how services will be provided and establish the level of commitment and required activities for both the job seeker and career consultant; learn how to use a series of assessment instruments that will assist the career consultant to best counsel the job seeker with use of metacognitive skills; manage the job placement service both structurally and

fiscally for cost optimization to minimize time from referral to placement, thereby facilitating personal engagement while managing the hours toward profitability; and establish Vocational Engagement Teams (VET) to create peer support systems and maximize staff skill and supports, not unlike rounds in the medical model; The Vocational Engagement Model is the evolutionary change in the provision of job placement services. It encourages guardrails for staff to work within while retaining their own creativity. The end result is total personal engagement, management of the job placement process with true cost optimization.
